**Corruption and Democratic Transition in Eastern Europe** Marija Zurnić, 2018-06-16 This book examines the relationship between corruption scandals and transitional processes in post Milošević Serbia after 2000 The study challenges the view that corruption has always been understood as a conflict between private interests and the public good as these concepts are defined in Western democracies and explores how anti corruption discourse has been used for political mobilisation Through an examination of high profile political scandals in Serbia the author shows how the meaning of corruption changed over time In the early 2000s corruption focused on the legacy of Milošević's rule and was identified through the public's limited access to the privatisation process By the end of the decade conceptualisations of corruption in public debate were so diversified that each anti corruption measure undertaken by the state was interpreted as an act of corruption by other voices in the discourse The book will appeal to students and scholars interested in corruption

studies discourse analysis and Balkan politics      **Idealization VI: Idealization in Economics** ,2023-12-28      *Philosophy, Society and the Cunning of History in Eastern Europe* Costica Bradatan,2013-09-13 Philosophy Society and the Cunning of History in Eastern Europe charts the intellectual landscape of twentieth century East Central Europe under the unifying theme of precariousness as a mode of historical existence Caught between empires often marked by catastrophic historic events and grand political failures the countries of East Central Europe have for a long time developed a certain intellectual self representation a culture that not only helps them make some sense of such misfortunes but also protects them somehow from a collapse into nihilism An interdisciplinary study of this sophisticated culture of survival and endurance has been long overdue Not only is it charming and worth studying in its own right but with the re integration of the new Europe into the old one and the emergence on the Western European intellectual scene of many authors from the East such a culture will also shape the European mind of the 21st century This volume decodes and explores this culture of precariousness from the complementary angles of philosophy political theory intellectual history and literary studies Expert contributors look at a wide range of topics from philosophical martyrdom to collective suffering to geographical fatalism and explore the works of key authors in the field including Cioran Ko akowski Kert sz Bauman and i ek This book was originally published as a special issue of Angelaki The Journal of the Theoretical Humanities      *Building Business in Post-Communist Russia, Eastern Europe, and Eurasia* Dinissa Duvanova,2013-02-18 Prior to 1989 the communist countries of Eastern Europe and the USSR lacked genuine employer and industry associations After the collapse of communism industry associations mushroomed throughout the region Duvanova argues that abusive regulatory regimes discourage the formation of business associations and poor regulatory enforcement tends to encourage associational membership growth Academic research often treats special interest groups as vehicles of protectionism and non productive collusion This book challenges this perspective with evidence of market friendly activities by industry associations and their benign influence on patterns of public governance Careful analysis of cross national quantitative data spanning more than 25 countries and qualitative examination of business associations in Russia Ukraine Kazakhstan and Croatia shows that postcommunist business associations function as substitutes for state and private mechanisms of economic governance These arguments and empirical findings put the long standing issues of economic regulations public goods and collective action in a new theoretical perspective      *Mass Shootings in Central and Eastern Europe* Alexei Anisin,2021-11-17 This book examines mass shootings and attempted shootings that occurred across 16 countries in Central and Eastern Europe known as post communist states This region of the world has been described by social scientists as possessing specific social cultural and political characteristics which may mean that mass shootings in this part of the world are driven by distinct causal factors in comparison to those in North America and elsewhere This book explores trends and patterns that underpin cases in this under explored region and tests whether Cumulative Strain Theory can account for mass shooting occurrences It uses in depth qualitative analysis to examine

select case studies in one chapter followed by a chapter which uses quantitative methods to identify trends across a wider set of cases and to test the theoretically driven hypotheses This data is then compared with data in the US This book draws on a wide range of media forensic and court reports and provides methodological insights and discussions of future trends including the potential incidental increase of mass shootings in these regions It also engages in recent public policy debates pertaining to firearm ownership and regulation

