Angeletti, 1993-09-30 Dimethylsulphide DMS emitted by marine phytoplankton is the second most important source of atmospheric sulphur after anthropogenic SO₂ In the atmosphere DMS is transformed into condensable acidic sulphur products and through gas to particle conversion it becomes the most important natural source of atmospheric sulphate aerosols Possible climatic effects have been suggested linked to the negative radiative forcing due to scattering of solar radiation and especially to modification of cloud albedo over oceans by sulphate aerosol particles These effects occur in addition to those deriving from the superimposed anthropogenic component of the atmospheric sulphate Understanding the cycle of DMS in the marine troposphere and its interaction with the aerosol budget and cloud properties has become a key research target in these last years Our knowledge of the many processes involved is still fragmentary however This book which updates the state of our comprehension of the marine DMS cycle with special regard to its climatic impact will be of interest to marine biologists atmospheric chemists aerosol physicists and climatologists and to scientists concerned with changes in the Earth's climate *Ullmann's Industrial Toxicology* Wiley-VCH, 2005-10-28 The one stop resource for health protection professionals environmental scientists and safety engineers Since the entire 40 volume Ullmann's Encyclopedia is inaccessible to many readers particularly individuals smaller companies or institutes all the information on industrial toxicology ecotoxicology process safety as well as occupational health and safety has been condensed into this convenient 2 volume set Based on the latest online edition of Ullmann's containing articles never before in print this ready reference

Foote,Joan Selverstone Valentine,A. Greenberg,Joel F. Liebman,2012-12-06

Taking an interdisciplinary approach this book and its counterpart *Active Oxygen in Biochemistry* explore the active research area of the chemistry and biochemistry of oxygen Complementary but independent the two volumes integrate subject areas including medicine biology chemistry engineering and environmental studies **Modern Agriculture and the Environment** David Rosen,E. Tel-Or,Y. Hadar,Y. Chen,2012-12-06

This volume comprises the proceedings of the First International Rehovot Conference on Modern Agriculture and the Environment held at the Rehovot Campus of the Faculty of Agriculture the Hebrew University of Jerusalem Israel 2 6 October 1994 The conference first in a series intended to be convened in Rehovot at 4 5 year intervals to address various aspects of the interaction of agriculture and the environment was initiated organised and carried out under the auspices of the Faculty of Agriculture the leading academic institution in agricultural and environmental studies in Israel It featured four keynote addresses 39 invited lectures 40 submitted papers and 62 posters Of these 51 articles written by 122 contributing authors from 14 countries were selected by the editors to be presented in this book All through the twentieth century and especially ever since the advent of the Green Revolution modern agriculture has been striving to feed and clothe the ever increasing multitudes of the human species through improved technology relying heavily on tremendous inputs of fertilisers pesticides and various other agrochemicals Undoubtedly this has been a great blessing to mankind and enormous strides have indeed been made in the never ending struggle against starvation but these have been achieved at a very steep

price of increased environmental deterioration In fact modern agriculture has become one of the major factors contributing to the degradation of the world's fragile biosphere
