compilers is also provided      Disappearing Ink Eileen O'Neill, 2025-03-07 When Eileen O'Neill 1953-2017 published her ground-breaking essay *Disappearing Ink: Early Modern Women Philosophers and the History of Philosophy* in 1998, women philosophers were virtually absent from encyclopedias of philosophy and the numerous histories and anthologies of early modern thought. This essay would come to have an enormous impact, signaling the beginning of the movement to introduce early modern women philosophers into the canon. In its densely packed 46 pages, *Disappearing Ink* presented the names, major works, and principal theses of literally dozens of forgotten women whose works were published during the early modern period and who had engaged in correspondence with central male figures but whose names and works had since been erased. *Disappearing Ink* reprints this now canonical piece together with subsequent essays, some widely read, some harder to locate, and one on Cartesianism and the Gendered Mind written in 2013 and published here for the first time. The essays in Part I develop O'Neill's views on feminist history of philosophy, articulating an account of feminist historiography that is inclusive yet at the same time textually nuanced. The essays in Part II provide in-depth treatment of individual figures and themes. These essays discuss the views of early modern women philosophers such as Mary Astell, Margaret Cavendish, and Mme de Lambert alongside those of Descartes, Leibniz, Poullain de la Barre, and the Scholastics, engaging with questions of mind-body interaction, occasional causation, physical influx, pan-organicism, and whether the Cartesian mind is gendered. The sole essay in Part III departs from the historical orientation of Parts I and II. This essay, informed by O'Neill's deep knowledge of art history, is an illuminating study of agency in representations of women in feminist erotic art of the 1980s. Combined, these works trace the complete arc of O'Neill's thought from painstaking studies of individual themes and figures to a sweeping vision of how feminism should inform our approach to the history of early modern thought, indeed to the history of philosophy more generally. More than anyone else, O'Neill explained why women were excluded from the canon and showed how they could be incorporated into it.      **Cartesian Empiricisms** Mihnea Dobre, Tammy Nyden, 2013-11-29

*Cartesian Empiricisms* considers the role Cartesians played in the acceptance of experiment in natural philosophy during the seventeenth century. It aims to correct a partial image of Cartesian philosophers as paradigmatic system-builders who failed to meet challenges posed by the new science's innovative methods. Studies in this volume argue that far from being strangers to experiment, many Cartesians used and integrated it into their natural philosophies. Chapter 1 reviews the historiographies of early modern philosophy, science, and Cartesianism and their recent critiques. The first part of the volume explores various Cartesian contexts of experiment: the impact of French condemnations of Cartesian philosophy in the second half of the seventeenth century; the relation between Cartesian natural philosophy and the Parisian academies of the 1660s; the complex interplay between Cartesianism and Newtonianism in the Dutch Republic; the Cartesian influence on medical teaching at the University of Duisburg; and the challenges chemistry posed to the Cartesian theory of matter. The second part of the volume examines the work of particular Cartesians such as Henricus Regius, Robert Desgabets, Jacques Rohault, Burchard de Volder,

Antoine Le Grand and Balthasar Bekker Together these studies counter scientific revolution narratives that take rationalism and empiricism to be two mutually exclusive epistemological and methodological paradigms The volume is thus a helpful instrument for anyone interested both in the histories of early modern philosophy and science as well as for scholars interested in new evaluations of the historiographical tools that framed our traditional narratives **The Oxford Handbook of Philosophy in Early Modern Europe** Desmond M. Clarke, Catherine Wilson, 2011-01-27 A team of leading scholars survey the development of philosophy in the period of extraordinary intellectual change from the mid 16th century to the early 18th century They cover metaphysics and natural philosophy the mind the passions and aesthetics epistemology logic mathematics and language ethics and political philosophy and religion **Thinking with Demons** Stuart Clark, 1999 This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe Stuart Clark offers a new interpretation of the witchcraft beliefs of European intellectuals based on their publications in the field of demonology and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period After examining the linguistic foundations of their writings the author shows how the writers ideas about witchcraft and about magic complemented their other intellectual commitments in particular their conceptions of nature history religion and politics The result is much more than a history of demonology It is a survey of wider intellectual and ideological purposes and underlines just how far the nature of rationality is dependent on its historical context *Modern Challenges to Past Philosophy* Thomas D. Sullivan, Russell Pannier, 2014-02-27 Does philosophy have a timeless essence Are the writings that have come down to us over the centuries from philosophers of genius mere souvenirs from a bygone era Or are their thoughts still eminently worth examining with care *Modern Challenges to Past Philosophy* argues pondering past philosophy with modern problems in mind is worth the effort even though earlier works are uninformed by modern science and lack some of tools of modern analysis The great texts defamiliarize our world and offer solutions to crucial questions often forgotten as we fixate on current philosophical trends *Modern Challenges* is no appeal to a return to a golden past but a study designed to show how and why understanding earlier works of some of the most penetrating minds ever to ponder eternally valid questions can contribute to a renewal of our own culture *Writing History in Late Modern English* Isabel Moskowich, Begoña Crespo, Luis Puente-Castelo, Leida Maria Monaco, 2019-10-09 This volume focuses on the relationship and interaction of language and science between 1700 and 1900 It pays particular attention to English History writing in late Modern English as compiled in the Corpus of History English Texts CHET a newly released sub corpus of the Coru a Corpus of English Scientific Writing The chapters cover methodological issues the period and the status of the discipline itself as well as pilot studies for the description of scientific discourse using CHET They embrace topics in several linguistic fields discourse analysis syntax
