Marxism and the Philosophy of Science Helena Sheehan,2018-01-23 A masterful survey of the history of Marxist philosophy of science Sheehan retraces the development of a Marxist philosophy of science through detailed and highly readable accounts of the debates that shaped it Skilfully deploying a large cast of characters Sheehan shows how Marx and Engel s ideas on the development and structure of natural science had a crucial impact on the work of early twentieth century natural philosophers historians of science and natural scientists With a new afterword by the author

Philosophical Thought in Russia in the Second Half of the Twentieth Century Vladislav Lektorsky,Marina F. Bykova,2019-01-10 Philosophical Thought in Russia in the Second Half of the 20th Century is the first book of its kind that offers a systematic overview of an often misrepresented period in Russia s philosophy Focusing on philosophical ideas produced during the late 1950s early 1990s it reconstructs the development of genuine philosophical thought in the Soviet period and introduces those non dogmatic Russian thinkers who saw in philosophy a means of reforming social and intellectual life Covering such areas of philosophical inquiry as philosophy of science philosophical anthropology the history of philosophy activity approach as well as communication and dialogue studies the volume presents and thoroughly discusses central topics and concepts developed by Soviet thinkers in that particular fields Written by a team of internationally recognized scholars from Russia and abroad it examines the work of well known Soviet philosophers such as Mikhail Bakhtin Evald Ilyenkov and Merab Mamardashvili as well as those important figures such as Vladimir Bibler Alexander Zinoviev Yury Lotman Georgy Shchedrovitsky Genrich Batishchev Sergey Rubinstein and others who have often been overlooked By introducing and examining original philosophical ideas that evolved in the Soviet period the book confirms that not all Soviet philosophy was dogmatic and tied to orthodox Marxism and the ideology of Marxism Leninism It shows Russian philosophical development of the Soviet period in a new light as a philosophy defined by a genuine discourse of exploration and intellectual progress rather than stagnation and dogmatism In addition to providing the historical and cultural background that explains the development of the 20th century Russian philosophy the book also puts the discussed ideas and theories in the context of contemporary philosophical discussions showing their relevance to nowadays debates in Western philosophy With short biographies of key thinkers an extensive current bibliography and a detailed chronology of Soviet philosophy this research resource provides a new understanding of the Soviet period and its intellectual legacy 100 years after the Russian Revolution

The Economics of Science: A Critical Realist Overview

David Tyfield, 2012-06-12 Dramatic and controversial changes in the funding of science over the past two decades towards its increasing commercialization have stimulated a huge literature trying to set out an economics of science Whether broadly in favour or against these changes the vast majority of these frameworks employ ahistorical analyses that cannot conceptualise let alone address the questions of why have these changes occurred and why now Nor therefore can they offer much insight into the crucial question of future trends Given the growing importance of science and innovation in an age of both a globalizing knowledge based economy itself in crisis and enormous challenges that demand scientific and technological responses these are significant gaps in our understanding of important contemporary social processes This book argues that the fundamental underlying problem in all cases is the ontological shallowness of these theories which can only be remedied by attention to ontological presuppositions Conversely a critical realist approach affords the integration of a realist political economy into the analysis of the economics of science that does afford explicit attention to these crucial questions a cultural political economy of research and innovation CPERI Accordingly the book sets out an introduction to the existing literature on the economics of science together with novel discussion of the field from a critical realist perspective In arguing thus across levels of abstraction however the book also explores how concerted engagement with substantive social enquiry and theoretical debate develops and strengthens critical realism as a philosophical project rather than simply applying it While the first of these two volumes argues how mainstream economics is inadequate to the task of an explanatory and critical economics of science the challenge in this second volume is to examine the strengths and weaknesses of disciplines offering more promising starting points Two social scientific disciplines are particularly promising candidates starting from economy or science namely heterodox political economy and science technology studies respectively Synthesising these into an economics of science however still encounters considerable hurdles in that there remain some fundamental and mutual philosophical incompatibilities Formulating an economics of science thus demands that both economics and science be redefined The book explores how a critical realist approach affords some common ground upon which this productive synthesis may be pursued in the form of a cultural political economy of research and innovation CPERI

The Interaction of Sciences in the Study of the Earth D. I. Sheherbakov, V. V. Belousov, 2002 This book is a collection of articles on a variety of logically interlinked problems relating to the study of the earth and the evolution of the different sciences that engage in this study the geosciences as they are sometimes called the nature and place of modern geology among other sciences the tendencies in its development the specific features of the so called geological form of motion of matter and its connection with other forms of motion the place of geophysics and geochemistry in the study of the planet and in the system of sciences investigating the earth some philosophical aspects of the transformation of nature On a number of questions the authors express different points of view and the reader is able to judge for himself of the merits and demerits of their theories The volume will no doubt be of interest to geologists geophysicists geochemists geographers and philosophers to say

nothing of the ever growing circle of inquisitive readers who take an interest in the exploration of our native planet and the philosophical and methodological questions deriving therefrom The papers were originally presented at joint the teorical conferences of philosophical methodological seminars scientific establishments of the U S S R Academy of Sciences The papers prepared for this collection were revised and supplemented by their authors [Climate Change Research at Universities](#) Walter Leal Filho,2017-06-02 This unique book provides a multidisciplinary review of current climate change research projects at universities around the globe offering perspectives from all of the natural and social sciences Numerous universities worldwide pursue state of the art research on climate change focussing on mitigation of its effects as well as human adaptation to it However the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change UNFCCC COP 21 demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision making on climate change To date few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaption studies As a result the published literature has also lacked a broad perspective This book fills that gap and is of interest to all researchers and policy makers concerned with global climate change regardless of their area of expertise **National Union Catalog** ,1979 Includes entries for maps and atlases **Beyond New Atheism and Theism** Sal Restivo,2023-09-01 This book addresses the flaws and fallacies in the grounds for atheism and theism flaws and fallacies that contaminate the arguments of non believers and believers alike Focusing on the highly visible debates between the New Atheists such as Christopher Hitchens Daniel Dennett Richard Dawkins and Sam Harris on the one hand and their main theist opponents including Frank Turek John Lennox and William Lane Craig on the other it approaches these debates from the perspective of the sociology of religion and science With entire worldviews at stake it explores various failings in the logic language and knowledge of the protagonists revealing mistaken and oversimplified understandings of both science itself and the sociocultural and symbolic roles of religion on both sides Advancing a secular and humanist worldview unburdened by the problems that beset both atheism and theism the author argues for a sociological perspective on religion God and science as a practice together with a critical realist approach to the nature of the real world as we experience it Beyond New Atheism and Theism will therefore appeal to scholars and students of sociology and cultural studies with interests in the conflicting worldviews of science and religion [On Twenty-Five Years of Social Epistemology](#) James H. Collier,2016-03-16 This edited collection charts the development of and prospects for conceiving knowledge as a social phenomenon The origin aims and growth of the journal Social Epistemology founded in 1987 serves to anchor each of the book s contributions Each contribution offers a unique but related insight on current issues affecting the organization and production of knowledge In addition each contribution proposes necessary questions practices and frameworks relevant to the rapidly changing
