Maps Of The Holy Land

John R. Short

Maps Of The Holy Land:

Portraying the Land Rehav Rubin, 2018-05-22 The book presents and discusses a large corpus of Jewish maps of the Holy Land that were drawn by Jewish scholars from the 11th to the 20th century and thus fills a significant lacuna both in the history of cartography and in Jewish studies The maps depict the biblical borders of the Holy Land the allotments of the tribes and the forty years of wanderings in the desert Most of these maps are in Hebrew although there are several in Yiddish Ladino and in European languages The book focuses on four aspects it presents an up to date corpus of known maps of various types and genres it suggests a classification of these maps according to their source shape and content it presents and analyses the main topics that were depicted in the maps and it puts the maps in their historical and cultural contexts both within the Jewish world and the sphere of European cartography of their time The book is an innovative contribution to the fields of history of cartography and Jewish studies It is written for both professional readers and the general public The Hebrew edition 2014 won the Izhak Ben Zvi Prize

Imagining the Holy Land Burke O. Long, 2003 At the Chautauqua Institution in New York visitors could walk down Palestine Avenue to Palestine and a model of Jerusalem or along Morris Avenue to a scale model of the Jewish Tabernacle At the St Louis World's Fair of 1904 a replica of Ottoman Jerusalem covered eleven acres while today 300 miles to the southeast a seven story high Christ of the Ozarks stands above a modern recreation of the Holy Land set in the Arkansas hills

BOOK JACKET

Christian Maps of the Holy Land Pnina Arad, 2020 This book offers a way of reading maps of the Holy Land as visual imagery with religious connotations Through a corpus of representative examples created between the sixteenth and the nineteenth centuries it studies the maps as iconic imagery of an iconic landscape and analyses their strategies to manifest the spiritual quality of the biblical topography to support religious tenets and to construct and preserve cultural memory Maps of the Holy Land have thus far been studied with methodologies such as cartography and historical geography while the main question addressed was the reliability of the maps as cartographic documents Through another perspective and using the methodology of visual studies this book reveals that maps of the Holy Land constructed religious messages and were significant instruments through which different Christian cultures Byzantine Catholic Protestant and Greek Orthodox shaped their religious identities It does not seek to ascertain how the maps delivered geographical information but rather how they utilized the geographical information in formulating religious and cultural values

Through its examination of maps of the Holy Land this book thus explores both Christian visual culture and Christian spirituality throughout the centuries
