Ehrlich,2001-12-31 Why do we behave the way we do Biologist Paul Ehrlich suggests that although people share a common genetic code these genes do not shout commands at us at the very most they whisper suggestions He argues that human nature is not so much result of genetic coding rather it is heavily influenced by cultural conditioning and environmental factors With personal anecdotes a well written narrative and clear examples Human Natures is a major work of synthesis and scholarship as well as a valuable primer on genetics and evolution that makes complex scientific concepts accessible to lay readers The Evolution of Primate Societies John C. Mitani,Josep Call,Peter M. Kappeler,Ryne A. Palombit,Joan B. Silk,2012-10-24 In 1987 the University of Chicago Press published Primate Societies the standard reference in the field of primate behavior for an entire generation of students and scientists But in the twenty five years since its publication new theories and research techniques for studying the Primate order have been developed debated and tested forcing scientists to revise their understanding of our closest living relatives Intended as a sequel to Primate Societies The Evolution of Primate Societies compiles thirty one chapters that review the current state of knowledge regarding the behavior of nonhuman primates Chapters are written by the leading authorities in the field and organized around four major adaptive problems primates face as they strive to grow maintain themselves and reproduce in the wild The inclusion of chapters on the behavior of humans at the end of each major section represents one particularly novel aspect of the book and it will remind readers what we can learn about ourselves through research on nonhuman primates The final section highlights some of the innovative and cutting edge research designed to reveal the similarities and differences between nonhuman and human primate cognition The Evolution of Primate Societies will be every bit the landmark publication its predecessor has been The Hadza Frank Marlowe,2010-03-23 In The Hadza Frank Marlowe provides a quantitative ethnography of one of the last remaining societies of hunter gatherers in the world The Hadza who inhabit an area of East Africa near the Serengeti and Olduvai Gorge have long drawn the attention of anthropologists and archaeologists for maintaining a foraging lifestyle in a region that is key to understanding human origins Marlowe ably applies his years of research with the Hadza to cover the traditional topics in ethnography subsistence material culture religion and social structure But the book s unique contribution is to introduce readers to the more contemporary field of behavioral ecology which attempts to understand human behavior from an evolutionary perspective To that end The Hadza also articulates the necessary background for readers whose exposure to human evolutionary theory is minimal *The Museum* Walter F. Webb,1897 The Science of Happiness Bruce

Hood,2024-12-03 World renowned happiness expert Bruce Hood presents seven simple but life changing lessons that Booklist calls a fresh mix of accessible science common sense and examples from a variety of countries to help readers reconnect with the things that truly matter Over seven lessons grounded in decades of studies in neuroscience and developmental psychology The Science of Happiness tells a radical new story about the roots of well being with practical takeaways that show how we can all re wire our thinking and transform our lives The problem with achieving happiness is the way the human mind is designed by evolution to process the world from an egocentric perspective and focus on the threats that might shorten our lives Socially dependent on others egocentric children grow into adults who may be less self centred but end up becoming dissatisfied because we are prone to focus on the wrong information and comparisons when it comes to evaluating our lives We need to get out of our heads by connecting with others and the world around us through practices that have proven to make us happier *Books In Print 2004-2005* Ed Bowker Staff,Staff Bowker, Ed,2004

Principles of Evolutionary Medicine Peter D. Gluckman,Alan Beedle,Tatjana Buklijas,Felicia Low,Mark A. Hanson,2016 A new updated edition of the first integrated and comprehensive textbook to explain the principles of evolutionary biology from a medical perspective and to focus on how medicine and public health might utilise evolutionary biology Father Time Sarah Blaffer Hrdy,2024-05-14 A masterful synthesis of how it came to be that today men are taking care of very young babies given that this is unprecedented in the history of mammals apes and humans **Hunter-Gatherer Childhoods** Barry S. Hewlett,2017-07-28 In the vast anthropological literature devoted to hunter gatherer societies surprisingly little attention has been paid to the place of hunter gatherer children Children often represent 40 percent of hunter gatherer populations thus nearly half the population is omitted from most hunter gatherer ethnographies and research This volume is designed to bridge the gap in our understanding of the daily lives knowledge and development of hunter gatherer children The twenty six contributors to Hunter Gatherer Childhoods use three general but complementary theoretical approaches evolutionary developmental cultural in their presentations of new and insightful ethnographic data For instance the authors employ these theoretical orientations to provide the first systematic studies of hunter gatherer children s hunting play infant care by children weaning and expressions of grief The chapters focus on understanding the daily life experiences of children and their views and feelings about their lives and cultural change Chapters address some of the following questions why does childhood exist who cares for hunter gatherer children what are the characteristic features of hunter gatherer children s development and what are the impacts of culture change on hunter gatherer child care The book is divided into five parts The first section provides historical theoretical and conceptual framework for the volume the second section examines data to test competing hypotheses regarding why childhood is particularly long in humans the third section expands on the second section by looking at who cares for hunter gatherer children the fourth section explores several developmental issues such as weaning play and loss of loved ones and the final section examines the impact of sedentism and schools on hunter gatherer

children This pioneering volume will help to stimulate further research and scholarship on hunter gatherer childhoods th

Evolutionary Perspectives on Infancy Sybil L. Hart, David F. Bjorklund, 2022-01-01 This unique volume is one of the first of its kind to examine infancy through an evolutionary lens identifying infancy as a discrete stage during which particular types of adaptations arose as a consequence of certain environmental pressures Infancy is a crucial time period in psychological development and evolutionary psychologists are increasingly recognizing that natural selection has operated on all stages of development not just adulthood The volume addresses this crucial change in perspective by highlighting research across diverse disciplines including developmental psychology evolutionary developmental psychology anthropology sociology nutrition and primatology Chapters are grouped into four sections Theoretical Underpinnings Brain and Cognitive Development Social Emotional Development Life and Death *Evolutionary Perspectives on Infancy* sheds new light on our understanding of the human brain and the environments responsible for shaping the brain during early stages of development This book will be of interest to evolutionary psychologists and developmental psychologists biologists and anthropologists as well as scholars more broadly interested in infancy
