Making And Breaking Universities:

HL 111 - Make Or Break: The UK's Digital Future The Stationery Office, 2015 This report is a call to action for the incoming Government in May 2015 The world is being transformed by a series of profound technological changes dominated by digital a second machine age This is already having a significant impact on the UK over the next two decades some economists have estimated that 35% of current jobs in the UK could become automated Digital technology is changing all our lives work society and politics It brings with it huge opportunities for the UK but also significant risks This demands an ambitious approach which will secure the UK's position as a digital leader The Committee recommends that the new Government establishes a single and cohesive Digital Agenda The potential value in doing so is significant the Government estimated that the digital sector alone was worth an estimated 105 billion in gross value added to the UK in 2011 A report by the National Institute of Economic and Social Research in 2013 meanwhile found that the size of the digital economy was almost double official estimates Whatever the difficulties in quantifying the value it is clear that digital is already a substantial driver for growth and will become much more so Digital technology is transforming much more than just one sector of the economy the whole economy has become digitised It would therefore be a mistake to take the digital sector as our sole focus of interest Digital technology is pervasive across all aspects of life so much so that the digital economy is becoming synonymous with the national economy The UK cannot afford to miss the opportunity or shirk the challenges this presents

Preserving the Past Julia Horne, Stephen Garton, 2017-03-20 The Dawkins reforms of the late 1980s and the creation of the Unified National System roused passions at many universities across the nation over fears for the academic enterprise and Australia's system of free public university education With much at stake the Dawkins reforms became a hot topic of discussion across university campuses and even between Vice Chancellors and state education ministers Vice Chancellors were threatened with motions of no confidence staff argued furiously against change and students protested against fees yet mostly to no avail The reforms were introduced and universities became subject to new ways of funding by the Commonwealth that changed the way higher education was organised in Australia This volume tells the story of the Dawkins reforms at Australia's oldest university the University of Sydney and the unlikely alliance between the University's Vice Chancellor and the New South Wales government in the scramble for more students Between 1988 and 1996 the University grew exponentially At the same time it strove to preserve its honoured past despite profound change Did this desire to preserve an older tradition compromise its effort to master the future

Political Economy Now! Gavan Butler, Evan Jones, Frank Stilwell, 2018-08-30 Political Economy Now is the story of one of the most substantial and enduring conflicts in the history of Australian universities Beginning in the late 1960s it pitted those

committed to the teaching of mainstream economics at the University of Sydney against the proponents of an alternative program in political economy The dispute continued for decades until a Department of Political Economy was established in the Faculty of Arts in 2008 Why all the fuss over the teaching of economics Why were the disagreements so deep and protracted What has been at stake Why did dissident staff and students commit so much time and energy to establishing and developing alternative courses and administrative arrangements The dispute involved substantial differences of opinion about the nature of the curriculum the style of teaching and the structures of power and decision making Although locally focused at the University of Sydney and at its most intense during the 1970s and 1980s the dispute also has wider implications for how we understand the economic system and the role of economic policy It reflects a broader tension in Australian society about what economic arrangements best serve social needs The story of the struggle for alternative economics told from the political economists perspective weaves together a general historical narrative with illustrations and interpretations of the causes and consequences of the conflict and personal recollections of eleven former student activists all now in significant professional positions Political Economy Now is a fascinating read for those concerned about how a discipline of great social and political significance is understood and taught to its would be practitioners **How to Make Colleges Want You** Mike Moyer, 2008-08-01 What if you had colleges coming after you instead of the other way around The hidden little secret of college admissions is that most schools are desperate desperate for great kids who do things differently and will make their campuses vibrant and exciting And you don't have to be an A student the president of your student body or the winner of the national spelling bee to do this Any student can become someone that colleges compete for if you follow the recommendations in this book The Secret of NTAs Unusual activities that make you stand out Breaking the Zone Take advantage of where you're from and who you are Striking the Nerve Decode what colleges believe in then match those values Your Application Team Getting references teachers and counselors to boost your odds And much more No matter where you are in your high school career you can start these things today and vastly increase your odds of getting into the competitive college of your choice University of California Publications in Physiology University of California, Berkeley, 1905 The Oxford Handbook of Political Representation in Liberal Democracies Robert Rohrschneider, Jacques Thomassen, 2020-07-28 The Handbook of Political Representation in Liberal Democracies offers a state of the art assessment of the functioning of political representation in liberal democracies In 34 chapters the world's leading scholars on the various aspects of political representation address eight broad themes The concept and theories of political representation its history and the main requisites for its development elite orientations and behavior descriptive representation party government and representation non electoral forms of political participation and how they relate to political representation the challenges to representative democracy originating from the growing importance of non majoritarian institutions and social media the rise of populism and its consequences for the functioning of representative democracy the challenge caused by economic and

