## **Philosophy And Revolution From Kant To Marx:**

Philosophy and Revolution Eustache Kouvélakis, Stathis Kouvelakis, 2003-03-17 In this ambitious and original study Stathis Kouvelakis paints a rich panorama of the key intellectual and political figures in the effervescence of German thought before the 1848 revolutions 
From Marx to Kant Dick Howard, 1985-01-01 The crisis of contemporary capitalist society suggests a return to Kant Kant's republican politics is shown to be a necessary element of his philosophical system This system becomes explicit in Marx whose stress on the primacy of philosophy or politics illuminates and distorts the implications of republican philosophy and its politics An independent methodology that would avoid one sidedness can be drawn from a rereading of Kant's Critique of Judgment The resulting reading suggests a philosophy of history and politics that can do in fact what Marx thought his overcoming of German Idealism would accomplish Revolution and Philosophy Andrew Prior, 1972 From Marx to Kant Dick Howard, 1992-12-09 Analyzes the relation of philosophy and politics and illustrates this by a reinterpretation of Kant Hegel and Marx On the basis of a retrospective reading of Kant's theory of reflective judgement a concept of a system beyond philosophy is developed to study modern democratic policies

Architecture or Revolution Nadir Lahiji,2020-09-22 By linking building theory to the emancipatory project of critique advanced by radical thinkers in our time this work investigates the key conceptual and historical elements that culminate in an emancipatory theory of building entitled Toward a philosophy of shelter Taking Marx as its only resource this work proceeds with the conviction that our era is contemporaneous to Marx s historical era This means not judging the validity of Marx from the perspective of the historical situation but rather demonstrating the validity of a Marxian perspective for a singular historical situation as ours This work will therefore translate this perspective into seeing the situation of architecture through the eyes of Marx All those concerned with the predicament in our current condition in which architecture must play a major social role in upholding the universal value of what Alain Badiou calls generic humanity will take an interest in this work In particular architects critics scholars and students inside the field of architecture who would be seeking the application of this universal value to a new theory of building will be a welcoming audience for this work

History and the Formation of Marxism Bertel Nygaard, 2022-09-19 This book redefines the relationship between Marxism and history At its roots Marxism was aimed at analyzing society in order to change it reflecting on the past to create the poetry of the future No single event of the past was as important to early Marxists as the French Revolution of 1789 Studying the varying uses of the history of that past event among Karl Marx Friedrich Engels and prominent European Marxists before 1914 Karl Kautsky V I Lenin and others this book argues that we should take the historiography of concrete past events seriously It was not only an auxiliary element of Marxism but a core constitutive element in its formation Thus this book calls for transcending traditional approaches to Marxism as a fixed set of social theories combined with strategies for the present and future Important to students of Marxism the labor movement and the French Revolution alike this study contains

refreshing perspectives on the interplay between past present and future and on the role of states social classes socio economic determination and political organization in history Human Rights and Constituent Power Illan Wall, 2013-03-01 With the emergence of modern human rights in the Universal Declaration what remained of a radical political potential of the discourse withdrew statism and individualism became its authorised foundations and the possibilities of other human rights traditions were denied. The strife that once lay at the heart of human rights was forgotten in an increasing juridification. This book seeks to recover the radical political pole of human rights It looks to the debates surrounding constituent power the power of the people in order to understand different possibilities for the discourse Using continental political philosophy and critical legal theory Human Rights and Constituent Power presents a very different conception of human rights more at home on the riotous streets than in courtrooms and parliaments **Rethinking Democracy** Leo Panitch, Greg Albo, 2017-12-22 For years intellectuals have argued that with the triumph of capitalist liberal democracy the Western World has reached the end of history Recently however there has been a rise of authoritarian politics in many countries Concepts of post democracy anti politics and the like are gaining currency in theoretical and political debate Now that capitalist democracies are facing seismic and systemic challenges it becomes increasingly important to investigate not only the inherent antagonism between liberalism and the democratic process but also socialism Is socialism an enemy of democracy Could socialism develop expand even enhance democracy While this volume seeks a reappraisal of existing liberal democracy today its main goal is to help lay the foundation for new visions and practices in developing a real socialist democracy Amid the contradictions of neoliberal capitalism today the responsibility to sort out the relationship between socialism and democracy has never been greater No revival of socialist politics in the twenty first century can occur without founding new democratic institutions and practices Marx's Discourse with Hegel N. Levine, 2012-02-21 The end of Stalinist Russia China's change under Deng Xiaoping and the publication of previously unexplored documents of Marx in the MEGA2 opened a new epoch in the analysis of Marx Marx s Discourse With Hegel is both a product and contribution to this rebirth of Marxism by its reformulation of the relationship between Hegel and Marx Marx's Concept of the Alternative to Capitalism Peter Hudis, 2012-07-25 This is the first book length study of Marx s concept of the alternative to capitalism It shows that his critique of capital flowed from a commitment to a specific vision of the kind of human relations that define a new society Citizen Subject Étienne Balibar, 2016-11-01 What can the universals of political philosophy offer to those who experience the living paradox of an inegalitarian construction of egalitarian citizenship Citizen Subject is the summation of tienne Balibar's career long project to think the necessary and necessarily antagonistic relation between the categories of citizen and subject In this magnum opus the question of modernity is framed anew with special attention to the self enunciation of the subject in Descartes Locke Rousseau and Derrida the constitution of the community as we in Hegel Marx and Tolstoy and the aporia of the judgment of self and others in Foucualt Freud Kelsen and Blanchot After the humanist controversy that preoccupied twentieth century

