## **Making Of Unborn Patient:**

The Making of the Unborn Patient Monica J. Casper, 1998 It is now possible for physicians to recognize that a pregnant woman's fetus is facing life threatening problems perform surgery on the fetus and if it survives return it to the woman's uterus to finish gestation Although fetal surgery has existed in various forms for three decades it is only just beginning to capture the public's imagination These still largely experimental procedures raise all types of medical political and ethical questions The Making of the Unborn Patient examines two important and connected events of the second half of the 20th century the emergence of fetal surgery as a new medical specialty and the debut of the unborn patient Fetal Therapy Mark D. Kilby, Anthony Johnson, Dick Oepkes, 2020-01-02 Covers the latest insights in fetal therapy and provides essential knowledge for maternal fetal and neonatology specialists *Looking Within* Deborah Blizzard, 2007-08-03 An ethnographic study of fetoscopy that considers both the broader cultural context of this high risk obstetrical procedure and the patient's individual experience In Looking Within Deborah Blizzard examines the high risk in utero surgery known as fetoscopy considering it as both cutting edge medical technology and as a sociocultural construction of patients their social networks and medical providers She looks at the way individual experiences shape these procedures and how fetoscopy affects individuals both patients and providers on a personal emotional level Based on an eleven month ethnographic study of the fetoscopy practice at a community based hospital and further interviews with former patients Looking Within offers a vivid picture of the sometimes conflicted often desperate and always emotional lives of those undergoing fetoscopy and challenges current assumptions about normal and appropriate pregnancy experiences To convey the complex reality of fetoscopy Blizzard draws from the experiences of the real patients she interviewed for the book to present the fictional case of Melinda and Joe taking them through the entire process from diagnosis to decision to outcome She then discusses the emergence of fetoscopy as an accepted form of high risk obstetrical care how fetoscopy programs are established at hospitals and why otherwise healthy women consent to surgery Blizzard examines the use of fetoscopy in single fetus and in twin pregnancies looking at how religion culture society and medical science inform any understanding of who or what is in utero a baby a tumor a mass She also discusses definitions of loss and success and the narratives patients and their social networks construct to make sense of them Looking Within will help physicians and nurses improve the development and delivery of fetoscopy procedures help patients understand this new technology and help scholars evaluate fetoscopy's bioethical social and cultural implications Handbook of Constructionist Research James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The

volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein

**Interrogating Pregnancy Loss: Feminist Writings on Abortion, Miscarriage and Stillbirth** R.M. Lind,2017-11-01 Whereas biomedical and feminist literature treat abortion miscarriage and stillbirth as differently conceptualized events this collection explores the connections between these three categories How have feminist debates and strategies around reproductive choice invigorated the cultural conversation about miscarriage and stillbirth How can we imagine more nuanced engagements with the spectrum of experiences that are at stake when a pregnancy ends And how can we effectively create a space where pregnant people contend with the ways that loss makes meaning for those who grieve and or celebrate the end of pregnancy This collection centres pregnancy loss as an embodied and social phenomenon within a framework that understands pregnancy as a process with no guaranteed outcomes Interrogating Pregnancy Loss considers pregnancy as an epistemic source one that has the capacity to reveal the limits of our collective assumptions about temporality expectation narrative and social legitimacy By interrogating loss this collection argues that the lessons learned from loss have the capacity to serve our collective understandings of both the expected and unexpected rhythms of social and reproductive life

**Dads, Kids, and Fitness** William Marsiglio,2016-10-31 Now more than ever American dads act as hands on caregivers who are devoted to keeping themselves and their families healthy Yet men are also disproportionately likely to neglect their own health care diets and exercise routines bad habits that they risk passing on to their children In Dads Kids and Fitness William Marsiglio challenges dads to become more health conscious in how they live and raise their children His conclusions are drawn not only from his revealing interviews with a diverse sample of dads and pediatric healthcare professionals but also from his own unique personal experiences as a teenage father who thirty one years later became a later life dad to a second son Marsiglio s research highlights the value of treating dads as central players in what he calls the social health matrix which can serve both healthy children and those with special needs He also outlines how schools healthcare facilities religious groups and

other organizations can help dads make a positive imprint on their families health fitness and well being Anchored in compelling life stories of joy tragedy and resilience Dads Kids and Fitness extends and deepens public conversation about health at a pivotal historical moment Its progressive message breathes new life into discussions about fathering manhood and health

