Spalding, 2011-12-29 *Trains Culture and Mobility Riding the Rails* goes beyond textual representations of rail travel to engage an impressive range of political sociological and urban theory Taken together these essays highlight the complexity of the modern experience of train mobility and its salient relation to a number of cultural discourses

Incorporating traditionally marginal areas of cultural production such as graffiti museums architecture or even plunging into the social experience of travel inside the traincar itself each essay constitutes an attempt to work from the act of riding the train toward questions of much larger significance Crisscrossing cultures from the New World and Old from East and West these essays share a common preoccupation with the way in which trains and railway networks have mapped and re-mapped the contours of both cities and states in the modern period Bringing together individual and large scale social practices this volume traces out the cultural implications of *Riding the Rails*

**Suicidal Honor** Doris G. Borgen, 2006-09-30 On September 13 1912 the day of Emperor Meiji's funeral General Nogi Maresuke committed ritual suicide by seppuku disembowelment It was an act of delayed atonement that paid a debt of honor incurred thirty five years earlier The revered military hero's wife joined in his act of junshi following one's lord into death The violence of their double suicide shocked the nation What had impelled the general and his wife on the threshold of a new era to resort so drastically so dramatically to this forbidden anachronistic practice The nation was divided There were those who saw the suicides as a heroic affirmation of the samurai code others found them a cause for embarrassment a sign that Japan had not yet crossed the cultural line separating tradition from modernity While acknowledging the nation's sharply divided reaction to the Nogi's junshi as a useful indicator of the event's seismic impact on Japanese culture Doris G Borgen in the first half of her book demonstrates that the deeper significance of Nogi's action must be sought in his personal history enmeshed as it was in the tumultuous politics of the Meiji period *Suicidal Honor* traces Nogi's military career and personal travail through the armed struggles of the collapsing shogunate and through the two wars of imperial conquest during which Nogi played a significant role the Sino Japanese War 1894 1895 and the Russo Japanese War 1904 1905 It also probes beneath the political to explore the religious origins of ritual self sacrifice in cultures as different as ancient Rome and today's Nigeria Seen in this context Nogi's death was homage to the divine emperor But what was the significance of Nogi's waiting thirty five years before he offered himself as a human sacrifice to a dead rather than living deity To answer this question Borgen delves deeply and with great insight into the story of Nogi's conflicted career as a military hero who longed to be a peaceful man of letters In the second half of *Suicidal Honor* Borgen turns to the extraordinary influence of the Nogi's deaths on two of Japan's greatest writers Mori Utagaki and Natsume Soseki Utagaki's historical fiction written in the immediate aftermath of his friend's junshi is a profound meditation on the significance of ritual suicide in a time of historical transition Stories such as *The Sakai Incident* *Sakai jiken* appear in a new light and with greatly enhanced resonance in Borgen's interpretation In Soseki's masterpiece *Kokoro Sensei* the protagonist refers to the emperor's death and his general's junshi before taking his own life Scholars routinely mention these references but Borgen demonstrates convincingly the uncanny ways in which Soseki's agonized response to Nogi's suicide structures the entire novel By exploring the historical and literary legacies of Nogi Utagaki and Soseki from an interdisciplinary perspective *Suicidal Honor* illuminates Japan's prolonged and painful transition from the idealized heroic world of samurai culture to the mundane anxieties of modernity It is a study that will fascinate specialists in the fields of Japanese literature history and religion and anyone seeking a deeper understanding of Japan's warrior culture

**Maekawa Kunio and the Emergence of Japanese Modernist Architecture** Jonathan M. Reynolds, 2001-07-19 Japanese architecture's commanding presence on the world

stage can be traced to the struggles of earlier generations of Japan's modernist architects. This first book-length study of Maekawa Kunio (1905–1986) focuses on one of the most distinctive leaders in Japan's modernist architectural community. In a career spanning the 1930s to the 1980s, Maekawa's work and critical writing put him in the vanguard of the Japanese architectural profession. Jonathan Reynolds illuminates Maekawa's role as a bridge between prewar and postwar architecture in Japan, focusing particularly on how he influenced modernism's ambivalence regarding tradition and contemporary practice and the importance of technology in modernist design and ideology. Maekawa studied architecture at the prestigious Tokyo Imperial University before moving to Paris in 1928 to work with Le Corbusier. The latter experience had a powerful impact on Maekawa; he became an advocate for Le Corbusier and modernism when he returned to Japan two years later. Throughout his career, Maekawa designed residential, commercial, and government buildings in Japan and abroad. He became particularly well known internationally for his approach to public architecture, especially museums and public spaces such as the Tokyo Metropolitan Festival Hall. These projects illustrated the principles that earned Maekawa the respect and admiration of architects the world over. Carefully researched with numerous illustrations that complement discussions of Maekawa's principal projects, Reynolds's book will be welcomed in the fields of architecture and design. It will also attract readers interested in twentieth-century Japan for, in addition to highlighting Maekawa's architectural career, Reynolds portrays the broader cultural context within which Maekawa and other Japanese architects and artists sought to be heard and recognized.

