Popular Development: Rethinking the Theory and Practice of Development Brohman John, 1996 [Recovering Resources - Recycling Citizenship](#) Jutta Gutberlet, 2016-04-08 Environmental awareness and social mobilization is a growing issue in Latin America This book discusses how co operative recycling practices have been increasingly used as a strategy to

contest both the waste problem and urban poverty Selective waste collection and sorting materials out of the garbage stream has become a widespread survival strategy for the economically excluded population While severe and chronic occupational health problems and risks are very common among the recycling workers thousands of people exclusively depend on accessing these resources By examining experiences from Brazil and other Latin American countries this book questions what can be done to improve the environment and livelihoods for these excluded citizens examines the specific health and risk implications and looks at the many innovative recycling co ops and associations which have recently emerged creating an exciting new form of solidarity economy In doing so it uncovers the landscapes of despair populated by the urban marginalized but also the landscapes of hope where solidarity and collaboration make a pathway to a better way of life

Critical Development Theory Ronaldo Munck, Denis O'Hearn, 1999-03 In the late 20th century there has been a rethinking of the whole concept of development including a growing awareness of its gender cultural and environmental dimensions and the impact of globalization The contributors to this volume seek to extend these debates to a more fundamental level tackling such issues as the crisis of development as an intellectual and practical project the need for a break with development as a Eurocentric concept and the viability of alternative non Western forms of development The contributors aim to transcend critiques of development which simply engage in a blanket dismissal of the whole enterprise and instead offer ways of re engaging with reality that despite globalization is still a dimension of the late 20th century

Burns, Marina Novelli, 2007-03-14 Tourism and Politics aims to disseminate ideas on the critical discourse of tourism and tourists as they relate to politics through a series of case studies from around the world written by specialists with an emphasis on linking theory to practice That tourism is a profoundly important economic sector for most countries and regions of the world is widely accepted even if some of the detail remains controversial However as tourism matures as a subject the theories underpinning it necessarily need to be more sophisticated tourism cannot be simply read as a business proposition with a series of impacts Wider questions of politics power and identity need to be articulated investigated and answered While the making and consuming of tourism takes place within complex political milieux with multiple stakeholders competing for benefit the implications are not fully understood Literature on tourism and politics is surprisingly limited This book will make a substantial contribution to the theoretical framework of tourism An Invitation to Environmental Sociology Michael Bell, 2009 I love your book it is one of the most fascinating I have ever read certainly the most riveting textbook The ideas you present are so on key I just wanted to let you know how incredible your book is Thank you for writing it Student at U Mass Boston Michael Bell covers the broad range of topics in environmental sociology with a personal passion rarely seen in sociology texts An Invitation to Environmental Sociology 3 e challenges readers with the complexity of environmental puzzles After reading this book students will be informed and enabled to make their own private and public choices and inspired to care about the social footprints on the planet *Degrowth in Tourism* Konstantinos Andriotis, 2018-07-27 The modern day world faces a hostile climate depleted resources and the destruction of habitats The dream that growth will lead to a materialistic utopia is left unfulfilled by a lack of ecological and economic capacity The only choice is to find alternatives to increased growth transform the structures and institutions currently shaping the world change lifestyles and articulate a more credible vision for the future and lasting prosperity As a reaction to the problems accrued by capitalism new development approaches such as the concept of degrowth have evolved Degrowth in Tourism explores newly emerging development and philosophical approaches that provide more equity for host communities and offer a low carbon future by looking at alternatives to the classic models of development and applying the concept of degrowth in a tourism context Proposing that we need to shift tourism research from models which prioritize commodified tourism experiences to those that offer alternative decommodified ones this book Provides topical analysis and illustrates the key themes of degrowth Discusses the relationship between tourism and degrowth from both a historic perspective and through contemporary patterns of activity Includes international examples and case studies to translate theory into practical new

approaches A comprehensive review of the subject this book will be of great interest to researchers and practitioners within tourism development environment and economics as well as those specifically studying degrowth *Muslim*
