Making A Map From Health To Heart Disease And Back Again:

Making a Map Julie A. Kohlhaas, 2002 Author Julie Kohlhaas found out the hard way what an important role family history plays in heart disease as documented in her new book MAKING A MAP With low cholesterol and blood pressure a vegetarian diet and a low stress retired active lifestyle she thought that at age 52 she was immune to heart disease Her family history however dictated otherwise a father two uncles and two brothers with heart disease Kohlhaas also discovered the differences between how men and women experience the symptoms of heart disease She documents the winter of travel in the Southwest that preceded her sudden life flight to Phoenix Memorial Hospital for triple bypass surgery 1 500 miles away from her home in Michigan Through her own vivid rendering of events personal journal reflections and e mail correspondence with other RV friends she chronicles the six days in the hospital rehabilitation in both Arizona and Michigan the emotional roller coaster of self discovery and the eventual gratitude for difficult lessons learned Readers of MAKING A MAP are invited to share in the life changing journey the author and her husband experienced when a health crisis on the road catapulted them into the unfamiliar territory of heart disease without a map With the backdrop of an exhilarating and memorable trip in treasured American wilderness areas a love of travel and learning Kohlhaas book about women and heart disease challenges readers by Portraying honestly her own experiences before during and after heart surgery Posing questions for other women as they begin to research basic information about heart disease strategies for prevention of disabling attacks and practical ways to maintain heart health Describing the internal pilgrimage that her heart crisis and healing so richly precipitated Providing a map not only for how one might heal when crisis strikes but also for how couples can set a course for maintaining a healthy quality of life as they approach and live retirement MAKING A MAP is an inspiring informative book for those who care about health personal growth and enduring quality of life [An Introduction to the Geography of Health](#) Helen Hazen, Peter Anthamatten, 2019-11-26 In the second edition of An Introduction to the Geography of Health Helen Hazen and Peter Anthamatten explore the ways in which geographic ideas and approaches can inform our understanding of health The book s focus on a broad range of physical and social factors that drive health in places and spaces offers students and scholars an important holistic perspective on the study of health in the modern era In this edition the authors have restructured the book to emphasize the theoretical significance of ecological and social approaches to health Spatial methods are now reinforced throughout the book and other qualitative and quantitative methods are discussed in greater depth Data and examples are used extensively to illustrate key points and have been updated throughout including several new extended case studies such as water contamination in Flint Michigan microplastics pollution West Africa s Ebola crisis and the Zika epidemic The book contains more than one hundred figures including new and updated maps data graphics and photos The book is designed to be used as the core text for a health geography course for undergraduate and lower level graduate students and is relevant to students of biology medicine entomology social science urban planning and

public health Children's Books in Print R R Bowker Publishing, Bowker, 1999-12 Futures Beyond Dystopia Richard A. Slaughter, 2003-11-13 How can dystopian futures help provide the motivation to change the ways we operate day to day Futures Beyond Dystopia takes the view that the dominant trends in the world suggest a long term decline into unliveable Dystopian futures The human prospect is therefore very challenging yet the perception of dangers and dysfunctions is the first step towards dealing with them The motivation to avoid future dangers is matched by the human need to create plans and move forward These twin motivations can be very powerful and help to stimulate the fields of Futures Studies and Applied Foresight This analysis of current Futures practice is split into six sections The Case Against Hegemony Expanding and Deepening a Futures Frame Futures Studies and the Integral Agenda Social Learning through Applied Foresight Strategies and Outlooks The Dialectic of Foresight and Experience This fascinating book will stimulate anyone involved in Futures work around the world and will challenge practitioners and others to re examine many of their assumptions methodologies and practices *Rural Health and Aging Research* Wilbert Gesler, Donna Rabiner, Gordon Defriese, 2019-03-19 This book describes a wide ranging set of research approaches which have been used to study the health care problems of adults living in rural areas It shows how these approaches can be used to define health care problems measure levels of illness and health and evaluate health care practices For each approach contributors provide a theoretical background from the health care delivery literature details of how it can be carried out in the field its strengths and weaknesses and illustrative examples from both the literature and their own work **The Lancet**, 1897 Curiosity Guides: The Human Genome John Quackenbush, 2011-02-01 The DNA sequence that comprises the human genome the genetic blueprint found in each of our cells is undoubtedly the greatest code ever to be broken Completed at the dawn of a new millennium the feat electrified both the scientific community and the general public with its tantalizing promise of new and better treatments for countless diseases including Alzheimer's cancer diabetes and Parkinson's Yet what is arguably the most important discovery of our time has also opened a Pandora's box of questions about who we are as humans and how the unique information stored in our genomes can and might be used making it all the more important for everyone to understand the new science of genomics In the CURIOSITY GUIDE TO THE HUMAN GENOME Dr John Quackenbush a renowned scientist and professor conducts a fascinating tour of the history and science behind the Human Genome Project and the technologies that are revolutionizing the practice of medicine today With a clear and engaging narrative style he demystifies the fundamental principles of genetics and molecular biology including the astounding ways in which genes function alone or together with other genes and the environment to either sustain life or trigger disease In addition Dr Quackenbush goes beyond medicine to examine how DNA sequencing technology is changing how we think of ourselves as a species by providing new insights about our earliest ancestors and reconfirming our inextricable link to all life on earth Finally he explores the legal and ethical questions surrounding such controversial topics as stem cell research prenatal
