Photosensitive Epilepsy:

Photosensitive Epilepsy Graham F. A. Harding, Peter M. Jeavons, 1994-01-10 The most comprehensive review of current knowledge on photosensitive epilepsy in humans A Mac Keith Press Publication **A Clinical Guide to Epileptic Syndromes and their Treatment** C. P. Panayiotopoulos, 2010-05-10 A disorder which affects 4 percent of children and 1 2 percent of the general population epilepsy is one of the most common neurological disorders The original edition of C P Panayiotopoulos guide proved to be the only one of its kind covering many important aspects of diagnosis and treatment Due to the continued advances being made in the subject a second edition is now due The text includes detailed diagnostics concise descriptions of syndromes a wealth of practical tips and is supported by useful tables to enable clear diagnoses Building on the sell out success of the first edition this thorough revision reflects the latest report of the ILAE classification core group and the significant progress made in the diagnosis classification and treatment of the epilepsies This new edition is indispensable reading for all those who care for patients with epileptic seizures **A Practical Guide to Supporting People with Epilepsy** Rebecca Case, Sinead Blake, 2020-05-08 This book is a practical guide with rationale to supporting people with epilepsy It encompasses epilepsy guidance such as NICE 2012 revised 2019 The Equality Act 2010 the children and families act 2014 current evidence based practice and regulatory organisation standards It is predominantly aimed at nurses and student nurses especially those studying learning disability nursing but also residential respite and supported living services schools and family carers to enable them to offer appropriate and evidence based support to people with epilepsy of all ages It is estimated there are approximately 1200 epilepsy related deaths each year in the UK Many of these are considered to be preventable High profile cases have led to an increase in anxiety in people providing services and greater scrutiny of those services by regulatory bodies Over the years the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom Electroencephalography Ernst Niedermeyer, F. H. Lopes da Silva, 2005 Established in 1982 as the leading reference on electroencephalography Drs Niedermeyer s and Lopes da Silva s text is now in its thoroughly updated Fifth Edition An international group of experts provides comprehensive coverage of the neurophysiologic and technical aspects of EEG evoked potentials and magnetoencephalography as well as the clinical applications of these studies in neonates infants children adults and older adults This edition includes digital EEG and advances in areas such as neurocognition Three new chapters cover the topics of Ultra Fast EEG Frequencies Ultra Slow Activity and Cortico Muscular Coherence Hundreds of

EEG tracings and other illustrations complement the text

Photosensitive Epilepsy Dorothea Kasteleijn, 2016-03-08 In epilepsy the term photosensitivity is used both for a epileptic seizures triggered by flashing or flickering light such as strobe lights television videogames striped visual patterns and b epileptiform discharges evoked by intermittent photic stimulation IPS during an EEG recording Most patients with a clear history of visually induced seizures will show epileptiform EEG discharges during IPS so called photoparoxysmal responses PPRs As epileptiform discharges can be evoked in photosensitive patients at any time and repeatedly when awake without triggering seizures they can be considered a useful surrogate marker to determine necessity and efficacy of epilepsy treatment With the increasing exposure of children adolescents to a variety of new potentially provocative visual stimuli this book offers a detailed account of all aspects of photosensitive epilepsy including genetic testing functional imaging fMRI MEG pharmacological studies animal studies classification based on the occurrence of PPRs in different epilepsy syndromes as well as prevention and treatment options In addition the comorbidity and overlap between migraine and epilepsy will be discussed The book provides EEG examples and a glossary and will serve as an easily accessible guide to photosensitive epilepsy for clinicians such as pediatricians pediatric neurologists epileptologists child psychiatrists clinical geneticists neuropsychologists as well as for neuropharmacologists occupational therapists and basic scientists
