

1001 Questions Answered About Birds

Alan D. Cruickshank and Helen G. Cruickshank

How fast do birds fly? What are winter migrants? When do birds reach breeding age? Do all birds mate annually? Why do birds sing? The answers to these and over a thousand other questions make up this vastly informative yet compact and entertaining volume about birds. The book gives you the background you need to use field guides intelligently and explains many important and interesting facts about the life of birds.

Chapters range from the classification and distribution of birds, bird flight and the migration of birds to the size and numbers of birds, birdbanding, attracting birds to the garden, bird conservation, birds in mythology, tradition and history, and domestication, odd facts and adaptability of birds. Four extensive, central chapters cover the internal bird—skeletons, muscles, brain, heart, how birds breathe, how birds digest their food, metabolism, etc.; the exterior of birds—feathers, skin, wings, tails, bills, legs and feet; the senses of birds—eyes, sense of smell, hearing, sense of touch, taste; and the annual cycle—bird song, courtship and formation of the pair, nests and eggs, the embryo, incubation, hatching and more. 58 line drawings and 16 photographs illustrate the text.

The work of two of the best-known American ornithologists, Allan and Helen Cruickshank, this book is ideal for casual reading and also readily available for reference through the use of an excellent index. Both beginning birders and serious bird enthusiasts will find it an extremely valuable book.

Unabridged, unaltered republication of the original (1958) edition. 1001 questions and answers. Bibliography. Index. 58 line drawings and 16 photographs. xi + 291pp. of text. 5½ x 8½. Paperbound.
