Philosophy of Space and Time and the Inner Constitution of Nature Michael Whiteman, 1967 A mathematician who is also a mystic is exceptionally well qualified to survey the mysterious subject of space and time Dr Whiteman Associate Professor of Applied Mathematics at Cape Town University and author of The Mystical Life brings the mathematician's detachment and the mystic's insight to this book and presents the most thorough treatment of space and time yet seen For the expert he provides an indispensable textbook likely to stand unchallenged for many years for the intelligent layman an opening into an absorbing field of knowledge in a world where religious beliefs about the nature of the universe have lost their authority but interest in the infinite is at its greatest Special topics include analysis of perception and measurement the sixfold space conceptuality varieties of time awareness and control interpretation of the theory of relativity and quantum theory cosmological measurement and representation and a critique of philosophies of nature from 1600 A D to the present day inside front flap

The Topological Imagination Angus Fletcher, 2016-04-04 In a bold and boundary defining work Angus Fletcher clears a space for an intellectual encounter with the shape of human imagining Joining literature and topology a branch of mathematics he maps the ways the imagination's contours are formed by the spherical earth's patterns and cycles and shows how the world we inhabit also inhabits us

Science, Mysticism and Psychical Research John Poynton, 2015-09-04 Science mysticism and psychical research are generally thought to be irreconcilable this book centres on a towering synthesis achieved by the late Michael Whiteman an Associate Professor of Applied Mathematics at the University of Cape Town It is revolutionary Whiteman was able to meld mathematical physics and general science with psychical research and Indian and Western mystical texts clarified by a life time of psychical and mystical experience and coupled with an extensive knowledge of philosophy and psychology Part One is about the experience of states spaces and worlds other than physical It provides essential groundwork for understanding the psychical and mystical Whiteman's own experience is combined with evidence ranging from quantum mechanics to the Upanishads Part Two centres on two murder cases that Whiteman studied as an entry to the concept of the corporate structure of personality and the workings of the mind in personal development Part Three covers his analysis of ancient texts based on his understanding as a mystic His interpretations differ radically from standard treatments Part Four investigates his exploration of non physical existence Part

Five considers the mystical life including Whiteman's own and how it relates to physical laws The book concludes with a brief biography

Space and Spatialization in Contemporary Music: History and Analysis, Ideas and Implementations

Maria Anna Harley, 2016-06-08 This dissertation presents the history of space in the musical thought of the 20th century from Kurth to Clifton from Varese to Xenakis and outlines the development of spatialization in the theory and practice of contemporary music after 1950 The text emphasizes perceptual and temporal aspects of musical spatiality thus reflecting the close connection of space and time in human experience A new definition of spatialization draws from Ingarden's notion of the musical work a typology of spatial designs embraces music for different acoustic environments movements of performers and audiences various positions of musicians in space etc The study of spatialization includes a survey of the composers's writings Ives Boulez Stockhausen Cage etc and an examination of their works The final part presents three unique approaches to spatialization Brant's simultaneity of sound layers Xenakis's movement of sound and Schafer's music of ritual and soundscape

Beyond Physicalism Edward F. Kelly, Adam Crabtree, Paul Marshall, 2015-02-19 The rise of modern

science has brought with it increasing acceptance among intellectual elites of a worldview that conflicts sharply both with everyday human experience and with beliefs widely shared among the world's great cultural traditions Most contemporary scientists and philosophers believe that reality is at bottom purely physical and that human beings are nothing more than extremely complicated biological machines On such views our everyday experiences of conscious decision making free will and the self are illusory by products of the grinding of our neural machinery It follows that mind and personality are necessarily extinguished at death and that there exists no deeper transpersonal or spiritual reality of any sort Beyond Physicalism is the product of an unusual fellowship of scientists and humanities scholars who dispute these views In their previous publication *Irreducible Mind* they argued that physicalism cannot accommodate various well evidenced empirical phenomena including paranormal or psi phenomena postmortem survival and mystical experiences In this new theory oriented companion volume they go further by attempting to understand how the world must be constituted in order that these rogue phenomena can occur Drawing upon empirical science metaphysical philosophy and the mystical traditions the authors work toward an improved big picture of the general character of reality one which strongly overlaps territory traditionally occupied by the world's institutional religions and which attempts to reconcile science and spirituality by finding a middle path between the polarized fundamentalisms religious and scientific that have dominated recent public discourse Contributions by Harald Atmanspacher Lorilai Biernacki Bernard Carr Wolfgang Fach Michael Grosso Michael Murphy David E Presti Gregory Shaw Henry P Stapp Eric M Weiss and Ian Whicher

