WinklerPrins,Kent Mathewson,2021-01-12 This volume aims to present the essential work of geographer and historical ecologist William M Denevan to explain the impact and influence his thinking had on the conceptual advancement not only in his own discipline but in a range of related disciplines such as anthropology archaeology and environmental history The book is organized around eight themes demonstrating Denevan s early and profound insights on topics that remain of current relevance today and the scholarly impact his writing had on subsequent scholarship The book is unique because it offers commentary from

active scholars who address the impacts of Prof Denevan's thinking and work on contemporary environmental and ecological issues with a focus on several groundbreaking themes e.g. historical demography, agricultural landforms, cultural plant geography, human environmental impacts, indigenous agro-ecology, tropical agriculture, livestock and landscape, and synthetic contributions. This book will be of interest to a range of scholars in geography, anthropology, archaeology, history, and ecology, as well as to environmental managers and practitioners, especially those working for non-profit organizations and government organizations tasked with finding ways to adapt to global environmental change.

Managing E-Government Projects: Concepts, Issues, and Best Practices Aikins, Stephen Kwamena, 2012-01-31. This book collects the work of some of the best scholars and practitioners in the fields of e-government and project management who explore how e-government projects can be managed, planned, and executed with effective project management techniques and methodologies. Regional Cooperation, Intellectual Property Law and Access to Medicines Tolulope Anthony Adekola, 2023-12-05. This book examines the potential for regionalisation of intellectual property law and policy as a means of improving pharmaceutical access for least developed countries. The challenge of sustainable access to pharmaceuticals continues to be an issue of global significance. While much has been written on emerging economies in this context, least developed countries have been largely overlooked. This book fills this gap by taking the East African Community as a case study of developing and least developed countries to illustrate why and how a regional collective approach is preferred. It adopts a holistic approach in finding sustainable solutions to both IP and non-IP barriers to pharmaceutical access across a range of inter-related issues through a regional cooperative scheme. It evaluates factors that are necessary for successful regional cooperation, such as legal and policy coherence, WTO rule compliance, the threat of protectionism, regional competition rules, and so on, in order to produce legal and policy recommendations relevant to both existing and intending regional coalitions desiring to improve pharmaceutical access. It also looks beyond the scope of IP barriers to pharmaceutical access, examining non-IP related factors such as pharmaceutical market intelligence, local pharmaceutical manufacturing capacity, economies of scale, and purchasing power, medical regulation and quality assurance, technology transfer, and market size, amongst others. The book will be an invaluable resource for academics, researchers, and policy makers working in the areas of Public Health Law, International Trade Law, Intellectual Property Law, and Development Studies.
