Body and Building George Dodds, Robert Tavernor, Joseph Rykwert, 2002 Essays on the changing relationship of the human body and architecture

Helen Chadwick Stephen Walker, 2013-09-20 Highly respected by her peers and hugely influential on the subsequent generation of artists the British artist Helen Chadwick produced a wideranging body of work in a variety of media which shifted from early institutional and architectural critique to operatic installations and to photographic projects and sculptures Stephen Walker looks behind this apparent variety identifying a consistent range of interests ranging from classical Greek through to sub particle physics that accompanied and supported Chadwick's realised work Although she enjoyed significant critical attention in her lifetime this is the first study to explore the rich archive which informed her oeuvre Critical of the impact that limiting political philosophical and scientific constructions have on identity Chadwick's work can offer insights

into the relationship between body and space self and world art and science artifice and nature theory and practice the creative self and the creative process Dismantling and reassembling her ideas this book combines a close reading of Chadwick's notebooks and research with broader speculation regarding their ongoing relevance for artistic and architectural work today Brill's Companion to the Reception of Vitruvius, 2024-03-18 As a master of his discipline the ancient Roman architect Vitruvius has been read widely for centuries This collection of essays by an international team of experts investigates his influence and reception in ideas artistic forms and building practices from antiquity to modern day The stories of influence told in these pages suggest that it is the unbridgeable gulf between the Vitruvian text and surviving monuments that makes reading the Ten Books so endlessly compelling The contributors to this volume offer their own original readings which are organized into the five sections transmission translation reception practice and Vitruvian topics

Architects and Intellectual Culture in Post-Restoration England Matthew Walker, 2017-10-13 Architects Builders and Intellectual Culture in Restoration England charts the moment when well educated well resourced English intellectuals first became interested in classical architecture in substantial numbers This occurred after the Restoration of the Monarchy in 1660 and involved people such as John Evelyn Robert Hooke Sir Christopher Wren and Roger North Matthew Walker explores how these figures treated architecture as a subject of intellectual enquiry either as writers as designers of buildings or as both In four substantial chapters it looks at how the architect was defined as a major intellectual figure how architects acquired material that allowed them to define themselves as intellectually competent architects how intellectual writers in the period handled knowledge of ancient architecture in their writing and how the design process in architecture was conceived of in theoretical writing at the time In all Walker shows that the key to understanding English architectural culture at the time is to understand how architecture was handled as knowledge and how architects were conceived of as collectors and producers of such knowledge He also makes the claim that architecture was treated as an extremely serious and important area of intellectual enquiry the result of which was that by the turn of the eighteenth century architects and architectural writers could count themselves amongst England's intellectual and cultural elite **The Architect's Brain**

Harry Francis Mallgrave, 2011-05-25 The Architect's Brain Neuroscience Creativity and Architecture is the first book to consider the relationship between the neurosciences and architecture offering a compelling and provocative study in the field of architectural theory Explores various moments of architectural thought over the last 500 years as a cognitive manifestation of philosophical psychological and physiological theory Looks at architectural thought through the lens of the remarkable insights of contemporary neuroscience particularly as they have advanced within the last decade Demonstrates the neurological justification for some very timeless architectural ideas from the multisensory nature of the architectural experience to the essential relationship of ambiguity and metaphor to creative thinking *Architecture in Words* Louise Pelletier, 2006-09-27 This innovative title provides an in depth interdisciplinary study of the influence of theatre and fiction in

defining character in eighteenth century architecture pushing current architects to rediscover the communicative aspects of their work

