Virtual Machines Iain D. Craig, 2010-05-17 I love virtual machines VMs and I have done for a long time If that makes me sad or an anorak so be it I love them because they are so much fun as well as being so useful They have an element of original sin writing assembly programs and being in control of an entire machine while still being able to claim that one is being a respectable member of the community being structured modular high level object oriented and so on They also allow one to design machines of one's own unencumbered by the restrictions of a start optimising it for some physical particular processor at least until one processor or other I have been building virtual machines on and off since 1980 or thereabouts It has always been something of a hobby for me it has also turned out to be a technique of great power and applicability I hope to continue working on them perhaps on some of the ideas outlined in the last chapter I certainly want to do some more work with register based VMs and concurrency I originally wanted to write the book from a purely semantic viewpoint
