fastest ocean liners scientific advances dazzled the public with visions of a world transformed and the rich outdid one another with ostentatious displays of wealth Against this background Marconi races against incredible odds and relentless skepticism to perfect his invention the wireless a prime catalyst for the emergence of the world we know today Meanwhile Crippen the kindest of men nearly commits the perfect murder With his unparalleled narrative skills Erik Larson guides us through a relentlessly suspenseful chase over the waters of the North Atlantic Along the way he tells of a sad and tragic love affair that was described on the front pages of newspapers around the world a chief inspector who found himself strangely sympathetic to the killer and his lover and a driven and compelling inventor who transformed the way we communicate

Believing Scientists Quotes Fernando José Walsh, 2021-02-13

The main exponents of science are or have been profound believers in God the Creator of the universe In this work the reader will find hundreds of phrases emitted by many of them that speak of their faith convictions and of the relationship between faith and its science They are mostly recognized scientists who believe not only in one God but expressly in the God of the Bible With this book the author continues with the task begun in The Lord of the two books to revive an old but current idea that the Creator communicates with human beings through two books of His authorship Nature general revelation and the Bible special revelation The Creator has given two books to the mankind In one has shown His majesty in another His will The two books together inform us not only about the existence of God but also about His indescribable blessings for us It is a sin to sow among them weeds and discontent Mikhail Lomonosov 1711-1765 father of Russian science
