President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research,1982 *Making Health Care Decisions: Appendices: Empirical studies of informed consent* United States. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research,1982 Making Medical Decisions for the Profoundly Mentally Disabled Norman L. Cantor,2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals **Prison Inmates in Medical Research** United States. Congress. House. Committee on the Judiciary. Subcommittee on Courts, Civil Liberties, and the Administration of Justice,1976 *Source Book in Bioethics* Albert R. Jonsen,Robert M. Veatch,LeRoy Walters,1999-09-07 Government agencies and commissions courts and legislatures have during the past several decades produced reports rendered decisions and passed laws that have both defined the fundamental issues in the field of bioethics and established ways of managing them in our society Providing a history of these key bioethical decisions this Source Book in Bioethics is the first and only comprehensive collection of the critical public documents in biomedical ethics including many hard to find

or out of print materials Covering the period from 1947 to 1995 this volume brings together core legislative documents court briefs and reports by professional organizations public bodies and governments around the world Sections on human experimentation care of the terminally ill genetics human reproduction and emerging areas in bioethics include such pivotal works as The Nuremberg Code The Tuskegee Report and In the Matter of Baby M as well less readily available documents as The Declaration of Inuyama the Council for International Organizations of Medical Sciences statement on genetic engineering and The Warnock Committee Report on reproductive technologies from the United Kingdom Three eminent scholars in the field provide brief introductions to each document explaining the significance of these classic sources This historical volume will be a standard text for courses in bioethics health policy and death and dying and a primary reference for anyone interested in this increasingly relevant field

Holding Health Care Accountable E. Haavi Morreim, 2001-08-16 Health care in the US and elsewhere has been rocked by economic upheaval Cost cuts care cuts and confusion abound Traditional tort and contract law have not kept pace Physicians are still expected to deliver the same standard of care including costly resources to everyone regardless whether it is paid for Health plans can now face litigation for virtually any unfortunate outcome even those stemming from society's mandate to keep costs down while improving population health This book cuts through the chaos and offers a clear persuasive resolution Part I explains why new economic realities have rendered prevailing malpractice and contract law largely anachronistic Part II argues that pointing the legal finger of blame blindly or hastily can hinder good medical care Instead of whom do we want to hold liable we should focus first on who should be doing what for the best delivery of health care When things go wrong each should be liable only for those aspects of care they could and should have controlled Once a good division of labor is identified what kind of liability should be imposed depends on what kind of mistake was made Failures to exercise adequate expertise knowledge skill care effort should be addressed as torts while failures to provide promised resources should be resolved under contract Part III shows that this approach though novel fits remarkably well with basic common law doctrines and can even enlighten ERISA issues With extensive documentation from current case law commentary and empirical literature the book will also serve as a comprehensive reference for attorneys law professors physicians administrators bioethicists and students

Goodman, 1998 New technology always raises compelling ethical questions As those in medicine increasingly depend on computers and other intelligent machines the intersection of ethics computing and the health professions grows much more complex and significant This book attempts systematically to identify and address the full range of ethical issues that arise when intelligent machines are used in medicine nursing psychology and allied health professions It maps and explores a variety of important issues and controversies including ethics and evaluation in computational medicine patient and provider confidentiality responsibility for use of computers in medicine appropriate use of decision support systems outcomes of research and computational prognosis including mortality predictions and computer based biomedical research especially meta analysis This book is accessible to participants in the fields of bioethics and medical informatics It is appropriate for physicians nurses administrators ethicists health attorneys advanced undergraduates and graduate students **A Matter of Choice** Barbara Mishkin, 1986 **Managing Care: A Shared Responsibility** Joseph L. Decision Making Zur Shapira,2002-03-25 Decision making in organizations is often pictured as a coherent and rational process in which alternative interests and perspectives are considered in an orderly manner until the optimal alternative is selected Yet as many members of organizations have discovered from their own experience real decision processes in organizations only seldom fit such a description This book brings together researchers who focus on cognitive aspects of decision processes on the one hand and those who study organizational aspects such as conflict incentives power and ambiguity on the other It draws from the tradition of Herbert Simon who studied organizational decision making s pervasive use of bounded rationality and heuristics of reasoning These multiple perspectives may further our understanding of organizational decision making Organizational Decision Making is particularly well suited for students and faculties of business psychology and public administration Case Studies in Pharmacy Ethics Robert M. Veatch,Amy Marie Haddad,1999 Every pharmacist constantly makes ethical choices Sometimes these choices are dramatic life and death decisions but often they are more subtle less conspicuous choices that are nonetheless important Assisted suicide conscientious refusal pain management equitable and efficacious distribution of drug resources within institutions and managed care plans confidentiality and alternative and non traditional therapies are among the issues that are of unique concern to pharmacists One way of seeing the implications of such issues and the moral choices they pose is to look at the experiences and the choices that have had to be made in situations typically faced by pharmacists This book is a collection of those situations based on the real experiences of practicing pharmacists The use of case studies in health care ethics is not new but in pharmacy it is This text is an important teaching tool that will help pharmacy students and pharmacists address the increasing number of ethical problems arising in their profession It is not merely a compilation of cases but rather is organized for the systematic study of applied ethics Part I shows how to distinguish ethical problems from other kinds of evaluative judgments and examines the sources of values in pharmacy posing basic questions about the meaning and justification of ethical claims Part II explores the basic principles of ethics as they have an impact on pharmacy Specific cases from clinical settings present in a systematic way the various questions raised by each of the major ethical principles benefiting the patient distributing resources justly respecting autonomy dealing honestly with patients keeping promises of confidentiality and avoiding killing Part III examines some of the special problems of contemporary pharmacy such as the linkages between pharmaceutical care and professional practice human experimentation reproductive issues genetic technology death and dying and mental health **Nursing Ethics and Professional Responsibility in Advanced**
