Chapitre du livre du Dr David Fortin

Le cerveau une galaxie dans votre tête

Tout ce que nous savons sur le cerveau simplifié et vulgarisé¹.

Dr. David Fortin est neurochirurgien, neuro-oncologue et professeur titulaire à la Faculté de médecine et des sciences de la santé de l'Université de Sherbrooke. Il dirige le laboratoire de recherche sur les tumeurs cérébrales, et a plus de 125 publications et 150 résumés scientifiques à son actif. Après ses études de médecine et sa formation en neurochirurgie, il a complété sa formation en neuro-oncologie à l'Université Western Ontario puis à l'Oregon Health & Science University. Il s'est mérité de nombreuses distinctions dont le prix César Galéano du meilleur professeur de la Faculté de médecine de 2005 à 2010, le prix du rayonnement en recherche du Centre de recherche clinique du CHUS en 2010. Il s'est vu décerner le prix du médecin spécialiste québécois de l'année 2018 par le Collège royal des médecins et chirurgiens du Canada.

Au fil de cet ouvrage, nous avons mis en place les pièces d'information nous permettant ultimement d'avoir une discussion à propos des différentes fonctions cognitives nous animant. Or peut-être avez-vous remarqué qu'à aucun moment nous n'avons évoqué le mot *conscience*. Comment même est-ce possible de parler du cerveau sans écrire une seule fois le mot *conscience* dans l'ouvrage? La raison est à la fois simple, surprenante, décevante, voire effrayante : en réalité, nous ne savons pas vraiment ce qu'est la conscience. Il y a des experts en neuroscience, il y a des experts en neuro-anatomie, en neurophysiologie, mais il n'y a *aucun* véritable expert en conscience. Toute prétention contraire est [...] trompeuse. En fait, il n'existe aucune définition de ce qu'est la conscience qui fasse consensus. L'être humain réfléchit sur lui-même depuis le crépuscule de son existence, et ne peut toujours donner une définition de ce qu'est la conscience...
[...]

De manière simplifiée, la conscience est tout ce dont vous faites l'expérience. La joie à entendre une mélodie, l'amour que vous ressentez envers quelqu'un, la douleur de l'échec ou la honte d'un affront, la douleur physique ressentie lors d'une blessure, le plaisir du sexe ou le sentiment de bien-être après l'exercice physique. Mais aussi la crainte d'être malade, de mourir, et l'apprehension de disparaître et de ne pas laisser de traces après votre décès. Ainsi, l'introspection trouve aussi une place prépondérante dans le concept de la conscience. La sensation d'avoir une existence qui nous est propre, une réflexion sur cette dernière et l'impact qu'elle peut avoir sur le construit extérieur à notre personne en font partie.

Philosophie De L'esprit Et Sciences Du Cerveau:

Philosophie de l'esprit et sciences du cerveau Jean-Pierre Changeux, 1991 De nos jours existe un extraordinaire engouement pour les sciences du cerveau qui captivent de plus en plus de penseurs Des philosophes américains encouragent leurs pairs à s'initier aux neurosciences Des hommes de science conscients des enjeux métaphysiques inhérents à leur domaine invitent les philosophes à découvrir les faits nouveaux apportés par les découvertes sur le système nerveux Il paraît donc légitime que le philosophe soit concerné par les développements récents des sciences du cerveau Par la diversité des points de vue et des perspectives le présent recueil souhaite contribuer à éclairer dans la mesure du possible quelquesunes des questions inhérentes aux interactions entre la philosophie et les neurosciences *Philosophie, terminales L, ES, S*

Self-Identity and Powerlessness Alice

Koubová, 2013-05-30 In *Self Identity and Powerlessness* Alice Koubová proposes a conception of human existence that does not essentially depend on the definition of self identity The author shows that the philosophical stress on human identity fails to grasp essential aspects of human existence By emphasizing the moments of Dasein's powerlessness in Heidegger's fundamental ontology she develops in her analysis of various philosophers literary examples and social psychology an original phenomenology of alternation of existence and affair How necessary is identity for thinking Are we capable of philosophical thought even when we have neither ourselves nor the world under our full control Is it possible to relax become powerless and yet think precisely These questions are to be answered in this book *Metaphysics and the Sciences in*

