Lafia, 2015 We no longer live in the society of the spectacle passively seeing the world Now we perform our very own spectacle in a society that demands it at every turn We've become advertisements of ourselves our own PR agents continually putting on a performance and measuring it hour by hour This is no longer the society of the spectacle but the society of performance All events have become a pretense to create the image to orchestrate an image of images that is us We believe the image confers on us a kind of immortality just as the artist believes her works collected by a major museum will do the same we believe the network will forever host the archive we build everyday The image that is us lives in the circulation of the network Though a file though virtual and malleable made out of bits and instantly accessible to anyone who wants to find it around the world this image that lives only lives on screen as virtual as it might be is a material fact In its impression its reception its archivability its remixability the electronic image is today's photograph At once artist book and critical theory Image Photograph takes its direction from Walter Benjamin's Arcades John Berger's Ways of Seeing and more recently Hito Steyerl's The Wretched of the Screen Throughout it Lafia not only writes about the image but constructs images and finally performs this new space of the image photograph
