Critical Literacy and Urban Youth Ernest Morrell, 2015-07-22 *Critical Literacy and Urban Youth* offers an interrogation of critical theory developed from the author's work with young people in classrooms, neighborhoods and institutions of power. Through cases, an articulated process and a theory of literacy education and social change, Morrell extends the conversation among literacy educators about what constitutes critical literacy while also examining implications for practice in secondary and postsecondary American educational contexts. This book is distinguished by its weaving together of theory and practice. Morrell begins by arguing for a broader definition of the critical in critical literacy, one that encapsulates the entire Western philosophical tradition as well as several important other traditions ranging from postcolonialism to the African American tradition. Next, he looks at four cases of critical literacy pedagogy with urban youth: teaching popular culture in a high school English classroom, conducting community-based critical research, engaging in cyber activism, and doing critical media literacy education. Lastly, he returns to theory, first considering two areas of critical literacy pedagogy that are still relatively unexplored: the importance of critical reading and writing in constituting and reconstituting the self, and critical writing that is not just about coming to a critical understanding of the world but that plays an explicit and self-referential role in changing the world. Morrell concludes by outlining a grounded theory of critical literacy pedagogy and considering its implications for literacy research, teacher education, classroom practice, and advocacy work for social change.

Visions from Professional Development School Partners Michael Cosenza, Marilyn Buchanan, 2018-01-01 Rich clinical preparation combined with progressive experiences in professional development school (PDS) settings are proposed to bring about systemic and impactful transformation of educator preparation and professional growth in order to improve and enhance P-12 student learning. In this book, diverse authors describe their efforts to forge PDS partnerships to develop and deliver high-quality training and practical experiences for candidates and simultaneously provide professional development for experienced practitioners in ways that mirror recommendations found in authoritative reports and literature. The authors' collective wisdom is vividly captured in the multi-voiced chapters that are collaborations between cooperating teachers, school administrators, county and district-level administrators, university supervisors, and instructional faculty. The contexts authors write about are recognizable, and the accomplishments they experienced and challenges faced will resonate with institutions courageously undertaking change or renewal. The book will be invaluable to school and university faculty and administrators as they transition to a partnering model of clinical preparation for teacher candidates; it will help stakeholders decide if their schools and institutions are ready to commit to a partnership and highlight the benefits they stand to gain but realistically address challenges that may be faced by administrators and faculties as well as teacher candidates in the PDS enterprise.
