Making Capitalism in China You-tien Hsing, 1998 *Making Capitalism in China* The Taiwan Connection shows that small and medium sized Taiwanese investors are organized in production and marketing networks not vertically integrated conglomerates When in China they directly negotiate and establish partnerships with entrepreneurial local officials not the central bureaucracy Also they effectively transfer a capitalist ideology of production to Chinese factory workers Importantly the investors attribute their business successes in China to the cultural historical and linguistic affinities they share with these local agents Connections regarding socio cultural identity do more than facilitate business dealings or ease labor relations Hsing asserts that partnerships between mainland settlements and overseas Chinese investors constitute a local global coalition of economic reform one that strengthens local autonomy in China and bypasses the control of the central government This coalition is nothing short of a new pattern of foreign direct investment one profoundly influenced by both cultural boundaries usually deemed insignificant in matters of capital flow and globalization and local state agents who operate in this case as crucial business partners A notable work that will appeal to all students of East Asian economic organization ethnic business networks international investment and the political economy of socialist transition Hsing's book is based on hundreds of interviews and participatory observations that she conducted between 1991 and 1996 with investors local officials and factory workers in Taiwan Hong Kong Guangdong Fujian and Shanghai

Lin,Mark Wang,Andrew Marton, Jiaping Wu,2007-10-18 China s urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China s urban space since the 1970s arguing that to

study the Chinese urbanization process one must recognize the distinctive political economy of China. After a long period as a planned socialist economy, China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies. This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization. Richly illustrated with maps, diagrams and in depth case studies, this book will be an invaluable resource to students and scholars of urban economics and policy, geography and the development of China.

Internationalizing China David Zweig, 2018-05-31. China began opening to the outside world in 1978. This process was designed to remain under the state's control. But the relative value of goods and services inside and outside China drove cities, enterprises, local governments and individuals with comparative advantage in international transactions to seek global linkages. These contacts, David Zweig asserts, led to the deregulation of China's mercantilist regime. Through extensive field research, Zweig surveys the extraordinary changes in four sectors of China's domestic political economy: the establishment of development zones, rural joint ventures, the struggle over foreign aid and higher education. He also addresses the crucial question of whether, on balance, internationalization weakens or strengthens state power.

The Global Rise of China Alvin Y. So, Yin-Wah Chu, 2015-12-08. This book sets out to unravel and explain the puzzle of the global rise of China: how in just forty years China has been quickly transformed from a poor, backward third world country to one of the world's core economic powerhouses. Exactly how did this Chinese developmental miracle happen? Focusing on the key historical turning point in China's post-socialist development, the book examines the complex processes through which China interacted with the global neoliberal project of the late twentieth century. Alvin Y. So and Yin Wah Chu reveal the centrality of the communist party state in propelling China onto the world scene and how it has successfully responded to the developmental challenges of technological upgrading, environmental degradation, inter-state rivalry and maintaining its power. This book provides a comprehensive and insightful study of the rise of China, not solely from an economic, social and political perspective but also from a global and historical perspective. It will be an invaluable guide for students and non-specialists interested in post-socialist development and the global rise of China in the twenty-first century.

China's Reform in Global Perspective John Wong, Zhiyue Bo, 2010. After three introductory chapters on broad scope of reform in the political, economic and social realms, this book deals with lessons from the Eastern Bloc, China's reform in East Asian context and China and the developed world. The book concludes with two chapters looking to the future of China's political and economic development. In the existing literature of China's reform experience, this book is unique in perspective, topic selection and in depth analyses. With

China, the West and the Myth of New Public Management Paolo Urio, 2012 In the West innovations in new public management NPM have been regarded as part of the neoliberal project whilst in China these reforms have emerged from a very different economic and social landscape Despite these differences however similar measures to those introduced in the West have been adopted by the Chinese state which has largely abandoned the planned economy and adopted market mechanisms in the pursuit of improved economic efficiency and growth Evaluating the results of these reforms in both China and the West between 1978 and 2011 this book shows that despite substantial improvements in economic efficiency in both cases under consideration there have been considerable negative impacts on the distribution of wealth access to public services levels of poverty public health and the incidence of crime Further this book explores the different results of NPM in China and the West and the conclusions Paolo Urio draws have timely significance as he suggests that China has been able to change its policies more rapidly and thus more effectively respond to the challenges posed by the current economic crisis Drawing on both Western and Chinese sources this innovative book compares the consequences of their public management reforms taking into account the impact on both the economy

and society As such this book will be of great interest to students and scholars working in the fields of Chinese studies Asian studies business economics strategic public management and comparative studies in capitalism and socialism **Catch-Up and Competitiveness in China** Jin Zhang, 2004-07-31 This book examines the role of corporate structure including the role of corporate headquarters in the success of large firms It considers these issues in relation to large global corporations thereby providing a benchmark which is then used as a contrast in a discussion of corporate structure and the role of corporate headquarters within large Chinese firms many of which have evolved from former government ministries It includes a detailed case study of firms in the crucially important oil and petro chemical sector Overall the book shows what a hugely competitive battle China's emerging national champions face with their global competitors and puts forward policy implications both for large Chinese firms and for the Chinese government concerning how business systems should be reformed further still in order to construct globally competitive large industrial corporations