The concept of naturalness has largely disappeared from the academic discourse in general but also the particular field of environmental studies This book is about naturalness in general about why the idea of naturalness has been abandoned in modern academic discourse why it is important to explicitly re establish some meaning for the concept and what that meaning ought to be Arguing that naturalness can and should be understood in light of a dispositional ontology the book offers a point of view where the gap between instrumental and ethical perspectives can be bridged Reaching a new foundation for the concept of naturalness and its viability will help raise and inform further discussions within environmental philosophy and issues occurring in the crossroads between science technology and society This topical book will be of great interest to researchers and students in Environmental Studies Environmental Philosophy Science and Technology Studies Conservation Studies as well as all those generally engaged in debates about the place of man in nature The Journal of Philosophy ,1989 *Databases and Information Systems* Tarmo Robal,Hele-Mai Haav,Jaan Penjam,Raimundas Matulevičius,2020-08-11 This book constitutes the refereed proceedings of the 14th International Baltic Conference on Databases and Information Systems DB IS 2020 held in Tallinn Estonia in June 2020 The 22 revised papers presented were carefully reviewed and selected from 52 submissions The papers are centered around topics like architectures and quality of information systems artificial intelligence in information systems data and knowledge engineering enterprise and information systems engineering security of information systems The conference was held virtully due to the COVID 19 pandemic

Человек и мир сквозь призму языка. Философские раздумья Марк Блох,2020-02-04 *American Book Publishing Record* ,1970 **Philosophy's Nature: Husserl's Phenomenology, Natural Science, and Metaphysics** Emiliano Trizio,2020-08-31 This book offers a systematic interpretation of the relation between natural science and metaphysics in Husserl s phenomenology It shows that Husserl s account of scientific knowledge is a radical alternative to established methods and frameworks in contemporary philosophy of science The author s interpretation of Husserl s philosophy offers a

critical reconstruction of the historical context from which his phenomenological approach developed as well as new interpretations of key Husserlian concepts such as metaphysics idealization life world objectivism crisis of the sciences and historicity The development of Husserl's philosophical project is marked by the tension between natural science and transcendental phenomenology While natural science provides a paradigmatic case of the way in which transcendental phenomenology ontology empirical science and metaphysics can be articulated it has also been the object of philosophical misunderstandings that have determined the current cultural and philosophical crisis This book demonstrates the ways in which Husserl shows that our conceptions of philosophy and of nature are inseparable Philosophy's Nature will appeal to scholars and advanced students who are interested in Husserl and the relations between phenomenology natural science and metaphysics

Allegory in Early Greek Philosophy Jennifer Lobo Meeks, 2020-10-20 Allegory in Early Greek Philosophy examines the role that allegory plays in Greek thought particularly in the transition from the mythic tradition of the archaic poets to the philosophical traditions of the Presocratics and Plato It explores how a mode of speech that says one thing but means another is integral to philosophy which otherwise seeks to achieve clarity and precision in its discourse By providing the early Greek thinkers with a way of defending and appropriating the poetic wisdom of their predecessors allegory enables philosophy to locate and recover its own origins in the mythic tradition Allegory allows philosophy simultaneously to move beyond mythos and express the whole in terms of logos a rational account in which reality is represented in a more abstract and universal way than myth allows
