Philosophical Representation Ori Simchen, 2023-04-07 This book focuses on how we should treat philosophy's theoretical representations It argues in favor of an instrumentalist attitude towards pivotal cases of theoretical representation in philosophy that are commonly regarded under a realist attitude Philosophy is awash with theoretical representations which raises the question of how we should regard them This book argues that representations in philosophy should not be regarded under a realist attitude by default as individually disclosing the nature of what they represent Ori Simchen introduces the reader to the general theme of representations in philosophy and our attitudes towards them via case studies numbers modality and belief He offers a framework for deciding when a realist attitude towards a theoretical representation is warranted and concludes that the representations deployed in the case studies fail the proposed test The next part of the book illustrates the attractiveness of attitudinal instrumentalism towards representations in semantics in the philosophy of mind and within the problematics of rule following Philosophical Representation will appeal to researchers and advanced students working in philosophy of language philosophy of mind metaphysics philosophical logic and philosophical methodology

What are Mental Representations? Joulia Smortchkova, Krzysztof Dołęga, Tobias Schlicht, 2020-09-28 The topic of this book is mental representation a theoretical concept that lies at the core of cognitive science Together with the idea that thinking is analogous to computational processing this concept is responsible for the cognitive turn in the sciences of the mind and brain since the 1950s Conceiving of cognitive processes such as perception reasoning and motor control as consisting of the manipulation of contentful vehicles that represent the world has led to tremendous empirical advancements in our explanations of behaviour Perhaps the most famous discovery that explains behavior by appealing to the notion of mental representations was the discovery of place cells that underlie spatial navigation and positioning which earned researchers John O Keefe May Britt Moser and Edvard I Moser a joint Nobel Prize in 2014 And yet despite the empirical importance of the concept there is no agreed definition or theoretical understanding of mental representation This book constitutes a state of the art overview on the topic of mental representation assembling some of the leading experts in the field and allowing them to engage in meaningful exchanges over some of the most contentious questions The collection gathers both proponents and critics of the notion making room for debates dealing with the theoretical and ontological status of representations the possibility of formulating a general account of mental representation which would fit our best explanatory practices and the possibility of delivering such an account in fully naturalistic terms Some contributors explore the relation between mutually incompatible notions of mental representation stemming from the different disciplines composing the cognitive sciences such as neuroscience psychology and computer science Others question the ontological status and explanatory usefulness of the notion And finally some try to sketch a general theory of mental representations that could face the challenges outlined in the more critical

chapters of the volume **Contemporary Natural Philosophy and Philosophies - Part 1** Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal Philosophies to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind

new ideas fresh approaches and new criticisms of old ideas The papers deal in new ways with fundamental questions concerning the problem of mental representation that one contributor Robert Cummins has described as THE problem in philosophy of mind for some time now The editors introductory overview considers the problem for which mental representation has been seen as an answer sketching an influential framework outlining some of the issues addressed and then providing an overview of the papers Issues include the relation between mental representation and public non mental representation misrepresentation the role of mental representations in intelligent action the relation between representation and consciousness the relation between folk psychology and explanations invoking mental representations

Representation of Language Georges Rey, 2020-09-30 This book is a defense of a Chomskyan conception of language against philosophical objections that have been raised against it It also provides however a critical examination of some of the glosses on the theory the assimilation of it to traditional Rationalism a supposed conflict between being innate and learned an unclear ontology and the need of a representational pretense with regard to it and most crucially a rejection of Chomsky's eliminativism about the role of intentionality not only in his own theories but in any serious science at all This last is a fundamentally important issue for linguistics psychology and philosophy that an examination of a theory as rich and promising as a Chomskyan linguistics should help illuminate The book ends with a discussion of some further issues that Chomsky misleadingly associates with his theory an anti realism about ordinary thought and talk and a dismissal of the mind body problem's towards the solution of some of which his theory in fact makes an important contribution **Knowledge**

Representation and Metaphor E. Cornell Way, 2013-03-14 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental capabilities of other species to ideas related to artificial intelligence and computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time The problems posed by metaphor and analogy are among the most challenging that confront the field of knowledge representation In this study Eileen Way has drawn upon the combined resources of philosophy psychology and computer science in developing a systematic and illuminating theoretical framework for understanding metaphors and analogies While her work provides solutions to difficult problems of knowledge representation it goes much further by investigating some of the most important philosophical assumptions that prevail within artificial intelligence today By exposing the limitations inherent in the assumption that languages are both literal and truth functional she has advanced our grasp of the nature of language itself J R F Modes of Representation Richard Kimberly Heck, 2024-03-04 Lois Lane knows that Superman can fly but she does not know that Clark Kent can fly

