Price, 1995-10-13 This is a collection of the most important writings of Oxford philosopher H H Price on the topics of psychical research and survival of death collected from a wide variety of sources unavailable to most interested readers Included are discussions of telepathy clairvoyance telekinesis precognition hauntings and apparitions the impact of psychical research on western philosophy and science and what afterlife is probably like Few twentieth century English speaking philosophers have written much on these topics Of those who did so and whose writings have not been collected and published in a single source H H Price was the most important *Philosophy of Science and Occult, 1st Ed.* Patrick Grim, 1983-06-30 Philosophy of Science and the Occult has two aims to introduce the philosophy of science through an examination of the occult and to examine the occult rigorously enough to raise central issues in philosophy of science Patrick Grim has compiled selections by authors with divergent views on astrology parapsychology and UFO's to emphasize topics standard to the philosophy of science He discusses issues such as confirmation and selection for testing possibility and a priori probabilities causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values A sketch of where these arise in the collection accompanies the table of contents The context of the occult serves to make the initial introduction of these issues

immediately understandable and forcefully compelling *Philosophical Interactions with Parapsychology* Henry Habberley Price, 1995-01-01 Many western philosophers have claimed that there are no psychical powers that the human being is simply an advanced form of matter that the world has no purpose and that the very notion that a person could survive the death of the physical body is not just false but nonsensical H H Price is an important English philosopher who did not share these views If it should be true that we have psychical powers and Price was convinced that we do this has very important implications for human nature and destiny we have souls there is some purpose to the features of nature and this life may be just a portion of the process of soul building that is our destiny H H Price is widely credited as being the first modern western philosopher to develop a coherent picture of what the life beyond might look like **Library of Congress Subject Headings** Library of Congress, Library of Congress. Braude, 2002 This work was the first sustained philosophical study of psychic phenomena to follow C D Broad's LECTURES ON PSYCHICAL RESEARCH written nearly twenty years earlier The author clearly defines the categories of psychic phenomena surveys the most compelling experimental data and traces their implications for the philosophy of science and the philosophy of mind He considers carefully the abstract presuppositions underlying leading theories of psychic phenomena and he offers bold criticisms of both mechanistic analyses of communication and psychophysical identity theories In addition he challenges the received view that experimental repeatability is the paramount criterion for evaluating parapsychological research and he exposes the deep confusions underlying Jung's concept of synchronicity **Philosophy of Science and the Occult** Patrick Grim, 1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been
