**Mathematical and Physical Papers** ,1911 William Thomson first Baron Kelvin 1824 1907 is best known for devising the Kelvin scale of absolute temperature and for his work on the first and second laws of thermodynamics though throughout his 53 year career as a mathematical physicist and engineer at the University of Glasgow he investigated a wide range of scientific questions in areas ranging from geology to transatlantic telegraph cables The extent of his work is revealed in the six volumes of his Mathematical and Physical Papers published from 1882 until 1911 consisting of articles that appeared in scientific periodicals from 1841 onwards Volume 5 published in 1911 includes articles from the period 1847 1908 Topics covered include thermodynamic and electrodynamic research as well as some works on issues of geological physics such as the possible age of the sun's heat

**The Vital Science (Routledge Revivals)** Peter Morton, 2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts

Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between The Origin of Species and Mendel **A History of Modern Planetary Physics** Stephen G. Brush,1996-04-26 Where did we come from Before there was life there had to be something to live on a planet a solar system During the past 200 years astronomers and geologists have developed and tested several different theories about the origin of the solar system and the nature of the Earth Did the Earth and other planets form as a by product of a natural process that formed the Sun Did the solar system come into being as the result of catastrophic encounter of two stars Is the inside of the Earth solid liquid or gaseous The three volumes that make up A History of Modern Planetary Physics present a survey of these theories Nebulous Earth follows the development of the nineteenth century s most popular explanation for the origin of the solar system Laplace s Nebular Hypothesis This theory supposes that a flattened mass of gas extending beyond Neptune s orbit cooled and shrank throwing off in the process successive rings that in time coalesced to form several planets **The Publishers' Circular and General Record of British and Foreign Literature** ,1889 **Catalogue of the Central Library** Sheffield. in American religious history which often stresses the evangelicalism of the era or the secularization said to be happening behind people's backs or assumes that skepticism was for intellectuals and ordinary people who stayed away from church were merely indifferent. Certainly the efforts of vocal infidels or freethinkers were dwarfed by the legions conducting religious revivals, creating missions and moral reform societies, distributing Bibles and Christian tracts, and building churches across the land. Even if few Americans publicly challenged Christian truth claims, many more quietly doubted, and religious skepticism touched and in some cases transformed many individual lives. Commentators considered religious doubt to be a persistent problem because they believed that skeptical challenges to the grounds of faith—the Bible, the church, and personal experience—threatened the foundations of American society. *Skepticism and American Faith* examines the ways that Americans—ministers, merchants and mystics, physicians, schoolteachers, and feminists, self-help writers, slaveholders, shoemakers, and soldiers—wrestled with faith and doubt as they lived their daily lives and tried to make sense of their world.