**Cultural Technologies Within a Technological Culture** Christian Papilloud, Kornelia Hahn, 2008 While there is already a huge research literature marked by the sociology of technology the analyses gathered in this volume try to go beyond classical sociological approaches Rather the idea is that crossing traditional boundaries will lead to new results when it comes to understanding the effects of technologies This idea is based on the assumption that the implementation of technology in daily life is no longer directly associated with binaries such as technology nature object subject alienated and creative activities social determination and self determination material culture and social practices or interactive communication and mediated communication In fact technology gains social relevance as it is uniquely embedded into cultural practices So far this argument holds especially true for analyses within the sociology of culture ethnomethodology and related fields While these fields have primarily dealt with old technologies like communication skills body performances or trained craftsmanship their fundamental argument should be extended to the more advanced technologies and to the use of latest high tech

Icons of Life Lynn Morgan, 2009-09-09 Icons of Life tells the engrossing and provocative story of an early twentieth century undertaking the Carnegie Institution of Washington's project to collect thousands of embryos for scientific study Lynn M Morgan blends social analysis sleuthing and humor to trace the history of specimen collecting In the process she illuminates how a hundred year old scientific endeavor continues to be felt in today's fraught arena of maternal and fetal politics Until the embryo collecting project which she follows from the Johns Hopkins anatomy department through Baltimore founding homes and all the way to China most people had no idea what human embryos looked like But by the 1950s modern citizens saw in embryos an image of ourselves unborn and embryology had developed a biologically based story about how we came to be Morgan explains how dead specimens paradoxically became icons of life how embryos were generated as social artifacts separate from pregnant women and how a fetus thwarted Gertrude Stein's medical career By resurrecting a nearly forgotten scientific project Morgan sheds light on the roots of a modern origin story and raises the still controversial issue of how we decide what embryos mean

#### **The Handbook of Science and Technology Studies, fourth edition**

Ulrike Felt, Rayvon Fouche, Clark A. Miller, Laurel Smith-Doerr, 2016-12-23 The fourth edition of an authoritative overview with all new chapters that capture the state of the art in a rapidly growing field Science and Technology Studies STS is a flourishing interdisciplinary field that examines the transformative power of science and technology to arrange and rearrange contemporary societies The Handbook of Science and Technology Studies provides a comprehensive and authoritative overview of the field reviewing current research and major theoretical and methodological approaches in a way that is accessible to both new and established scholars from a range of disciplines This new edition sponsored by the Society

for Social Studies of Science is the fourth in a series of volumes that have defined the field of STS. It features 36 chapters each written for the fourth edition that capture the state of the art in a rich and rapidly growing field. One especially notable development is the increasing integration of feminist gender and postcolonial studies into the body of STS knowledge. The book covers methods and participatory practices in STS research mechanisms by which knowledge people and societies are coproduced, the design construction and use of material devices and infrastructures, the organization and governance of science and STS, and societal challenges including aging, agriculture, security, disasters, environmental justice, and climate change.

**Tiny You** Jennifer L. Holland, 2020 Caroline Bancroft History Prize 2021 Denver Public Library Armitage Jameson Prize 2021 Coalition of Western Women's History David J. Weber Prize 2021 Western History Association W. Turrentine Jackson Prize 2021 Western History Association. *Tiny You* tells the story of one of the most successful political movements of the twentieth century: the grassroots campaign against legalized abortion. While Americans have rapidly changed their minds about sex education, pornography, arts funding, gay teachers, and ultimately gay marriage, opposition to legalized abortion has only grown. As other socially conservative movements have lost young activists, the pro-life movement has successfully recruited more young people to its cause. Jennifer L. Holland explores why abortion dominates conservative politics like no other cultural issue. Looking at anti-abortion movements in four western states since the 1960s, turning to the fetal pins passed around church services, the graphic images exchanged between friends, and the fetus dolls given to children in school, she argues that activists made fetal life feel personal to many Americans. Pro-life activists persuaded people to see themselves in the pins, images, and dolls they held in their hands and made the fight against abortion the primary bread and butter issue for social conservatives. Holland ultimately demonstrates that the success of the pro-life movement lies in the borrowed logic and emotional power of leftist activism.

*Synthetic Planet* Monica J. Casper, 2013-11-12. This timely collection of original essays traces the migration of synthetic chemicals from the laboratory to the factory and then into the environment, bodies, and communities. Turning our attention to the impact these chemicals have on our ecosystems, human health, social organization, and political processes, the contributors break new ground by focusing on the production and distribution of these potentially hazardous agents themselves rather than just detailing their effects.

