## **Making Of The European Union Contributions Of The Social Sciences:**

**The Making of the European Union** Max Haller, 2012-12-06 Outstanding social scientists economists sociologists political scientists and policy researchers discuss in this book the issue of the social aspects of European integration For each field they sketch out the main problems provide a survey on the relevant literature and point to areas wherein more research is needed The science and research policy of the European Union is examined critically both in terms of relevant social issues and in terms of its organizational efficacy Implementing European Union Education and Training Policy D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union The network known as PRESTiGE Problems of Educational Standardisation and Transition in a Global Environment involves teams at six European universities each of which can only employ young researchers from Member States other than that in which it is situated The Oxford part of PRESTiGE has been concerned with the interpretation transmission and implementation of European Union education and training policy in four Member States France Germany Sweden and the United Kingdom As the leader of the Oxford team I had the good fortune to work with young researchers from Denmark Germany Greece Sweden and Portugal Their work is included here So too are contributions from Jake Murdoch a member of the Dijon team based at the Universit de Bourgogne and Professor Ant nio N voa the leader of the Lisbon team Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co operation and development will wish to pursue

**Restructuring of the Economic Elites after State Socialism** Jochen Tholen, David Lane, Gyorgy Lengyel, 2012-02-24 The collapse of the former socialist states has led to the transformation of their political economic and social systems as well as a major change in international orientations In this context new economic and political elites of the former state socialist societies have emerged How they have emerged from state socialism is a major component of this book which has two major themes First we consider the recruitment patterns of the new elites among others the extent to which the new leaderships have been reconstituted from the former cadres of state socialism Second we outline the consequences of transformation on the institutions particularly the formation of markets and privatisation in the context of the dynamic of the enlargement of the European Union and the entry of the new states into the world system This collection of papers is based mostly on two conferences out of six serial conferences under the general responsibility of David Lane Cambridge University The first conference was held in Budapest on 4 5 September 2004 at Corvinus University of Budapest Institute of Sociology and Social Policy Centre for Empirical Social Research and organized by Gy rgy Lengyel the second on 13 14 May 2005 at University of Bremen Institute of

Sociology Institute Labour and Economy led by Jochen Tholen     The European Union's Contribution to International Peace and Security ,2023-05-25 The Treaty of Lisbon has significantly enhanced the EU's institutional framework and the instruments at its disposal in foreign policy and external relations notably through the creation of the function of the High Representative supported by the European External Action Service Contributing to the maintenance of international peace and security is one of the core objectives of the EU's external action This volume with contributions from legal experts on EU foreign policy and external relations illustrates the manifold legal issues arising in EU external action and in its efforts to achieve this essential objective     European Societies Mau, Steffen, Verwiebe, Roland, 2010-10-08 This title looks at the European model in historical perspective commonalities and intra European exchange and characteristics of the European social structure     The Contribution of the Social Sciences to the Energy Challenge United States. Congress. House. Committee on Science and Technology (2007). Subcommittee on Research and Science Education, 2007     Inclusions and Exclusions in European Societies Martin Kohli, Alison Woodward, 2004-01-14 European social development over the last century has been characterized by an increasing inclusiveness of people into the ever larger collectives of the nation state the European Union and categories of welfare entitlement Yet recent empirical data suggests that income gaps are growing and that within the physical borders of Europe there is a greater cultural and ethnic heterogeneity than ever before Effectively many of the processes of inclusion are accompanied by exclusion and the creation of new borders identities and rights Inclusions and Exclusions in European Societies features eminent contributors from across Europe addressing the problems of inclusion and exclusion as they affect European societies today Amongst the topics addressed are to what extent classical theory provides useful ways of reframing European societies which inequalities in work and welfare persist today and in what ways they have been transformed in processes of European integration how considerations of new identities and the pressure of globalisation affect the forms of inclusion and exclusion in Europe This book constitutes a unique stock taking of many of the central issues in European social integration or disintegration today     **European Integration as an Elite Process** Max Haller, 2008-05-05 Max Haller's impressive book presents an analysis of the process of European integration which keeps the relation between elites and citizens at the forefront A timely and original read this book will be a useful addition to the library of any political sociologist political scientist or scholar of European integration     Euroscepticism ,2016-08-29 The accelerated pace of European integration since the early 1990s has been accompanied by the emergence of increasingly prominent and multiform oppositions to the process The term Euroscepticism has appeared with growing frequency in a range of political media and academic discourses Yet the label is applied to a wide range of different and occasionally contradictory phenomena Although originally associated with an English exceptionalism relative to a Continental project of political and economic integration the term Euroscepticism is now also identified with a more general questioning of European Union institutions and policies which finds diverse expressions across the entire continent This volume of

