Philosophie In Synthetischer Absicht Synthesis In Mind:

Dieter Henrich and Contemporary Philosophy Dieter Freundlieb, 2017-09-29 Dieter Henrich is one of the most respected and frequently cited philosophers in Germany today His extensive and highly innovative studies of German Idealism and his systematic analyses of subjectivity have significantly impacted on advanced German philosophical and theological debates Dieter Henrich and Contemporary Philosophy presents a comprehensive analysis of Henrich's work on subjectivity evaluating it in the context of contemporary debates in both continental and analytic traditions Familiarising the non German reader with an important development in contemporary German philosophy this book explains the significance of subjectivity for any philosophy that attempts to offer existential orientation and contrasts competing conceptions in analytic philosophy and in the social philosophy of Juergen Habermas Presenting Henrich's philosophy of subjectivity as a credible alternative to analytic philosophy of mind and a radical challenge to Heideggerian Habermasian neo pragmatist and postmodern positions Freundlieb argues that a philosophy of the kind developed by Henrich can regain the cultural significance philosophical thinking once possessed Dieter Freundlieb is Senior Lecturer in the School of Humanities Griffith University Australia

Kant's Theory of Mind Karl Ameriks, 2000 This text presents a survey and evaluation of Kant's theory of mind It focuses on Kant's discussion of the Paralogisms in the Critique of Pure Reason and examines how the themes raised there are treated in the rest of Kant's writings

The Kantian Subject Fernando M. F. Silva, Luigi Caranti, 2023-11-30 This book presents a critical reconsideration of the Kantian cognitive and practical subject Special attention is devoted to highlighting the complex relation between subjectivity as it is presented in the three critiques and the way in which it is construed in other writings in particular the Anthropology While for Kant our cognitive apparatus and the structure of our will are common to all humans the anthropological subject reveals degrees of variation depending on a myriad of external circumstances that pose a challenge to the unity of Kant's account and await theoretical solutions The chapters collected in the volume delve into how the different shapes of human nature are not unrelated They explore how and why different Kantian subjects are closely connected at their core if not entirely unified The notions of personality humanity and citizenship will serve as leading threads for the reconstruction of this possible underlying unity An engaging read that promises to deepen our understanding of human nature the volume will be of great interest to scholars and researchers of philosophy politics psychology social anthropology ethics and epistemology

Understanding Wittgenstein's On Certainty D. Moyal-Sharrock, 2004-04-19 This book sheds unprecedented light on Wittgenstein's third masterpiece On Certainty clarifying his thoughts on basic beliefs and rebuttal of scepticism As an introduction and commentary on Wittgenstein's final major philosophical work Moyal Sharrock's book will prove an indispensable guide to the student scholar and general reader

Readings of Wittgenstein's On Certainty D. Moyal-Sharrock, W. Brenner, 2005-05-18 This is the first collection of papers devoted to Ludwig Wittgenstein's cryptic but brilliant On Certainty This work Wittgenstein's last extends the thinking of his

earlier better known writings and in so doing makes the most important contribution to epistemology since Kant's Critique of Pure Reason a claim the essays in this volume help to demonstrate The essays have been grouped under four headings reflecting current approaches to the work the Framework Transcendental Epistemic and Therapeutic readings *Husserl's Phenomenology of Intersubjectivity* Frode Kjosavik, Christian Beyer, Christel Fricke, 2018-12-07 This collection examines the instrumental role of intersubjectivity in Husserl's philosophy and explores the potential for developing novel ways of addressing and resolving contemporary philosophical issues on that basis This is the first time Iso Kern offers an extensive overview of this rich field of inquiry for an English speaking audience Guided by his overview the remaining articles present new approaches to a range of topics and problems that go to the heart of its core theme of intersubjectivity and methodology Specific topics covered include intersubjectivity and empathy intersubjectivity in meaning and communication intersubjectivity pertaining to collective forms of intentionality and extended forms of embodiment intersubjectivity as constitutive of normality and finally the central role of intersubjectivity in the sciences The authors perspectives are strongly influenced by Husserl's own methodological concerns and problem awareness and are formed with a view to applicability in current debates be it within general epistemology analytic philosophy of language philosophy of mind meta ethics or philosophy of science With contributions written by leading Husserl scholars from across the Analytic and Continental traditions Husserl's Phenomenology of Intersubjectivity is a clear and accessible resource for scholars and advanced students interested in Husserl's phenomenology and the relevance of intersubjectivity to philosophy sociology and psychology

