nowhere better highlighted than in the changing focus on children's engagement with music from the musical appreciation lessons of the 1920s and 1930s to the post war concentration on performance and the 1970s emphasis on improvisation and composition. There and many other trends are discussed in the book allowing today's music educators to see their own practice in its historical context. *Music Education as Critical Theory and Practice* Lucy Green, 2017-07-05. This collection of previously published articles, chapters and keynotes traces both the theoretical contribution of Lucy Green to the emergent field of the sociology of music education and her radical hands on practical work in classrooms and instrumental studios. The selection contains a mixture of material from essays that have appeared in major journals and books to some harder to find publications. It spans issues from musical meaning, ideology, identity and gender in relation to music education to changes and challenges in music curricula and pedagogy and includes Green's highly influential work on bringing informal learning into formal music education settings. A newly written introduction considers the relationship between theory and practice and situates each essay in relation to some of the major influences within and beyond the field of music education which affected Green's own intellectual journey from the 1970s to the present day.
