**Modern Jazz Trumpet Legends** Larry Kemp, 2018-06-26 Modern Jazz Trumpet Legends By Larry Kemp Modern Jazz Trumpet Legends is an examination of the lives and contributions of jazz trumpeters born between 1925 and 1940. Included are Miles Davis, Maynard Ferguson, Doc Severinsen, Chet Baker, and Clifford Brown, along with scores of other men and women who created jazz with a trumpet. This is an essential guide for the student of jazz, those interested in history, and those who just like to read entertaining true stories about the most colorful people. The Jazz Trumpet Legends three-volume series is the most comprehensive book on the subject. In the series, 867 trumpeters are discussed. The second volume covers the trumpeters in the center of the history of jazz. There are the sad stories of those who died too young: Clifford Brown at 25, Ray Wetzel at 27 from automobile accidents, Joe Gordon at 35 from a house fire, Booker Little at 23 from uremia, balanced by the positive stories of those who accomplished much with their lives. Miles Davis invented cool jazz and fusion. Maynard Ferguson took the trumpet to new heights. Lionel Ferbos performed regularly for a couple of years after his hundredth birthday. Clara Bryant and Betty O'Hara showed that women could get the job done on the trumpet. Modern Jazz Trumpet Legends contains two appendices that apply to trumpeters in all three volumes: a yearly calendar showing for each day of the year the trumpeters born on that date, and a geographical listing of the states and countries showing for each place the trumpeters born there. Early Jazz Trumpet Legends is the first of three volumes organized chronologically by date of birth. The second volume, Modern Jazz Trumpet Legends, covers those born between 1925 and 1940, and the third volume, Current Jazz Trumpet Legends, covers those born after 1940.

**Sound of Music** Stephen Gislason,2018-06-01 book by Stephen Gislason emerged from his Music Notes collected over many years The topics cover a wide range of interests from the history of instruments music theory composing to the most current technologies involved in music composition and sound recording A special chapter on the Musical Brain explains current knowledge in the brain processing of sound as it applies to language and music decoding A chapter on the Music Business reviews the dramatic changes in music marketed and discusses some of the dilemmas and controversies facing musicians Preface This book emerged from notes I have kept for several decades I have spent much time studying music theory electronics applied to sound reproduction and to performance skills I decided to assemble my music notes so that any person interested in music could benefit from simple clear explanations Music descriptions often are too complicated and the use of terms can be inconsistent and confusing As with other subjects I have tackled I assumed that with a little extra effort more precise descriptions would be welcomed by readers seeking a practical understanding of music The book begins with a consideration of what sound is and how animals use sounds to communicate Music is not a human invention but we do elaborate sound communication more than other animals in our production of both speech and musical performances The discussion continues with noise an important topic that is poorly understood A well informed musician will refrain from making noise and understand Ambrose Bierce when he stated Of all noise music is the less offensive I include acoustic and electronic instruments in my discussions of music creation In my world electronics dominate every aspect of work and play and most music I create and listen to was created stored and distributed electronically The art and science of recording is an important study for all 21st century musicians Increased sophistication about the nature of sound the art of combining musical sounds and the effect on the listener s brain are all required for music to advance beyond noise toward a more effective means of human communication Stephen