Nineteenth-Century France, 2025-07-22 This volume is the first systematic study of the style of reasoning specific to the field of philosophy in nineteenth century France The chapters analyze the often dispersed responses to the fundamental question of the division of the sciences based on the reciprocal relationships of inclusion or exclusion of adversity or sorority between metaphysics and the positive sciences In line with the arrhythmic progress of the different forms of knowledge these responses renew the Condillacian criticisms of the Cartesian order of the relationships between metaphysics and physics Between a pronounced divorce and a successful marriage this volume traces the philosophical history of the various attempts at divorce or union which as the century progressed resulted in original hybridizations that aspired to define a new and ever problematic French philosophy

Sous-tendu par l'idée que l'esprit-cerveau est une entité double face, il montre l'apport considérable des neurosciences à la philosophie de l'esprit. Travers l'étude critique des théories de nombreux penseurs tels que Churchland, Nagel, Dennett, Damasio, Edelman, Sperry, Shallice, Zeki, Lauter, procédant également une mise en perspective historique des thèmes fondamentaux de la neurophysiologie et de la neuropsychologie. Retraçant l'essor difficile et controversé d'une science de l'esprit-cerveau au XIXe siècle et au XXe siècle chez Bergson, Ribot, James. Ainsi, il nous fait mieux saisir les enjeux des débats philosophiques qui animent aujourd'hui les sciences cognitives.

Top Secret Révélations d'un Univers étonnant 1ère partie Marc Wittmann, Marc Wittmann, 2011-01-04 Une étude complète réalisée depuis plusieurs années par Marc Wittmann devant un jour mener au voyage rapide dans l'espace-temps à la vie éternelle. Sciences, philosophie, cosmologie, médecine, autant de grandes catégories que vous retrouverez dans ces études intéressantes.

Les mondes darwiniens Thomas Heams, 2018-03-29 Une étude approfondie des théories darwiniennes et de leurs différentes implications. La théorie darwinienne de l'évolution reste le paradigme dominant de la biologie et de la philosophie. Elle prouve sa force condit et sa puissance explicative dans de très nombreux domaines. Pourtant, dans cet ouvrage, pas de question d'un fatalisme de Darwin, mais d'un examen attentif du domaine de validité métaphysique et expérimental des idées du savant naturaliste. Ainsi, ce livre expose leurs multiples ramifications en sciences de la vie, en sciences humaines et en philosophie. À cette fin, cinquante auteurs explorent les grandes notions qui irriguent les sciences de l'évolution, ainsi que de très nombreux chantiers des savoirs biologiques contemporains. Ils considèrent les tentatives d'exportation du mode de pensée darwinien propos de problèmes autrefois hors de son champ d'action : physique, psychologie, économie, etc. Les questions du créationnisme et de l'enseignement viennent clore cet ouvrage.

Dans ce second volume des "Mondes darwiniens", replongez-vous dans la pensée de l'illustre savant et dans l'examen approfondi de celle-ci.

EXTRAIT

La vraie difficulté réside dans la quasi-impossibilité d'aborder la question des origines et de l'évolution de la ligne humaine sans que ne se invite sous une forme ou une autre des questions de sens spiritualistes finalistes ou eschatologiques sous le terme rarement défini et donc polysémique de "hominisation". C'est un immense paradoxe pour la philosophie anthropologique puisque l'intérêt pour ne pas dire la passion pour cette grande question qui justement manque de ce besoin scolaire de comprendre notre place dans l'univers ce qui a suscité une fascinante diversité de récits oraux et écrits sur l'émergence du cosmos et de l'Homme qu'on appelle les cosmogonies. C'est incontestablement une caractéristique de l'Homme.

PROPOS DES AUTEURS

Les "mondes darwiniens" est le résultat de la collaboration de cinquante auteurs sous la direction de Thomas Heams, Philippe Huneman, Guillaume Lecointre et Marc Silberstein.