**Faith and Power in Japanese Buddhist Art, 1600–2005** Patricia J. Graham, 2007-09-30. *Faith and Power in Japanese Buddhist Art* explores the transformation of Buddhism from the premodern to the contemporary era in Japan and the central role its visual culture has played in this transformation. Although Buddhism is generally regarded as peripheral to modern Japanese society, this book demonstrates otherwise. Its chapters elucidate the thread of change over time in the practice of Buddhism as revealed in temple worship halls and other sites of devotion and in imagery representing the religion's most popular deities and religious practices. It also introduces the work of modern and contemporary artists who are not generally associated with institutional Buddhism and its canonical visual requirements but whose faith inspires their art. The author makes a persuasive argument that the neglect of these materials by scholars results from erroneous presumptions about the aesthetic superiority of early Japanese Buddhist artifacts and an asserted decline in the institutional power of the religion after the sixteenth century. She demonstrates that recent works constitute a significant contribution to the history of Japanese art and architecture, providing evidence of Buddhism's compelling presence at all levels of Japanese society and its evolution in response to the needs of new generations of supporters. **Japan Now**, 1998. **Constructing Japan** Beate Loeffler, 2025-09-25. The influence of Japanese art and culture on art in late 19th-century Europe and America through collections of objects and knowledge transfer is already recognised. However, the research in this field often neglects architecture. This study takes a new approach, placing architecture at the centre. Through in-depth analysis of contemporary

textual and visual sources Beate Löffler shows how western actors from different backgrounds interpreted Japanese architecture as they experienced it either face to face or via texts and images It unveils a complex process of appropriation and rejection of claim to interpretive sovereignty and fascination with the foreign that led to both new knowledge and cultural clichés

**Contemporary Japanese Architecture** James Steele, 2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture

**The Culture of Copying in Japan** Rupert Cox, 2007-09-12 This book challenges the perception of Japan as a copying culture through a series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries

**Technology and the Culture of Progress in Meiji Japan** David G. Wittner, 2007-11-09 In this book David Wittner situates Japan's Meiji Era experience of technology transfer and industrial modernization within the realm of culture politics and symbolism examining how nineteenth century beliefs in civilization and enlightenment influenced the process of technological choice Through case studies of the iron and silk industries Wittner argues that the Meiji government's guiding principle was not simply economic development or providing a technical model for private industry as is commonly claimed Choice of technique was based on the ability of a technological artifact to import Western civilization to Japan Meiji officials technological choices were firmly situated within perceptions of authority modernity and their varying political agendas Technological artifacts could also be used as instruments of political legitimization By late the Meiji Era the former icons of Western civilization had been transformed into the symbols of Japanese industrial and military might A fresh and engaging re-examination of Japanese industrialization within the larger framework of the Meiji Era this book will appeal to scholars and students of science technology and society as well as Japanese history and culture

**Culture, Power and Politics in Treaty-Port Japan, 1854-1899** James Hoare, 2025-10-01 This two volume collection supported by an in depth introduction that addresses origins actuality endgame and afterlife brings together for the first time contemporary documentation and more recent scholarship to give a broad picture of Japan's Treaty Ports and their inhabitants at work and play in the second half of the nineteenth century The material selected shows how the ports existence and the Japanese struggle to end their special status impacted on many aspects of modern Japan

beyond their primary role as trading stations Compared with their counterparts in China the Japanese treaty ports cast a small shadow They were far fewer only four really mattered and lasted for just under fifty years while the Chinese ports made their centenary Yet the Japanese ports were important The thriving modern cities of Yokohama and Kobe had their origins as treaty ports Nagasaki a major centre of foreign trade since at least the sixteenth century may not have owed so much to its treaty port status but it was a factor in its modern development Spectacles of Authenticity Hsuan Tsen,2011 In the late nineteenth and early twentieth centuries America and Japan were in the process of establishing their positions as powers in a world dominated by Western Europe The two nations with unconnected histories and cultures found themselves in momentary sympathy as they embarked on their first forays into military imperialism expanded their trade and constructed civic institutions intended to compete with those of Europe It was during this period that mass entertainments developed and began circulating across national borders and drawing on tourist practices helped create a universal visual culture which coexisted with local particularities This dissertation undertakes a study of Japanese and American shared visual culture and modern entertainments with the goal of nuancing current scholarship on East West exchanges and expanding the definition of modernity Three modern phenomena panoramas World s Fairs and film form the core of my three main chapters and describe a process of appropriation assimilation and collaboration through their movements from Europe across America to Japan and ending with a return to America Many scholars have observed that Americans viewed Japan as a confusing cultural other with a baffling skill at appearing modern This dissertation begins with the premise that Japan was modern and re examines American and Japanese cultural exchanges from this position with the aim of shifting the paradigms of modernity and modern visuality **Opening a Window to the West** Peter Enns,2014-01-01 The first book length study of Kobe s Foreign Concession Opening a Window to the West situates Kobe within the larger pattern of globalization occurring throughout East Asia in the nineteenth century