philosophy Citizen Subject proposes foundations for philosophical anthropology today in terms of two contrary movements the becoming citizen of the subject and the becoming subject of the citizen The citizen subject who is constituted in the claim to a right to have rights Arendt cannot exist without an underside that contests and defies it He or she because Balibar is concerned throughout this volume with questions of sexual difference figures not only the social relation but also the discontent or the uneasiness at the heart of this relation The human can be instituted only if it betrays itself by upholding anthropological differences that impose normality and identity as conditions of belonging to the community The violence of civil bourgeois universality Balibar argues is greater and less legitimate therefore less stable than that of theological or cosmological universality Right is thus founded on insubordination and emancipation derives its force from otherness Ultimately Citizen Subject offers a revolutionary rewriting of the dialectic of universality and differences in the bourgeois epoch revealing in the relationship between the common and the universal a political gap at the heart of the universal itself

The Marx of Communism Alexandros Chrysis, 2022-06-30 Following Marx s own itinerary from Paris to London from politics to the critique of political economy The Marx of Communism delves into a creatively unfolding international debate on the democracy communism relation while supporting a 21st century communism as a social alternative to capitalism Taking into consideration Marx s analysis of communism both as a movement and a social formation this study focuses on the dialectics of transition from capitalism to communism Dealing with communism as the outcome of a long term cultural and political process the author defends Marxian communism as the open ended constitution of a self governed demos whose citizens create their own way of life on the ground of a stateless and classless society From this point of view the end of the state does not mean the end but the revival of politics in terms of a communist bios Reshaping their collective and personal values and setting limits to the production technology dynamics of their economy this book argues the citizens of a communist polis form a promising antithesis to the private individuals of a capitalist society **Constructive Sociological Theory** Thomas G. Masaryk, 2021-10-29 Thomas G Masaryk was founding and first president of the State of Czechoslovakia He was also a dissident charter member of the theoretical vanguard that established modern sociology in the nineteenth century Many social scientists are aware of Masaryk's political role but do not know about his significant contributions to sociology With the publication of this book Imber and Woolfolk hope to restore Masaryk to his rightful place in history as a founding sociological theorist This compilation of some of Masaryk's major writings reveals the intertwining of politics and social theory that is characteristic of his thinking Chapters in Constructive Sociological Theory include The Development of the Modern Suicide Tendency Essence and Method of Sociology The Epistemological Problem of Russian Philosophy The Religious Question and Modern Philosophy The Class Structure of Society Central Problems of Marxist Policy and Democracy versus Theocracy Constructive Sociological Theory also presents these writings together in English for the first time Alan Woolfolk's substantial introduction extensively discusses Masaryk's biographical background academic life political career

