Post, 2025-11-04 I m pleased to see that noted author Dr Stephen G Post is addressing themes such as consciousness and interconnectedness in his new book about Seven Paths to Inner Peace It is my hope that this book will contribute to the flourishing of humanity from the foreword by His Holiness The Dalai Lama A scientific and spiritual exploration of how the healing power of love can transform mind body and spirit in individuals and communities even in times of chaos Dr Post s goal through his life s work is to achieve cultural transformation through a blend of the highest levels of scientific research spiritual philosophical reflection and effective practice Through more than forty years of research he has created a framework readers can use to foster pure unlimited love and find inner peace regardless of what s going on around them The framework consists of seven paths for generating inner peace which include May You Give and Glow May You Heal with Kindness May You Follow Your Callings May You Raise Kind Children May You Know the One Mind May You Cherish the Gift of Nature May You Honor the Spirit of Freedom By incorporating these mantras into your everyday life you can intentionally show love and kindness in your interactions and help to create inner peace as well as peace around you When given from the heart pure love is unlimited and is comprised of compassion helping forgiveness mirth respect celebration listening loyalty creativity and carefrontation Dr Post s work invites readers to embrace pure unlimited love and help create a better world **The Social Self in Zen and American Pragmatism** Steve Odin, 1996-01-01 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as individual society interaction It is also shown for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism **Bulletin of the Toronto Public Library** Toronto Public Library, 1918 **The University of Michigan-Dearborn** University of Michigan--Dearborn, 1973 **The Twentieth Century Cyclopedia** , 1902

Consensus Realities Stefan Wurm, 2022-01-05 We perceive the world in which we live through our senses and make sense of it using our minds In this way we construct our very own consensus realities our subjective interpretations of the world as each one of us perceives and understands it What do we know about how we construct our consensus realities How do human body and mind connect as they somehow must to give us the experience of the world that we know we have The first three book chapters invite the reader to explore what the human brain philosophy of mind and psychology can tell us about the relationship between the human body and mind We all are curious about those things and exploring them is possible for all of us We have no other choice than to form our own consensus realities as it is through them that we can make sense of us in this world Many consensus realities only deviate from objective reality in as much as our personal vanity goes to make us more comfortable with who we are Others however can seemingly dissociate themselves to much greater degrees from objective reality endorsing fake news and false narratives creating their own make believe worlds in the process The fourth book chapter looks into some of the implications that has had in the past and might have in the future

Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is

Kosik, 1976-12-31 Kosik writes that the history of a text is in a certain sense the history of its interpretations In the fifteen years that have passed since the first Czech edition of his *Dialectics of the Concrete* this book has been widely read and interpreted throughout Europe in diverse centers of scholarship as well as in private studies A faithful English language edition is long overdue This publication of Kosik's work will surely provoke a range of new interpretations For its theme is the characterization of science and of rationality in the context of the social roots of science and the social critique which an appropriately rational science should afford Kosik's question is How shall Karl Marx's understanding of science itself be understood And how can it be further developed In his treatment of the question of scientific rationality Kosik drives bluntly into the issues of gravest human concern not the least of which is how to avoid the pseudo concrete the pseudo scientific the pseudo rational the pseudo historical Starting with Marx's methodological approach of ascending from the abstract to the concrete Kosik develops a critique of positivism of phenomenalist empiricism and of metaphysical rationalism counter posing them to dialectical rationalism He takes the category of the concrete in the dialectical sense of that which comes to be known by the active transformation of nature and society by human purposive activity Undergraduate Catalog University of Michigan--Dearborn, 2009 **HUMAN NATURE: A New Theory of Psychology** Dick Minnerly, 2014-09-19 HUMAN NATURE is a comprehensive work that proceeds from theory to science to practice so it is directed to a broad audience with varying interests and levels of knowledge and it will be an invaluable reference in anyone's library for life Its new theories in metaphysics epistemology and psychology along with the new moral and political theories they imply give its readers a complete and realistic philosophy of life as well as a powerful new tool that reveals the innate nature of any person whose birth date they know Whether they use this tool to understand themselves or others they will see as they never could before the underlying truths about people's motives thoughts feelings judgments morals politics and practical decisions