Minimal Theologies Hent de Vries, 2019-12-01 Originally published in in 2004 What at this historical moment after Auschwitz still remains of the questions traditionally asked by theology What now is theology's minimal degree This magisterial study the first extended comparison of the writings of Theodor W Adorno and Emmanuel Levinas explores remnants and echoes of religious forms in these thinkers critiques of secular reason finding in the work of both a theology in pianissimo constituted by the trace of a transcendent other The author analyzes systematizes and formalizes this idea of an other of reason In addition he frames these thinkers innovative projects within the arguments of such intellectual heirs as Jürgen Habermas and Jacques Derrida defending their work against later accusations of performative contradiction by Habermas or empiricism by Derrida and in the process casting important new light on those later writers as well Attentive to rhetorical and rational features of Adorno's and Levinas's texts his investigations of the concepts of history subjectivity and language in their writings provide a radical interpretation of their paradoxical modes of thought and reveal remarkable and hitherto unsuspected parallels between their philosophical methods parallels that amount to a plausible way of overcoming certain impasses in contemporary philosophical thinking In Adorno this takes the form of a dialectical critique of dialectics in Levinas that of a phenomenological critique of phenomenology each of which sheds new light on ancient and modern questions of metaphysics ethics and aesthetics For the English language publication the author has extensively revised and

updated the prize winning German version **The Sensible and Intelligible Worlds** Karl Schafer, Nicholas F. Stang, 2022-06-16 The Sensible and Intelligible Worlds represents a new wave of interest in the metaphysical Kant In recent decades Kant scholars have increasingly become skeptical of interpreting Kant as a philosopher who wished to truly leave metaphysics behind The contributors to this volume share a common commitment to the idea that Kant's philosophy cannot be properly understood without careful attention to its metaphysical presuppositions and in particular to how those metaphysical presuppositions are compatible with Kant's critique of more dogmatic forms of metaphysical thought The authors approach Kant's thought from a wide variety of different perspectives emphasizing not just the familiar Leibnizian background to Kant's metaphysics but also its broadly Aristotelian underpinnings and its relationship with metaphysical themes in post Kantian German Idealism Similarly although most of the essays in this volume relate in some way to the familiar question of how best to interpret Kant's transcendental idealism they also deal with a wide range of other topics including Kant's modal metaphysics his views on the continuum his epistemology of the a priori and the foundations of his metaethical views *The Ways Things Are* Christian Kanzian, Winfried Löffler, Josef Quitterer, 2013-05-02 This book is a collection of essays in systematic ontology The parts of its title Things and Ways They Are are indicative of two broadly and intensively discussed issues in current ontology namely what categories of entities there are and in what ways they are relevant for our discourses The three sections of the volume correspond to focuses of ontological research Before Ontology is dedicated to conceptual methodological and meta ontological issues Ontology at Work raises general topics of categorial ontology and the final section Ontology in Application discusses questions such as those relating to free will and our conception of the human being The book is a tribute to Edmund Runggaldier on the occasion of his 65th birthday Its seventeen papers are authored by such distinguished scholars as Lynne Rudder Baker Franz von Kutschera E J Lowe Otto Muck Paul Weingartner Timothy Williamson and many others **Husserl** David Woodruff Smith, 2013-07-04 This second edition of David Woodruff Smith's stimulating introduction to Husserl has been fully updated and includes a new ninth chapter featuring contemporary issues confronting Husserl's phenomenology It introduces the whole of Edmund Husserl's thought demonstrating his influence on philosophy of mind and language on ontology and epistemology as well as ethical theory and on philosophy of logic mathematics and science Starting with an overview of Husserl's life and works and his place in twentieth century philosophy and in Western philosophy as a whole Smith introduces Husserl's conception of phenomenology explaining Husserl's innovative theories of intentionality objectivity subjectivity and intersubjectivity In subsequent chapters Smith covers Husserl's logic metaphysics realism and transcendental idealism epistemology and meta ethics Finally the author assesses the significance and implications of Husserl's work for contemporary philosophy of mind and cognitive science Also included is a timeline glossary and extensive suggestions for further reading making Husserl second edition essential reading for anyone interested in phenomenology twentieth century philosophy and the continuing