religious views and interpretations of Marx and Comte among other subjects This landmark volume will be an essential addition to the libraries of political theorists sociologists philosophers and theologians **Christianity and Confucianism** Christopher Hancock, 2020-12-10 Christianity and Confucianism Culture Faith and Politics sets comparative textual analysis against the backcloth of 2000 years of cultural political and religious interaction between China and the West As the world responds to China's rise and China positions herself for global engagement this major new study reawakens and revises an ancient conversation As a generous introduction to biblical Christianity and the Confucian Classics Christianity and Confucianism tells a remarkable story of mutual formation and cultural indebtedness East and West are shown to have shaped the mind heart culture philosophy and politics of the other and far more perhaps than either knows or would want to admit Christopher Hancock has provided a rich and stimulating resource for scholars and students diplomats and social scientists devotees of culture and those who pursue wisdom and peace today **The Hysterical Sublime** Matthew Flisfeder, 2025-06-26 Developing the concept of the hysterical sublime first theorised by Fredric Jameson to challenge posthumanist perspectives on the Anthropocene this book facilitates the rethinking of universal and dialectical humanism as concepts for grappling with 21st century capitalism In recent years posthumanist theories have been concerned with the overlapping dilemmas of global climate change digital automation and artificial intelligence corresponding to the age of the Anthropocene Matthew Flisfeder explores how the fear of technology becomes for Jameson a substitute for the fears of the capitalist system and shows that posthumanism displaces such fears onto the figure of the human and anthropocentrism Drawing on Hegelian Lacanian theory the book argues that to rethink dialectical humanism requires moving past the historicist versions of Marxist humanism that imagine a complete reconciliation with non human nature that includes a process of dis alienation Flisfeder also studies posthumanism s performative contradiction of dismissing humanism while at the same time depending on the very concepts that constitute the core of humanist thought freedom equality responsibility and autonomy Through the concept of the hysterical sublime this book argues that not only is anthropocentrism and humanism the unconscious core of posthumanist theory emancipatory politics must take ownership of this perspective and renew universalist and dialectical humanism as the core of the political project resistant to capitalism and the Capitalocene

Science and Revolution Ernest Untermann,1905 A New Approach to Kant Zehou Li,2018-05-21 Originally written during the Cultural Revolution this book introduces and interprets Kant's critical philosophy through the lens of its author Li Zehou's own philosophical approach anthropological historical ontology Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies Over millions of years these ever evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li s views draw upon Marx s theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence

Beginning with the assumption that the question at heart of Kant's philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant's transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our Against the Grain Ezra Mendelsohn, Stefani Hoffman, Richard I. Cohen, 2013-10-01 Highlighting shared human future the seminal role of German Jewish intellectuals and ideologues in forming and transforming the modern Jewish world this volume analyzes the political roads taken by German Jewish thinkers the impact of the Holocaust on the Central and East European Jewish intelligentsia and the conundrum of modern Jewish identity Several of German Jewry's most outstanding figures such as Scholem Strauss and Kohn are discussed Inspired by Steven E Aschheim s work several contributors focus on the fraught relationship between German and East European Jews the so called Ostjuden and between German Jews and their non Jewish neighbors More generally this book examines how Central European Jewish thinkers reacted to the terrible crises of the twentieth century to war genocide and the existential threat to the very existence of the Jewish people It is essential reading for those interested in the triumphs and tragedies of modern European Jewry Scapp, B. Seitz, 2013-12-18 A philosophical cultural exploration this book expands the discussion of class from a novel perspective Following the current debates about wealth and class the contributors address the social and cultural phenomena of class from a uniquely innovative philosophical approach and reconsider philosophical givens within the context of culture Time and world politics Kimberly Hutchings, 2013-07-19 This book offers the first authoritative guide to assumptions about time in theories of contemporary world politics It demonstrates how predominant theories of the international or global present are affected by temporal assumptions grounded in western political thought that fundamentally shape what we can and cannot know about world politics today The first part of the book traces the philosophical roots of assumptions about time in contemporary political theory. The second part examines contemporary theories of world politics including liberal and realist International Relations theories and the work of Habermas Hardt and Negri Virilio and Agamben In each case it is argued assumptions about political time ensure the identification of the particular temporality of western experience with the political temporality of the world as such and put the theorist in the unsustainable position of holding the key to the direction of world history In the final chapter the book draws on postcolonial and feminist thinking and the philosophical accounts of political time in the work of Derrida and Deleuze to develop a new untimely way of thinking about time in world politics