European Studies brings together an interdisciplinary team of contributors to provide one of the first major multinational surveys of the growth of these Eurosceptic tendencies Individual chapters provide detailed examinations of developments in France Germany the Netherlands the United Kingdom Ireland Sweden Austria the Czech Republic Poland and Switzerland Overall the volume draws a distinctive portrait of contemporary Euroscepticism situating the phenomenon not only relative to the progress of European integration but also in relation to broader questions concerned with the evolution of party politics and the reshaping of national identities

Cosmopolitan Europe Ulrich Beck, Edgar Grande, 2014-11-05 Europe is Europe's last remaining realistic political utopia But Europe remains to be understood and conceptualized This historically unique form of international community cannot be explained in terms of the traditional concepts of politics and the state which remain trapped in the straightjacket of methodological nationalism Thus if we are to understand cosmopolitan Europe we must radically rethink the conventional categories of social and political analysis Just as the Peace of Westphalia brought the religious civil wars of the seventeenth century to an end through the separation of church and state so too the separation of state and nation represents the appropriate response to the horrors of the twentieth century And just as the secular state makes the exercise of different religions possible so too cosmopolitan Europe must guarantee the coexistence of different ethnic religious and political forms of life across national borders based on the principle of cosmopolitan tolerance The task the authors have set themselves in this book is nothing less than to rethink Europe as an idea and a reality It represents an attempt to understand the process of Europeanization in light of the theory of reflexive modernization and thereby to redefine it at both the theoretical and the political level This book completes Ulrich Beck's trilogy on cosmopolitan realism the volumes of which complement each other and can be read independently It is essential reading for anyone interested in the key social and political developments of our time

**The Walls between Conflict and Peace**, 2016-11-21 The Walls between Conflict and Peace discusses how walls are not merely static entities but are in constant flux subject to the movement of time Walls often begin life as a line marking a radical division but then become an area that is to say a border within which function civil and political societies national and supranational societies Such changes occur because over time cooperation between populations produces an active quest for peace which is therefore a peace in constant movement These are the concepts and lines of political development analysed in the book The first part of the book deals with political walls and how they evolve into borders or even disappear The second part discusses possible and actual walls between empires and also walls which may take shape within present day empires The third part analyses various ways of being of walls between and within states Berlin the Vatican State and Italy Cyprus Israel and Palestine Belfast Northern European Countries Gorizia and Nova Gorica the USA and Mexico In addition discussion centres on a possible new Iron Curtain between the two Mediterranean shores and new and different walls within the EU The last part of the book looks at how walls and borders change as a result of cooperation between the communities on either side of them The book takes on

particular relevance in the present circumstances of the proliferation of walls between empires and states and within single states but it also analyses processes of conflict and peace which come about as a result of walls Contributors are Eliezer Ben Rafael Sigal Ben Rafael Galanti Melania Gabriela Ciot Hastings Donnan Anneli Ute Gabanyi Alberto Gasparini Maria Hadjipavlou Max Haller Neil Jarman Thomas Lunden Domenico Mogavero Alejandro Palma Dennis Soden International Social Science Journal ,2009 Crossing Borders, Shifting Boundaries Franz Höllinger,Markus Hadler,2012-03 This book investigates the impact of social phenomena such as recently created nation states emerging international confederations cross national migration and contemporary global forces on ethnic and national identities in Europe and beyond The articles in this volume are written by leading international scholars based on a variety of theoretical and empirical approaches and offer a multifaceted discussion of the challenging issue of collective identities The Political Implications of Scientific Knowledge. EU Funded Policy Research and Immigration Policies in Italy Marco Boschele,2020-03-09 The work endeavours to assess the impact of EU funded research on both social science policy research and the policy making process at national level Attempts in the past to include the social sciences in the decision making process have raised questions about the validity of scientific knowledge in terms of its objectivity and in terms of its legitimizing element The starting point of this investigation therefore is the relationship between research and policy making Subsequently it considers the development of social science research in the field of immigration At EU level it analyses the changes in the dynamics of migration and how the EU research Framework Programmes have responded At national level it seeks to place the concept of citizenship and nationality law within the tradition of the social sciences in Italy and to understand how social science research has contributed to the development of policies The investigation also analyses the research policy approach at institutional level in Italy and the involvement of Italian universities and organizations in the FP6 and FP7 to determine if there takes place an internationalization Europeanization of social science research on immigration and or the construction of a non national discourse There is a formation of a discourse in the field of immigration research which follows the Commission directives but due to the Italian policy making process closed to academic and experts influence this discourse does not permeate the process of immigration policies making **The SAGE Handbook of European Union Politics** Knud Erik Jørgensen,Mark Pollack,Ben Rosamond,2007-01-03 This volume is one to which anyone trying to make sense of the EU of the early 21st century will return again and again A terrific line up that combines diverse talents from North America and Europe Few books of this kind could live up to the billing definitive benchmark but this one certainly does John Peterson University of Edinburgh A most useful book that can be highly recommended A strong analytical framework coupled with unparalleled coverage of the major issues of the political science research of the EU makes this volume a formidable tool for teaching and a significant input to new scholarly research It is both relatively sophisticated and very accessible to graduate students and advanced researchers The clear writing style and the richness of information presented will certainly make this book