Rights, Duties and the Body Rosamund Scott, 2002-08-05. If a pregnant woman refuses medical treatment needed by the fetus, for instance for religious reasons, or conducts some aspect of her life in a way which risks fetal harm, there may arise an instance of maternal-fetal conflict. This is an unfortunate term since pregnant women are generally renowned for their self-sacrificing behaviour, but it may well reflect the reality of certain maternal choices and actions. Should a pregnant woman have the legal right to refuse medical treatment needed by the fetus, or should she owe it a legal duty of care which precludes her acting in ways which may harm it? Does the debate hinge simply upon the appropriateness or otherwise of legally compelling presumed moral obligations, or is it more complex than this? Indeed, what are a pregnant woman's moral obligations towards her fetus? In

England and in some US states courts have held that a pregnant woman has the right to refuse medical treatment needed by the fetus. In similar fashion the idea of a general maternal legal duty of care toward the fetus has been rejected most recently in Canada. The cases however leave the impression of an uncomfortable split between the ethics and the law as if the problem were entirely one of not legally enforcing presumed moral duties. The effect is both puzzling and polarising in that the cases leave unanswered as largely they must the huge question of a pregnant woman's moral rights and duties polarising in that the cases leave troubling tensions about a pregnant woman's rights in the face of fetal harm or death. The tendency is to deny these by ever more strongly asserting a woman's rights. In turn this encourages a reaction in favour of fetal rights one which is unlikely to attend to a woman's interests and difficulties in pregnancy. This could have serious legal repercussions for various instances of maternal fetal conflict including in those US states or other jurisdictions which have yet to address these issues. It might also increase the pressures on the issue of abortion. This book which seeks a way between these polarised positions tries to explain and justify a woman's moral and legal rights in pregnancy and at the same time to explore the extent of her moral duties toward the fetus. The aim is to resolve as far as possible the ethical legal and social tensions which undoubtedly surround this area. Innovatively in work on this issue and unusually in the field of medical law and ethics the author adopts a joint philosophical and legal approach directed to issues both of principle and policy revealing strong conceptual links between the ethics and the law. In addition to an ethical exploration of the maternal fetal relationship the author explores and analyses the relevant English American Canadian and sometimes Australian arguments from the law of treatment refusal abortion tort and rescue as well as relevant jurisprudence from the European Court of Human Rights. This important book breaks new ground and will be of great interest to academics in law and philosophy lawyers health professionals policy makers and students of medical law and ethics. It is rare to find a book which so skilfully combines legal and moral analysis of a controversial medical issue. Rosamund Scott has produced what is undoubtedly one of the finest pieces of medico legal writing of recent years. This is a clever human and immensely readable work. Alexander McCall Smith Professor of Medical Law University of Edinburgh. This book concerns one of the most personally agonizing and morally complex issues in medical ethics. It is a work of great philosophical sophistication combining breadth of vision with acute sensitivity to the nuances of women's experiences. It will soon become the standard work in philosophical legal and political debate on maternal fetal conflicts. Roger Crisp Uehiro Fellow and Tutor in Philosophy St Anne's College Oxford.

Parenting Culture Studies Ellie Lee, Jennie Bristow, Charlotte Faircloth, Jan Macvarish, 2015-12-04 Why have the minutiae of how parents raise their children become routine sources of public debate and policy making. This book provides in depth answers to these features drawing on a wide range of sources from sociology history anthropology and psychology covering developments in both Europe and North America.

**Cloning Wild Life** Carrie Friese, 2013-09-02 The natural world is marked by an ever increasing loss of varied habitats a growing number of species extinctions and a full range of new kinds of dilemmas posed by

global warming At the same time humans are also working to actively shape this natural world through contemporary bioscience and biotechnology In *Cloning Wild Life* Carrie Friese posits that cloned endangered animals in zoos sit at the apex of these two trends as humans seek a scientific solution to environmental crisis Often fraught with controversy cloning technologies Friese argues significantly affect our conceptualizations of and engagements with wildlife and nature By studying animals at different locations Friese explores the human practices surrounding the cloning of endangered animals She visits zoos the San Diego Zoological Park the Audubon Center in New Orleans and the Zoological Society of London to see cloning and related practices in action as well as attending academic and medical conferences and interviewing scientists conservationists and zookeepers involved in cloning Ultimately she concludes that the act of recalibrating nature through science is what most disturbs us about cloning animals in captivity revealing that debates over cloning become in the end a site of political struggle between different human groups Moreover Friese explores the implications of the social role that animals at the zoo play in the first place how they are viewed consumed and used by humans for our own needs A unique study uniting sociology and the study of science and technology *Cloning Wild Life* demonstrates just how much bioscience reproduces and changes our ideas about the meaning of life itself