How can that be given that Superman and Clark are one and the same To answer this question Frege famously distinguished the reference of a name the thing it is a name of from what he called its sense or mode of presentation The sense was meant to capture our necessarily limited perspective on reference and to explain the difference in cognitive value between Superman can fly and Clark can fly Frege's distinction has been widely discussed in the last century but much about it remains unclear In this collection Richard Kimberly Heck one of the world's foremost experts on Frege's philosophy distinguishes three aspects of Frege's famous puzzle and explores the connections between them Their wide ranging discussion touches on issues in philosophy of mind philosophy of language philosophy of logic the history of analytic philosophy and meta philosophy Heck argues that while many of the details of Frege's position cannot be defended his famous puzzle still has much to teach us both about the foundations of cognition and about the nature of linguistic communication Modes of Presentation presents eight previously published papers two of which are significantly expanded There are also three new chapters three new postscripts responding to criticisms and a substantial overview that introduces the issues and traces connections between the chapters

IS THE AUTHOR REALLY DEAD? Zhang Jiang, 2022-01-10 Roland Barthes declared that the author is dead Professor Zhang Jiang challenges this statement by asking is the author really dead In contemporary Western theories of literature and art the relationship among the author the text and the reader is not only a theoretical issue but a matter of epistemology and philosophy with a broad background and rich connotations Is the Author Really Dead Textual Research into Contemporary Western Literary Theories analyzes the inadequacies and problems of contemporary Western literary theory and calls for realignment in this field It argues that the root of the insurmountable conflict between Western literary theory and Chinese literary theory lies in what Professor Zhang terms compulsory interpretation the recognition and repudiation of which should form the cornerstone of reconstructing contemporary Chinese literary theory

Breastfeeding and Culture: Discourses and Representations Anne Marie Short, 2018-04-01 For myriad reasons breastfeeding is a fraught issue among mothers in the U S and other industrialized nations and breastfeeding advocacy in particular remains a source of contention for feminist scholars and activists Breastfeeding raises many important concerns surrounding gendered embodiment reproductive rights and autonomy essentializing discourses and the struggle against biology as destiny and public policies that have the potential to support or undermine women and mothers in particular in the workplace The essays in this collection engage with the varied and complicated ways in which cultural attitudes about mothering and female sexuality inform the way people understand embrace reject and talk about breastfeeding as well as with the promises and limitations of feminist breastfeeding advocacy They attend to diffuse discourses about and cultural representations of infant feeding all the while utilizing feminist methodologies to interrogate essentializing ideologies that suggest that women's bodies are the natural choice for infant feeding These interdisciplinary analyses which include history law art history literary studies sociology critical race studies media studies communication studies and history are meant to represent a broader conversation about how society understands infant feeding and maternal autonomy

Representations, Targets, and Attitudes Robert Cummins, 1996 What is it for something in the mind to represent something Distinguished philosopher of mind Robert Cummins looks at the familiar problems of representation theory what information is represented in the mind what form mental representation takes how representational schemes are implemented in the brain what it is for one thing to represent another from an unprecedented angle Instead of following the usual procedure of defending a version of indicator semantics Cummins begins with a theory of representational error and uses this theory to constrain the account of representational content Thus the problem of misrepresentation which plagues all other accounts is avoided at the start Cummins shows that representational error can be accommodated only if the content of a representation is intrinsic independent of its use and causal role in the system that employs it Cummins's theory of error is based on the teleological idea of a target an intentional concept but one that differs importantly from that of an ordinary intentional object Using this notion he offers a schematic theory of representation and an account of propositional attitudes that takes exception with some popular positions such as conceptual role semantics Fodor's representational theory of the mind and Putnam's twin earth examples A Bradford Book Representation and Mind series

A Companion to Rorty Alan

Malachowski, 2020-02-14 A groundbreaking reference work on the revolutionary philosophy and intellectual legacy of Richard Rorty A provocative and often controversial thinker Richard Rorty and his ideas have been the subject of renewed interest to philosophers working in epistemology metaphysics analytic philosophy and the history of philosophy Having called for philosophers to abandon representationalist accounts of knowledge and language Rorty introduced radical and challenging concepts to modern philosophy generating divisive debate through the new form of American pragmatism which he advocated and the renunciation of traditional epistemology which he espoused However while Rorty has been one of the most widely discussed figures in modern philosophy few volumes have dealt directly with the expansive reach of his thought or its implications for the fields of philosophy in which he worked The Blackwell Companion to Rorty is a collection of essays by prominent scholars which provide close and long overdue examination of Rorty's groundbreaking work Divided into five parts this volume covers the major intellectual movements of Rorty's career from his early work on consciousness and transcendental arguments to the lasting impacts of his major writings to his approach to pragmatism and his controversial appropriations from other philosophers and finally to his later work in culture politics and ethics Offers a comprehensive balanced and insightful account of Rorty's approach to philosophy Provides an assessment of Rorty's more controversial thoughts and his standing as an anti philosopher's philosopher Contains new and original exploration of Rorty's thinking from leading scholars and philosophers Includes new perspectives on topics such as Rorty's influence in Central Europe Despite the relevance of Rorty's work for the wider community of philosophers and for those working in fields such as international relations legal and political theory sociology and feminist studies the secondary literature surrounding Rorty's work and legacy is limited A Companion to Rorty address this absence providing a comprehensive resource for philosophers and general readers