interesting for non academic readers Igor Vidacak Institute for International Relations Zagreb Journal of Common Market Studies An admirably comprehensive source book for those interested in how the tools of political science inspire EU area studies The editors enlist leading researchers to synthesize the state of the art in their field of expertise The Handbook of European Union Politics will be an indispensable intellectual resource for researchers teachers and graduate students of the European Union Liesbet Hooghe University of North Carolina at Chapel Hill USA Presents an excellent overview of political science research on the EU It finds the right balance between establishing the state of the art and pointing the reader to theoretical diversity Highly recommended for advanced students and scholars looking for quick and solid orientation in a fragmented field and for new ideas for research Frank Schimmelfennig ETH Zurich Switzerland This is a milestone in the study of EU politics The authors include the most knowledgeable practitioners in the field and collectively they provide a comprehensive and highly competent overview of the state of theory and research on EU institutions politics and policies Fritz Scharpf Max Planck Institute for the Study of Societies Germany The European Union EU poses quite profound questions for scholars and students of the social and political sciences This benchmark handbook is designed to provide an authoritative state of the art guide to the scope of the field suitable for both established scholars and students of the EU reflect and contribute to the debates about the nature of the field of EU studies and EU politics in particular explore in detail the development of the many approaches to the study of EU politics Divided into four sections the Handbook focuses on theorizing European integration the EU as polity politics and policy making in the EU and the EU and the international system Its appeal will reside not only in its comprehensive and authoritative coverage of the field but also in the quality of its contributors and the diversity of theoretical and methodological approaches included The resulting volume is a must have for all scholars and advanced students of the EU and European integration *European External Action* Veit

Bachmann, 2017-02-24 *European External Action* provides a critical assessment of the practice of EU diplomacy in a key site of Africa European relations and the global development industry the Kenyan capital of Nairobi It analyses how the EU positions itself through its newly established diplomatic corps the European External Action Service EEAS and how it is perceived as a collective geopolitical actor by its external cooperation partners Going beyond existing studies on EU policy making in Brussels and African European relations more generally this book explores in a novel way the conduct of external relations and perceptions of the EU abroad Based on institutional ethnography within the EU Delegation in Nairobi and research affiliation with the University of Nairobi as well as interviews with leading individuals of Kenyan European interaction it analyses the practices processes and perceptions through which EU diplomacy is enacted and realised in a strategic node of global North South relations In light of the EU's claim as a key partner for developing countries and its ambition to be a major player in global politics *European External Action* thereby speaks not only to wider debates on the EU's role as a global and development actor but also provides new insights in the internal dynamics and the making of external

agency in and through EU diplomacy      *The Formation of Coalitions in the European Union* Maren Kreutler, 2015-03-26 This book investigates why European associations form interest coalitions which strategies these coalitions pursue to influence the EU institutions and how persistent they are over time In this context questions concerning the transparency of European decision making are approached The field of European energy policy serves as empirical background providing a valuable insight into a little researched area of European politics      **Education Research and Policy** Jennifer Ozga, Terri Seddon, Thomas S. Popkewitz, 2006 The 2006 edition of one of the most respected annual publication in education focusing on research and its effects on educational policy around the globe      Regulating Europe Giandomenico Majone, 2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators      **World Yearbook of Education 2006** Jenny Ozga, Terri Seddon, Thomas S. Popkewitz, 2013-01-11 This volume considers the ways in which educational research is being shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006 volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach

incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society