Germain Boffrand Caroline van Eck, 2017-10-03 This title was first published in 2003 Germain Boffrand was one of the great French architects of the early eighteenth century His work encompassed not only the design of town and country houses for the wealthy but also mines bridges and hospitals His *Livre d'Architecture* is one of the most original books on architecture ever written in France Taking the *Art of Poetry* by the Latin poet Horace as its starting point it developed an aesthetic of architecture focused on character style and the emotional impact of a building that influenced Blondel Le Camus de Mezieres and Soane and is still central to contemporary debate about the nature and meaning of architecture Translated for the first time by David Britt Boffrand's text is here accompanied by an extensive introduction and notes by Caroline van Eck who situates Boffrand within the main issues of eighteenth century architectural aesthetics Beautifully illustrated including all the pictures chosen by Boffrand for his original publication this book is an invaluable tool for teaching the history of architectural theory and an essential work for any architectural library Germain Boffrand is published with the assistance of the Getty Foundation

Building Practice in the Dutch East Indies David Hutama Setiadi, 2022-12-30 This book reveals the epistemic imposition of architectural ideas and practices by colonists from the Netherlands in the Dutch East Indies from the late 19th century onwards exploring the ways in which this came to shape the profession up to the present day in what is now known as Indonesia The author investigates the scope of these interventions by Dutch colonial agents in relation to existing Javanese building practices pursuing two main lines of enquiry The first is to examine the methods of dissemination of Dutch taught technical knowledge and skills across the Dutch East Indies The second is to scrutinise the effects of this dissemination upon the formation of architectural knowledge and practice within the colony Throughout this book the argument is made that what took place in architecture in the Dutch East Indies involved a process of disseminating building knowledge as a form of epistemic imposition upon the indigenous citizens of the colony in other words as an effective instrument of Dutch colonial power This book will be of interest to architecture academics and students interested in developing a broader global understanding of architecture especially those interested in decolonising the teaching of architectural history and theory

Drawing Architecture and the Urban Sam Jacoby, 2016-04-25 Drawing is an important means to analyse information and develop rigorous arguments both conceptually and visually Going beyond the how to drawing manual this book provides an instrumental approach to drawing especially computer generated drawings it outlines how drawings should be used to convey clear and analytical information in the process of design as well as the communication and discussion of a project In depth examples are provided how to communicate effectively The final section demonstrates how to transform case studies directly connecting an analytical approach with the design process

Ornament Antoine Picon, 2014-05-29 Once condemned by Modernism and compared to a crime by Adolf Loos ornament has made a spectacular return in contemporary architecture This is typified by the works of well known architects such as

Herzog de Meuron Sauerbruch Hutton Farshid Moussavi Architecture and OMA There is no doubt that these new ornamental tendencies are inseparable from innovations in computer technology The proliferation of developments in design software has enabled architects to experiment afresh with texture colour pattern and topology Though inextricably linked with digital tools and culture Antoine Picon argues that some significant traits in ornament persist from earlier Western architectural traditions These he defines as the subjective the human interaction that ornament requires in both its production and its reception and the political Contrary to the message conveyed by the founding fathers of modern architecture traditional ornament was not meant only for pleasure It conveyed vital information about the designation of buildings as well as about the rank of their owners As such it participated in the expression of social values hierarchies and order By bringing previous traditions in ornament under scrutiny Picon makes us question the political issues at stake in today's ornamental revival What does it tell us about present day culture Why are we presently so fearful of meaning in architecture Could it be that by steering so vehemently away from symbolism contemporary architecture is evading any explicit contribution to collective values

Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand, 2000-01-01 Jean Nicolas Louis Durand 1760 1834 regarded the Précis of the Lectures on Architecture 1802 5 and its companion volume the Graphic Portion 1821 as both a basic course for future civil engineers and a treatise Focusing the practice of architecture on utilitarian and economic values he assailed the rationale behind classical architectural training beauty proportionality and symbolism His formal systematization of plans elevations and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed His emphasis on pragmatic values to the exclusion of metaphysical concerns represented architecture as a closed system that subjected its own formal language to logical processes Now published in English for the first time the Précis and the Graphic Portion are classics of architectural education

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Betticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of *techné* with a dual commitment to *fabrica* e *ratio* with a

productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form