political globalization what does it mean for the functioning of political representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people The various chapters offer a comprehensive review of the literature on the various aspects of political representation The main organizing principle of the Handbook is the chain of political representation the chain connecting the interests and policy preferences of the people to public policy via political parties parliament and government Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research Comparative research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different

The Journal of Education, 1926 *Inside Charter Schools* Bruce Fuller, 2009-06-30 Deepening disaffection with conventional public schools has inspired flight to private schools home schooling and new alternatives such as charter schools Barely a decade old the charter school movement has attracted a colorful band of supporters from presidential candidates to ethnic activists to the religious Right At present there are about 1 700 charter schools with total enrollment estimated to reach one million early in the century Yet until now little has been known about the inner workings of these small inventive schools that rely on public money but are largely independent of local school boards *Inside Charter Schools* takes readers into six strikingly different schools from an evangelical home schooling charter in California to a back to basics charter in a black neighborhood in Lansing Michigan With a keen eye for human aspirations and dilemmas the authors provide incisive analysis of the challenges and problems facing this young movement Do charter schools really spur innovation or do they simply exacerbate tribal forms of American pluralism *Inside Charter Schools* provides shrewd and illuminating studies of the struggles and achievements of these new schools and offers practical lessons for educators scholars policymakers and parents Canada's Residential Schools: The History, Part 2, 1939 to 2000 Commission de vérité et réconciliation du Canada, 2016-01-01 Between 1867 and 2000 the Canadian government sent over 150 000 Aboriginal children to residential schools across the country Government officials and missionaries agreed that in order to civilize and Christianize Aboriginal children it was necessary to separate them from their parents and their home communities For children life in these schools was lonely and alien Discipline was harsh and

daily life was highly regimented Aboriginal languages and cultures were denigrated and suppressed Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self sustaining Child neglect was institutionalized and the lack of supervision created situations where students were prey to sexual and physical abusers Legal action by the schools former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008 The product of over six years of research the Commission s final report outlines the history and legacy of the schools and charts a pathway towards reconciliation Canada s Residential Schools The History Part 2 1939 to 2000 carries the story of the residential school system from the end of the Great Depression to the closing of the last remaining schools in the late 1990s It demonstrates that the underfunding and unsafe living conditions that characterized the early history of the schools continued into an era of unprecedented growth and prosperity for most Canadians A miserly funding formula meant that into the late 1950s school meals fell short of the Canada Food Rules Overcrowding poor sanitation and a failure to adhere to fire safety rules were common problems throughout this period While government officials had come to view the schools as costly and inefficient the churches were reluctant to countenance their closure It was not until the late 1960s that the federal government finally wrested control of the system away from the churches Government plans to turn First Nations education over to the provinces met with opposition from Aboriginal organizations that were seeking Indian Control of Indian Education Following parent led occupation of a school in Alberta many of the remaining schools came under Aboriginal administration The closing of the schools coincided with a growing number of convictions of former staff members on charges of sexually abusing students These trials revealed the degree to which sexual abuse at the schools had been covered up in the past Former students who came to refer to themselves as Survivors established regional and national organizations and provided much of the leadership for the campaign that led to the federal government issuing in 2008 an apology to the former students and their families