Dalferth,2022-05-31 The incursion of evil has always caused people to turn to the divine to gods or to a god in order to reorientate their life Ingolf U Dalferth studies the complexity of this procedure in three thought processes that deal with the central concepts in the Christian understanding of malum as privation a lack of good as evil doing and as a lack of faith In doing so he provides a detailed discussion of theories of theodicy the argument from freedom and the religious turn to God in which the author explores the traces of the discovery of God s goodness justness and love in connection with the malum experiences in ancient mythology and biblical traditions Being Somewhere Ferdinand Pöhlmann,2017-05-15 Ferdinand Pöhlmann argues that a sense of one s own basic abilities to move is a constitutive condition on the ability to perceive the world spatially This constitutive relation explains why egocentric spatial representation is to be regarded as a kind of self representation In arguing for these claims conceptual as well as empirical questions are discussed and an overview of accounts that take action as a constitutive condition on spatial representation is given The picture that emerges is linked to the phenomenological Scheler as well as to the analytic Evans tradition in the Philosophy of Mind *Bibliografisch Repertorium Van de Wijsbegeerte*) ,2000 **Aspekte des Selbstbewusstseins bei Kant** Xi Luo,2019-02-13 Die leitende Frage im vorliegenden Buch lautet Was ist das Selbstbewusstsein bei Kant Es ist das Ziel von Xi Luo die Frage nach der Beschaffenheit des Selbstbewusstseins im Rahmen von Kants theoretischer Philosophie systematisch zu rekonstruieren Anhand des Deduktion Kapitels und des Paralogismus Kapitels der Kritik der reinen Vernunft behandelt der Autor drei zentrale Aspekte des Selbstbewusstseins Identität Einheit und Existenz Aufgrund einer textnahen Rekonstruktion von den Kantischen Argumenten gelangt der Autor zum Ergebnis dass das reine Selbstbewusstsein das Bewusstsein vom identischen Ich das Bewusstsein vom vereinheitlichenden Ich und das Bewusstsein von der Existenz des transzendentalen Ich ist American Philosophical Quarterly Nicholas Rescher,2002 **Emancipación o violencia : pacifismo estético en Gianni Vattimo** Wolfgang Sützl,2007 Los modelos de pensamiento que parten de la violencia como la primera y ltima de las cosas y la colocan en un plan metafísico tienen su origen en la antigüedad la guerra como padre de todas las cosas y llegan hasta el presente la guerra como ltimo recurso En consecuencia el pensamiento pacifista occidental se ha visto enfrentado al problema de poner fin a la

vilencia sin recurrir a una nueva metafísica a su vez violenta Partiendo del pensamiento antimetafísico representado por Gianni Vattimo el libro ofrece un análisis de la interpretación emancipadora que hace Vattimo de Heidegger y de Nietzsche seguido por un estudio de las implicaciones pacifistas de las contribuciones de Vattimo en diferentes campos de la filosofía teórica y práctica De tal manera se esbozan los rasgos de un pensamiento pacifista propio de la época en que la metafísica llega a su cumplimiento en el mundo de la tecnociencia el *Ge-stell* de Heidegger que favorece un pacifismo estético y negativo más allá de las posiciones positivistas y derrotistas
