timeless and exceedingly timely In The Dao of Capital hedge fund manager and tail hedging pioneer Mark Spitznagel with one of the top returns on capital of the financial crisis as well as over a career takes us on a gripping circuitous journey from the Chicago trading pits over the coniferous boreal forests and canonical strategists from Warring States China to Napoleonic Europe to burgeoning industrial America to the great economic thinkers of late 19th century Austria We arrive at his central investment methodology of Austrian Investing where victory comes not from waging the immediate decisive battle but rather from the roundabout approach of seeking the intermediate positional advantage what he calls shi of aiming at the indirect means rather than directly at the ends The monumental challenge is in seeing time differently in a whole new intertemporal dimension one that is so contrary to our wiring Spitznagel is the first to condense the theories of Ludwig von Mises and his Austrian School of economics into a cohesive and as Spitznagel has shown highly effective investment methodology From identifying the monetary distortions and non randomness of stock market routs Spitznagel s bread and butter to scorned highly productive assets in Ron Paul s words from the foreword Spitznagel brings Austrian economics from the ivory tower to the investment portfolio The Dao of Capital provides a rare and accessible look through the lens of one of today s great investors to discover a profound harmony with the market process a harmony that is so essential today

**The Forgotten Depression** James Grant, 2014-11-11 James Grant's story of America's last governmentally untreated depression A bible for conservative economists this carefully researched history makes difficult economic concepts easy to understand and it deftly mixes major events with interesting vignettes The Wall Street Journal In 1920 1921 Woodrow Wilson and Warren G Harding met a deep economic slump by seeming to ignore it

implementing policies that most 21st century economists would call backward. Confronted with plunging prices, wages, and employment, the government balanced the budget and through the Federal Reserve raised interest rates. No stimulus was administered, and a powerful job-filled recovery was under way by late 1921. Yet by 1929 the economy spiraled downward as the Hoover administration adopted the policies that Wilson and Harding had declined to put in place. In *The Forgotten Depression*, James Grant makes a strong case against federal intervention during economic downturns. *Pittsburgh Tribune Review* arguing that the well-intended White House-led campaign to prop up industrial wages helped turn a bad recession into America's worst depression. He offers examples like this and many others as important strategies we can learn from the earlier depression and apply today and to the future. This is a powerful response to the prevailing notion of how to fight recession, and Mr. Grant's history lesson is one that all lawmakers could take to heart. *Washington Times*

**Awaiting the City** Chad Brand, Tom Pratt, 2012-11-13 People of faith have always been on search for the homeland first promised to Abraham in light of the Babylonian civilization he left. That future hope was reinterpreted by Jesus and taken up by St. Augustine in *The City of God*, reinterpreted again by John Calvin in Geneva and given a final form by the Puritan pilgrims who came to America to establish the City upon a Hill. Fundamental to this quest for a just, holy civilization has been the progress of humankind on the earth in light of the mandate to fill and rule over it. Authors Chad Brand and Tom Pratt discuss that progress as they answer the vital questions for praxis: How should biblically oriented Christians think of and work toward God's justice along the way? How can we steer between a utopian vision and a limited vision to a new, rational compassion?
