Lim,Paul H. De Neui,2006 We issue this book amidst the challenges arising from the resurgence of religions in the various nations of the post modern world As Islamic fundamentalism grabs the headlines Buddhist fundamentalism has also been on the rise particularly in Southeast Asia mainly in reaction to the conversionist incursions of Islam and Christianity among them Over the last thirty years Buddhism has also seen growth in the West as it s non dogmatic rationality offer of spiritual mentoring and opportunity for personal transformation have made it attractive to post modern society Are there both theological approaches as well as

practical strategies for evangelical Christians to use our evangelization efforts among Buddhists without any unnecessary problems to the increasing conflicts in the encounter of religions. We believe there are. This is the fourth and latest volume in the Buddhist World series which includes *Sharing Jesus in the Buddhist World*, *Sharing Jesus Holistically with the Buddhist World*, and *Sharing Jesus Effectively in the Buddhist World*. Compiled from papers presented at the annual SEANET Missiological Forum in Thailand, *Communicating Christ in the Buddhist World* delivers fresh insights from mission theologians and practitioners. The first four chapters reflect on the theological framework by which Christians can fulfill the biblical mandate to evangelize and transform peoples. The next five chapters consider the significant sociological issues that have arisen in the Christian encounter with Buddhist peoples. The final three suggest some strategic ways forward for effective evangelism in the Buddhist world. May this book challenge the international Christian community to find better ways of relating to and approaching people of other faiths.

The Routledge Handbook of Vegan Studies Laura Wright, 2021-03-31 This wide ranging volume explores the tension between the dietary practice of veganism and the manifestation, construction and representation of a vegan identity in today's society. Emerging in the early 21st century, vegan studies is distinct from more familiar conceptions of animal studies, an umbrella term for a three pronged field that gained prominence in the late 1990s and early 2000s, consisting of critical animal studies, human animal studies and posthumanism. While veganism is a consideration of these modes of inquiry, it is a decidedly different entity, an ethical delineator that for many scholars marks a complicated boundary between theoretical pursuit and lived experience. *The Routledge Handbook of Vegan Studies* is the must have reference for the important topics, problems and key debates in the subject area and is the first of its kind. Comprising over 30 chapters by a team of international contributors, this handbook is divided into five parts: History of vegan studies, Vegan studies in the disciplines, Theoretical intersections, Contemporary media entanglements, Veganism around the world. These sections contextualize veganism beyond its status as a dietary choice, situating veganism within broader social, ethical, legal, theoretical and artistic discourses. This book will be essential reading for students and researchers of vegan studies, animal studies and environmental ethics.

Theological Incorrectness Jason Slone, 2007-12-03 Why do religious people believe what they shouldn't? Not what others think they shouldn't believe, but things that don't accord with their own avowed religious beliefs. Jason Slone terms this phenomenon theological incorrectness. He argues that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously. Human minds are great at coming up with innovative ideas that help them make sense of the world, he says, but those ideas do not always jibe with official religious beliefs. From this fact we

derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't
