OPTIKA '98 Gábor Lupkovics, András Podmaniczky, 1998 A collection of papers from the 5th Congress on Modern Optics They are divided into nine sessions which include lasers and related devices nonlinear optics materials processing and optical information processing *Lasers* Charles Blain, 2002 Developments in lasers continue to enable progress in many areas such as eye surgery the recording industry and dozens of others This book presents citations from the book literature for the last 25 years and groups them for ease of access which is also provided by subject author and titles indexes Official Summary of Security Transactions and Holdings Reported to the Securities and Exchange Commission Under the Securities Exchange Act of 1934 and the Public Utility Holding Company Act of 1935, 1999 *Official Summary of Security Transactions and Holdings* United States. Securities and Exchange Commission, 1999-03 **Soviet Researches on Luminescence** D. V. Skobel'syn, 2013-11-11 It is well known that luminescence is the term used to describe the excess radiation from a body over and above the thermal radiation and persisting for a time which greatly exceeds the period of a light vibration The first half of this definition proposed by Wiedemann distinguishes luminescence from equilibrium thermal radiation the second half introduced by Vavilov distinguishes luminescence from various forms of scattering and from induced radiation such as Vavilov Cherenkov radiation etc Distinctions are made between photo cathode x ray and other forms of luminescence depending on how energy is introduced into the luminescent body Electroluminescence is the name given to that form of fluorescence in which the radiating body receives energy directly from an electric field It should be noted that luminescence under the influence of cathode rays is not called electroluminescence because in this case the necessary energy is not supplied directly from the electric field to the radiating body but by means of extraneous electrons Electroluminescence of gaseous bodies radiation from a gas discharge has been known for a long time and is widely used in luminescent lamps and gas discharge tubes In 1923 Losev 1J observed radiation from silicon carbide crystals when a voltage was applied to them directly *New Times*, 1998 *Proceedings of the International Conference on Lasers*, 1999 *Yield of Radioluminescence of Organic Matters* Z. A. Chizhikova, 1963 Diffractional Optics of Millimetre Waves I.V. Minin, O.V. Minin, 2004-09-01 Diffractional Optics of Millimetre Waves combines those elements of diffraction theory normally associated with optics including Gaussian beams lenses and mirrors and extends them into the micro and millimetre wavelength range In this regime there are a number of applications in devices such as automobile proximity sensors satellite TV receiving antennae and non destructive testing systems Researchers working in these areas would benefit from greater understanding of the diffraction phenomena involved A translated and updated version of the authors book Diffraction Quasioptics this book will present results formerly unavailable in the general literature **InfoWorld**, 1999-03-29 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Theory of Molecular Excitons** A. originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume
