Alan Hall, 2012-10-25 This volume consists of nine articles dealing with topics in distinctive feature theory in various typologically diverse languages including Acehnese Afrikaans Basque Dutch Finnish French German Hungarian Japanese Korean Navajo Portuguese Tshixa Terena Tswana Tuvan and Zoque The subjects dealt with in the book include feature geometry underspecification in rule based and in Optimality Theoretic treatments and the phonetic implementation of phonological features Other topics include laryngeal features e.g. voice spread glottis nasal and place features for consonants and vowels The volume will be of interest to all linguists and advanced students of linguistics working on feature theory and or the phonetics phonology interface

Postvelar Harmony Kimary N. Shahin, 2003-01-30 This book examines the formal bases of postvelar harmony and its crosslinguistic variation It is of interest especially to phonologists concerned with segmental harmony and its explanation within Optimality Theory Postvelar harmony in two unrelated languages Palestinian Arabic and St. Timothy's Salish is examined in detail The result is the first comprehensive clarification of postvelar phonology for either language Two harmonies are distinguished uvularisation harmony emphasis spread and pharyngealisation tongue root retraction harmony The distinction between these two in the Arabic and the Salish is supported by much instrumental phonetics data The complex harmony properties are explained as the result of systematic interaction between Correspondence Alignment and Grounded constraints In the course of the investigation the segmental inventories of both languages are clarified and a careful understanding of the distinction between phonology and phonetics and the use of phonetics in phonology is applied

Production, Perception, and Phonotactic Patterns Alexei Kochetov, 2013-12-16 First Published in 2002 Production Perception and Phonotactic Patterns presents the first experimental study of articulatory dynamics of Russian and of secondary articulants in general with a special focus on the nature of positional markedness scales one of the key concepts in the current phonological theory Optimality Theory Through a series of experiments the author questions the traditional assumption that positional markedness scales are directly encoded in Universal Grammar and provides an alternative account based on gestural recoverability This study combines a sophisticated and in depth analysis of language particular phonetic detail with wide cross linguistic generalisations and contributes to the increasingly influential body of research that investigates phonetic factors in the search for explanations of phonological universals

Functionalism and Formalism in Linguistics: General papers Mike Darnell, 1999 The 23rd UWM Linguistics Symposium 1996 brought together linguists of opposing theoretical approaches functionalists and formalists in order to determine to what extent these approaches really differ from each other and to what extent the approaches complement each other The two volumes of Functionalism and Formalism in Linguistics contain a careful selection of the papers originally presented at the symposium Volume I includes papers discussing the two basic approaches to linguistics with contributions by Werner Abraham Stephen R. Anderson Joan L.

Hassan,Barry Heselwood,2011-12-21 Brought together in this volume are fourteen studies using a range of modern instrumental methods acoustic and articulatory to investigate the phonetics of several North African and Middle Eastern varieties of Arabic Topics covered include syllable structure quantity assimilation guttural and emphatic consonants and their pharyngeal and laryngeal mechanisms intonation and language acquisition In addition to presenting new data and new descriptions and interpretations a key aim of the volume is to demonstrate the depth of objective analysis that instrumental methods can enable researchers to achieve A special feature of many chapters is the use of more than one type of instrumentation to give different perspectives on phonetic properties of Arabic speech which have fascinated scholars since medieval times The volume will be of interest to phoneticians phonologists and Arabic dialectologists and provides a link between traditional qualitative accounts of spoken Arabic and modern quantitative methods of instrumental phonetic analysis

Data and Methods in Corpus Linguistics Ole Schützler,Julia Schlüter,2022-05-26 Corpus linguistics continues to be a vibrant methodology applied across highly diverse fields of research in the language sciences With the current steep rise in corpus sizes computational power statistical literacy and multi purpose software tools and inspired by neighbouring disciplines approaches have diversified to an extent that calls for an intensification of the accompanying critical debate Bringing together a team of leading experts this book follows a unique design comparing advanced methods and approaches current in corpus linguistics to stimulate reflective evaluation and discussion Each chapter explores the strengths and weaknesses of different datasets and techniques presenting a case study and allowing readers to gauge methodological options in practice Contributions also provide suggestions for further reading and data and analysis scripts are included in an online appendix This is an important and timely volume and will be essential reading for any linguist interested in corpus linguistic approaches to variation and change *The Texture of the Lexicon* Ray Jackendoff,Jenny Audring,2020 This volume offers a major reconceptualization of linguistic theory through the lens of morphology crucially collapsing the distinction between the lexicon and the grammar This approach accounts for both productive and non productive morphological phenomena and moreover integrates linguistic theory into psycholinguistics and human cognition The Internal

Organization of Phonological Segments Marc van Oostendorp, Jeroen van de Weijer, 2012-03-12 This book contains a number of studies on modern approaches to phonological segment structure. There are three main sections: i a general section concerned with the basic theory of segmental structure features and the organization of segmental structure into feature geometric trees; ii the representation and behaviour of nasality; and iii the representation and behaviour of the laryngeal features.

Language and Music as Cognitive Systems Patrick Rebuschat, 2012 The past 15 years have witnessed an increasing interest in the comparative study of language and music as cognitive systems. This book presents an interdisciplinary study of language and music exploring the following core areas: structural comparisons, evolution, learning and processing, and neuroscience.

Phonological Representations John Coleman, 2005-11-24 Rewriting rules, derivations and underlying representations are an enduring characteristic of generative phonology. In this book John Coleman argues that this is unnecessary. The expressive resources of context-free Unification grammars are sufficient to characterize phonological structures and alternations. According to this view, all phonological forms and constraints are partial descriptions of surface representations. This framework, now called Declarative Phonology, is based on a detailed examination of the formalisms of feature theory, syllable theory, and the leading varieties of nonlinear phonology. Dr Coleman illustrates this with two extensive analyses of the phonological structure of words in English and Japanese. As Declarative Phonology is surface-based and highly restrictive, it is consistent with cognitive psychology and amenable to straightforward computational implementation.
