With contributions from leading scholars across the entire range of French studies, this up-to-date volume examines both the current state of French studies in the United Kingdom as well as its future in an increasingly interdisciplinary world where student demand, new technologies, and developments in transnational education are changing the ways in which we teach, learn, research, and assess achievements. Mass Media James B. Martin, 2002. Mass media has become an integral part of the human experience. News travels around the world in a split second, affecting people in other countries in untold ways. Although being on top of the news may be good at least for news junkies, mass media also transmits values or the lack thereof, condenses complex events and thoughts to simplified sound bites, and often ignores the essence of an event or story. The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author, title, and subject indexes.

Twentieth-century Popular Culture in Museums and Libraries Fred E. H. Schroeder, 1981. Although libraries and museums for many centuries have taken the lead under one rationale or another in recovering, storing, and displaying various kinds of culture of their

periods lately as the gap between elite and popular culture has apparently widened these repositories of artifacts of the present for the future have tended to drift more and more to what many people call the aesthetically pleasing elements of our culture The degree to which our libraries and museums have ignored our culture is terrifying when one scans the documents and artifacts of our time which if history in any wise repeats itself will in the immediate and distant future become valuable indices of our present culture to future generations As Professor Schroeder dramatically states it No doubt about it it is the contemporary popular culture that is the endangered species The essays in this book investigate the reasons for present day neglect of popular culture materials and chart the various routes by which conscientious and insightful librarians and museum directors can correct this disastrous oversight Contemporary France David Howarth, Georgios

Varouxakis, 2014-03-18 At least since the French Revolution France has the peculiar distinction of simultaneously fascinating charming and exasperating its neighbours and foreign observers Contemporary France provides an essential introduction for students of French politics and society exploring contemporary developments while placing them in a deeper historical intellectual cultural and social context that makes for insightful analysis Thus chapters on France's economic policy and welfare state its foreign and European policies and its political movements and recent institutional developments are informed by an analysis of the country's unique political and institutional traditions distinct forms of nationalism and citizenship dynamic intellectual life and recent social trends Summaries of key political economic and social movements and events are displayed as exhibits *French Cartoon Art in the 1960s and 1970s* Wendy Michallat, 2018-07-25

Pilote's unique position in a new and fast developing youth press market The French comic magazine Pilote hebdomadaire arrived in a weakening comics market in 1959 largely dominated by syndicated translations of American comics and comics inspired by a Catholic ethos It tailored its content and tone to an older adolescent reader far removed from that of France's infant comic Pilote's profile set it on a turbulent course subject to the vicissitudes and fickleness of fashion which situated it within an emerging teenager press under pressure to renew and innovate to survive When it made cartoons its defining characteristic in 1963 Pilote articulated its uniqueness by channelling teenager discourse through them whilst also trying to encourage a zest for education in a modernising and economically buoyant France of exciting new opportunities Pilote's cartoon art thus became a dynamic repository for the ideas and attitudes of France's educated youth which evolved into the radical discourses of the lifestyle and political revolutions of the late 1960s and early 1970s This book tells how Pilote hebdomadaire's unique positioning in a new and fast developing youth press market for teenagers provided the forum and catalyst for the bande dessinée's stylistic evolution over the course of the 1960s and 1970s *Encyclopedia of African History 3-Volume Set* KEVIN SHILLINGTON., 2005 *The Cultural and Intellectual Rebuilding of France After the Second World War* M.

Kelly, 2004-09-23 This book reveals how France reinvented itself in the aftermath of World War Two After foreign military interventions the French political and intellectual elites embraced regime change and launched an urgent programme of

nation building They rebuilt French national identity with whatever material was available and created a vibrant new cultural and intellectual life The cost to subordinated groups however especially women still casts a long shadow over French values and attitudes In this perhaps there are lessons and implications for other countries struggling to rebuild themselves after conflict

Americanism, Media and the Politics of Culture in 1930s France David A. Pettersen, 2016-05-20 First book to focus on Americanism and its consideration of French film and literature The book is organized around individual figures texts and films making it easy to adopt for individual units in courses The book is written in clear accessible and jargon free language The book brings a new and innovative transatlantic perspective to 1930s French culture The books offers new perspectives on important figures that we thought we knew well The book mixes cultural history with the analysis of individual films and novels in a way that is engaging to read

France's Modernising Mission Ed Naylor, 2017-12-12 This volume explores how France s modernising mission unfolded during the post war period and its reverberations in the decades after empire In the aftermath of the Second World War France sought to reinvent its empire by transforming the traditional civilising mission into a modernising mission Henceforth French claims to rule would be based on extending citizenship rights and the promise of economic development and welfare within a Greater France In the face of rising anti colonial mobilization and a new international order redefining the terms that bound colonised peoples and territories to the metropole was a strategic necessity but also a dynamic which Paris struggled to control The language of reform and equality was seized upon locally to make claims on metropolitan resources and wrest away the political initiative Intertwined with coercion and violence the struggle to define what modernisation would mean for colonised societies was a key factor in the wider process of decolonisation Contributions by leading specialists extend geographically from Africa to the Pacific and to metropolitan France itself examining a range of topics including education policy colonial knowledge production rural development and slum clearance
