Photography ,1990 **Photography** J. Paul Getty museum (Los Angeles, Calif.),1990 **The History of the Discovery of Photography** Georges Potonniée,1936 Photography ,1990 Photography ,1990 **Photography and Its Origins** Tanya Sheehan,Andres Zervigon,2014-11-20 Recent decades have seen a flourishing interest in and speculation about the origins of photography Spurred by rediscoveries of first photographs and proclamations of photography s death in the digital age scholars have been rethinking who and what invented the medium Photography and Its Origins reflects on this interest in photography s beginnings by reframing it in critical and specifically historiographical terms How and why do we write about the origins of the medium Whom or what do we rely on to construct those narratives What s at stake in choosing to tell stories of photography s genesis in one way or another And what kind of work can those stories do Edited by Tanya Sheehan and Andr s Mario Zervig n this collection of 16 original essays illustrated with 32 colour images showcases prominent and emerging voices in the field of photography studies Their research cuts across disciplines and methodologies shedding new light on old questions about histories and their writing Photography and Its Origins will serve as a valuable resource for students and scholars in art history visual and media studies and the history of science and technology **Photography: Discovery and Invention** Weston J. Naef,1989 *Encyclopedia of Nineteenth-Century Photography* John Hannavy,2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Its coverage is global an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena Coverage includes all the key people processes equipment movements styles debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool creative medium and recorder of everyday life which it had become by the dawn of the twentieth century The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics students researchers and libraries worldwide **Experimental Photography, Discovery & Invention** J. Paul Getty Museum,Weston J. Naef,1989 *First Exposures* Steffen Siegel,2017-08-01 An exact date for the invention of photography is evasive Scientists and amateurs alike were working on a variety of photographic processes for much of the early nineteenth century Thus most historians refer to the year 1839 as the first year of photography not because the sensational new medium was invented then but because that is the year it was introduced to the world After more than 175 years and for the first time in English First Exposures Writings from the Beginning of Photography brings together more than 130 primary sources from that very year 1839 subdivided into ten chapters and accompanied by fifty three images of significant visual

and historical importance This is an astonishing work of discovery selection and thanks to Steffen Siegel s introductory texts notes and afterword elucidation The range of material is impressive not only all the chemical and technological details of the various processes but also contracts speeches correspondence of every kind arguments parodies satires eulogies denunciations journals and even some poems Revealing through firsthand accounts the competition the rivalries and the parallels among the various practitioners and theorists this book provides an unprecedented way to understand how the early discourse around photographic techniques and processes transcended national boundaries and interconnected across Europe and the United States

Photography: History and Theory Jae Emerling,2013-03-01 Photography History and Theory introduces students to both the history of photography and critical theory From its inception in the nineteenth century photography has instigated a series of theoretical debates In this new text Jae Emerling therefore argues that the most insightful way to approach the histories of photography is to address simultaneously the key events of photographic history alongside the theoretical discourse that accompanied them While the nineteenth century is discussed the central focus of the text is on modern and contemporary photographic theory Particular attention is paid to key thinkers such as Baudelaire Barthes and Sontag In addition the centrality of photography to contemporary art practice is addressed through the theoretical work of Allan Sekula John Tagg Rosalind Krauss and Vil m Flusser The text also includes readings of many canonical photographers and exhibitions including Atget Brassai August Sander Walker Evans The Family of Man Diane Arbus Lee Friedlander Cindy Sherman Bernd and Hilla Becher Sebastiao Salgado Jeff Wall and others In addition Emerling provides close readings of key passages from some major theoretical texts These glosses come between the chapters and serve as a conceptual line that connects them Glosses include Roland Barthes The Rhetoric of the Image 1964 Susan Sontag Regarding the Pain of Others 2002 Michel Foucault on the archive 1969 Walter Benjamin Little History of Photography 1931 Vil m Flusser Towards a Philosophy of Photography 1983 A substantial glossary of critical terms and names as well as an extensive bibliography make this the ideal book for courses on the history and theory of photography
