**Making of the West, Volume II: Since 1500** Lynn Hunt, Thomas R. Martin, Barbara H. Rosenwein, Bonnie G. Smith, 2012-01-04 Students of Western civilization need more than facts They need to understand the cross cultural global exchanges that shaped Western history to be able to draw connections between the social cultural political economic and intellectual happenings in a given era and to see the West not as a fixed region but a living evolving construct These needs have long been central to *The Making of the West* The book s chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context enabling students to witness the unfolding of Western history understand change over time and recognize fundamental relationships      *The Making of Modern Europe, 1648-1780* Geoffrey Treasure, 2003-12-16 This reissue of a classic textbook has been revised and updated with a new introduction by the author Geoffrey Treasure provides a thoroughly comprehensive account of the European experience at a time when so much of what is today identified as modern began to take shape Discussing key issues of the period *The Making of Modern Europe 1647 1980* examines the evolution of the developing society detailed studies of the people their environment attitudes and beliefs economic aspects the growth of the states politics war and diplomacy religion intellectualism and science This work provides an excellent grounding for the study of seventeenth and eighteenth century European history      *Prince Henry of Prussia, Brother of Frederick the Great* Prof. Chester Verne Easum, 2018-03-12 This book by renowned Professor of German History Chester Verne Easum which was first published in 1942 is devoted to Prince

Henry the younger brother of Prussia's Frederick the Great Frederick Henry Louis 1726 1802 commonly known as Henry Heinrich also served as a general and statesman leading Prussian armies in the Silesian Wars and the Seven Years War in which he did not lose a single battle The man principally responsible for the achievements of Frederick II of Prussia was Frederick himself No one else earned for him the title of Frederick the Great Friedrich der Einzige or Old Fritz Yet he owed much of his success to the work of his predecessors particularly the Great Elector and Frederick William I and much to the help his brother Henry gave him As the rather obscure figure of the younger brother emerges from the shadow of the throne only as the light of investigation is thrown upon it so Frederick himself takes on a new and in some ways more attractive appearance as his character is more fully revealed by the study of his relationship with Henry Far from being discredited he gains more than he loses as a result of this renewed scrutiny So does Henry

Soldiers, Statecraft, and History James A. Nathan, 2002-08-30 The increasing capacity of states to muster violence the concomitant rise of military power as a meaningful instrument of foreign policy and the frequent episodic collapse of that power are considered in this examination of force order and diplomacy Nathan points to periods of relative order and stability in international relations the time immediately prior to the rise of Frederick the Great for example or the half century after the Napoleonic Wars as times when states have been most vulnerable to spoilers and rogues Only the power of the Cold War blocs fostered durable order Now notwithstanding novel elements of globalization international relations appear as dependent as ever on the prudent management of force Students scholars and soldiers are frequently exposed to Clausewitz Westphalia Napoleon World War I and the like But what makes these events and individuals so important This book is Clausewitz's successor insisting that soldiers and statesmen know and master the integrative potential of force Nathan provides a narrative account of the people and events that have shaped international relations since the onset of the state system He asserts that an understanding of the limits and utility of persuasion as well as the corresponding limits and utility of force will help assure national security in a world filled with more uncertainties than ever in the last 50 years

Germany under the Old Regime 1600-1790 John G. Gagliardo, 2014-01-21 German history in the seventeenth and eighteenth centuries is notoriously inaccessible to non specialists When other European countries were well on the way to becoming nation states Germany remained frozen as a territorially fragmented politically and religiously divided society The achievement of this major contribution to the new History of Germany is to do justice to the variety and multiplicity of the period without foundering under the wealth of information it conveys

Aspects of European History 1494-1789 Stephen J. Lee, 2005-06-20 First published in 1984 Routledge is an imprint of Taylor Francis an informa company

**The Making of Frederick the Great** Edith Simon, 1963

**The Making of Strategy** Williamson Murray, 1996-05-31 Most writing about strategy has focused on individual strategic theorists or great military leaders This book focuses instead on the messy processes by which rulers and states have framed strategy in the past a subject of vital practical importance to strategists and of great interest to students of strategy and

statecraft It consists of 17 case studies that range from fifth century Athens and Ming China to Hitler's Germany Israel and the post 1945 United States The studies analyse within a common interpretive framework precisely how rulers and states have made strategy The introduction emphasises the constants in the rapidly shifting world of the strategist the concluding essay tries to understand the forces that have driven the transformation of strategy since 400 BC and seem likely to continue to transform it in the future

**The Making of the Second World War** Anthony P. Adamthwaite, 1992 First Published in 1979 Routledge is an imprint of Taylor Francis an informal company

*The making of men* Herbert George Wells, 1921  
*Generals in the Making* Benjamin Runkle, 2019-07-26 Part military history and part group biography *Generals in the Making* is the first comprehensive history of the United States World War II generals between the wars covering not only the lives and careers of this brotherhood of officers but also the crucible of military ideas and innovation in which they served

Frederick the Great and the making of Prussia Thomas Mack Barker, 1972 *The Arming of Europe and the Making of the First World War* David G. Herrmann, 2020-03-31 David Herrmann's work is the most complete study to date of how land based military power influenced international affairs during the series of diplomatic crises that led up to the First World War Instead of emphasizing the naval arms race which has been extensively studied before Herrmann draws on documentary research in military and state archives in Germany France Austria England and Italy to show the previously unexplored effects of changes in the strength of the European armies during this period Herrmann's work provides not only a contribution to debates about the causes of the war but also an account of how the European armies adopted the new weaponry of the twentieth century in the decade before 1914 including quick firing artillery machine guns motor transport and aircraft In a narrative account that runs from the beginning of a series of international crises in 1904 until the outbreak of the war Herrmann points to changes in the balance of military power to explain why the war began in 1914 instead of at some other time Russia was incapable of waging a European war in the aftermath of its defeat at the hands of Japan in 1904 5 but in 1912 when Russia appeared to be regaining its capacity to fight an unprecedented land armaments race began Consequently when the July crisis of 1914 developed the atmosphere of military competition made war a far more likely outcome than it would have been a decade earlier

**From Domestic Manufacture to Industrial Revolution** Herbert Kisch, 1989 This book is an economic historical and sociological examination of rural textile industries in the Lower Rhineland beginning in the sixteenth century culminating with the age of factory organization in the early 1800s Drawing on archival sources not available to English language readers the late Kisch analyzes the evolution of entrepreneurial innovations the growth of a skilled labor force and changes in institutional mechanisms and patterns of social behavior that prepared this critical economic region for the innovation of factory production that came with the industrial revolution

**Making English Official** Katherine S. Flowers, 2024-01-18 In communities across the US people wrestle with which languages to use and who gets to decide Despite more than 67 million US residents using a language other than English at home over half of

the states in the US have successfully passed English only policies Drawing on archives and interviews this book tells the origin story of the English only movement as well as the stories of contemporary language policy campaigns in four Maryland county governments giving a rare glimpse into what motivates the people who most directly shape language policy in the US It demonstrates that English only policies grow from more local levels rather than from nationalist ideologies where they are downplayed as harmless community initiatives but result in monolingual approaches to language remaining increasingly pervasive This title is part of the Flip it Open Programme and may also be available Open Access Check our website Cambridge Core for details