### **Democratic and Capitalist Transitions in Eastern Europe M.**

Dobry,2012-12-06 here ofexchange and borrowing in debates between these disciplines all the more so as we shall see a little further on as the analysis of the Central and East European transformations has also contributed to introduce into political science and sociology theoretical systematizations first formulated in economics In addition to this opening up to the objects and theories of economics the pseudo dilemma ofsimultaneity produced by a kind of feedback another series of effects on transitology and the related research domains Contrary to most expectations and predictions in the wake ofthe 1989

upheavals affirmations that the dilemmas problems or challenges of the transitions in Central and Eastern Europe ought to have been dealt with and resolved one after the other in sequence in the manner of the more or less idealized trajectories of Great Britain or Spain trajectories significantly enough promoted far beyond the circles of scholars as a model of transition andabove all contrary to the assumption that superposing a radical economic transformation upon a transition to democracy would make the whole edifice thoroughly unworkable unstable or dangerous it must be stated clearly out that the two processes in their simultaneity are not necessarily incompatible This is one of the main findings stressed upon in several chapters of this book

**Backwardness and Modernization: Poland and Eastern Europe in the 16th-20th Centuries** Jacek Kochanowicz, 2018-01-31 The subject of this book is the economic backwardness of Poland and Eastern Europe in the modern era The studies in the first part analyse various aspects of the region's economic and social history in the period from the 16th to the 20th centuries such as the nature of peasant economics the character of economic evolution and the ambiguity of social and economic relations between Poland and the West The second part deals with the change following the fall of state socialism Papers in this part argue that for understanding the present it is necessary to take into consideration historical legacies It is also important to look at the process of this recent change comparatively both within Eastern Europe and comparing this region with other parts of the world Professor Kochanowicz's contention in these essays is that the so called transformation has had to cope not only with the effects of state socialism but also with a much longer legacy of backwardness

**The Polish Crisis and Relations with Eastern Europe, 1979-1982** Isabelle Tombs, Richard Smith, 2017-03-16 This volume presents a collection of diplomatic documents describing Britain's relations with Eastern Europe from 1979 to 1982 with special focus on the crisis in Poland After coming to power in 1979 the Conservative Government of Margaret Thatcher reaffirmed a policy of differentiation between the Soviet Union and the rest of Eastern Europe and between individual countries concurrently it encouraged states to exercise a limited amount of independence This policy was soon put to the test when in 1980 Solidarno the Solidarity trade union led by Lech Waśa challenged the power of the Party state in Poland Political demands social unrest and economic crisis culminated in the imposition of martial law in December 1981 finally suspended in December 1982 The volume maps the UK response in consultation with Western partners to the unfolding crisis in Poland the threat of Soviet intervention and the impact on other Communist states in Europe The volume also provides a flavour of bilateral UK relations with Albania Bulgaria Czechoslovakia the German Democratic Republic Hungary Romania and Yugoslavia highlighting themes such as human rights and trade This volume will be of great interest to students of British Politics Eastern European Politics Cold War History Diplomacy Studies and International Relations in general

*Social Justice and Political Change* David Mason, 2018-04-17 Analysis and debate about economic and political justice rarely involves research on the views of the common person Scholars often make assumptions about what common people think is fair but for the most part they confine their thinking to a single country and argue on rational or moral grounds with little supporting empirical data Social Justice and Political Change involves the collaboration of thirty social scientists in twelve countries and represents broad ranging comparative research The book grows out of a collaborative study of public opinion about social justice Though conceived prior to the revolutions that swept Central and Eastern Europe in 1989 the ISJP did not put its survey into the field until the

summer of 1991 in a new climate of open international exchange in social research. Employing common methods of data collection and within the limits of translation identical survey instruments, the ISJP investigated public opinion in seven newly emerging post Communist countries and five of the world's most influential capitalist democracies with special sensitivity to divergencies in the newly united Germany. Among the themes addressed by the volume's distinguished contributors are the views and beliefs of citizens in the post Communist states on the transition to market economies and parliamentary democracy; the role of ideology in legitimating inequality; the structural determination of beliefs about justice; the processes that shape individual level evaluations; and the major implications of public opinion and mass participation in the democratic process.
