Population And Development In The Third World

Allan M. Findlay

Population And Development In The Third World:

Population and Development in the Third World Allan M. Findlay, Anne Findlay, 2008-01-28 Allan and Anne Findlay argue that a nation's human population is a vital resource in the development process. Changes in its composition, increased life expectancy combined with a falling birth rate, for example, can have profound effects upon a society. Warfare and mass migration of male workers also have long-reaching effects on those left behind. The rapid growth of Third World populations has often incorrectly been identified as the major force preventing more rapid economic development. Population pressure has been known to generate technological breakthroughs. Their final chapter examines family planning programmes and concludes by asking who benefits most from population policies and questioning the right of developed countries to advocate family planning programmes for Third World nations. *Perspectives on Development and Population Growth in the Third World* O.G. Simmons, 2012-12-06 Until the early to mid 1970s social scientists in the fields of population and development were largely going their own ways. Demographers relied almost exclusively on demographic transition theory as their paradigm for understanding the role of development in population change and fertility decline. Conversely, most development economists and other specialists were certainly aware of the constraints placed upon development objectives by population growth. However, the main development theories paid little attention to population and the implications of population growth for development. Indeed, it was not until after the World Population Conference in Bucharest in 1974 that the interaction of population and development became a serious and positive theme for social scientific study. Accordingly, since about the mid 1970s an extensive literature in the field of population and development has been generated. And in 1975, under the auspices of the Population Council, the journal *Population and Development Review* was founded, a journal which in the past decade has developed into the premier publication in the world for work in this area. But our understanding of development as it refers to change in Third World countries remained fragmented. Moreover, our understanding of the linkages and interactions between population and development was very limited. It is in this regard that Ozzie Simmons's *Perspectives on Development and Population Growth in the Third World* will certainly have an impact. **Population and Development in the Third World** Allan M. Findlay, A. M. Findlay, 1987 Looks at how and why populations change, not only in level but also in composition. Economic and cultural factors are discussed and questions such as how populations respond to geographical imbalances in natural resources are raised. **Population and Development in the Third World** Allan M. Findlay, 1987 Economic Development in the Third World Michael P. Todaro, 1977 Textbook on economic development in developing countries discusses underdevelopment in the third world and problems of poverty, unemployment, income distribution, and relevant economic theory and stresses interdependence of the world economy as regards food, energy, natural resources, technology, etc. Diagrams, glossary of terminology, graphs, references, and statistical tables. *Development and Democratization in the Third World* Kenneth España Bauzon, 1992 Examines the prospects for democratization in the

developing world The book draws upon ideas of widespread socioeconomic well being human rights the distribution of resources and population and the environment

The Economic Development of the Third World Since 1900 Paul Bairoch,2013-11-05 First published in 1967 Professor Bairoch s Diagnostic de L Evolution Economique du Tiers Monde has gone into four editions and has brought the author an international reputation This English translation is in effect another edition based on the latest French text but incorporating much which is not to be found there The statistical tables have been revised and expanded wherever possible to include figures up to the end of 1972 the bibliography has been specially adapted to include the literature on the subject in the English language and two new chapters have been written Chapter 8 on Urbanization and Chapter 9 on The labour force and employment It has been Professor Bairoch s aim in this book to examine the development of under developed countries including China during the present century and through the use of comparative statistics to formulate a diagnosis of their growth His analysis includes whenever relevant a comparison between the present economic progress of Third World countries and that of the developed countries at the time of their take off Special attention has also been given to China s unique path of development In the course of his research the author has elaborated several new series The production of these new series and their integration with existing data make this book a valuable quantitative economic history of the Third World

Place, Migration and Development in the Third World Lawrence A. Industrialization and Development in the Third World

Rajesh Chandra,2003-09-02 Developing countries have undergone significant industrialization in the last three decades Yet industrial growth reveals marked spatial inequalities in terms of both country and location The Newly Industrialised Countries have achieved spectacular growth in sharp contrast to many other countries of the South Industrial structure has changed moving away from labour intensive industries to more technologically advanced manufacturing Developing countries have had considerable success in penetrating developed country markets but they are now encountering more market restrictions The role of the government in the development of the economy is also changing Increasingly countries are turning towards export orientated industrialization strategies and privatization whilst their governments are emphasising their facilitative role

Urban Development and New Towns in the Third World Alain R.A. Jacquemin,2019-01-22 First published in 1999 this volume examines India and Bombay countries which represent some of the world s most dramatic examples of rapid urban growth One of the strategies frequently adopted by the Indian authorities to cope with this urban growth is the development of new towns such as New Bombay which is India s largest and most significant urban planning experience since Independence The New Bombay model based on a specific planning and financing strategy is considered highly successful and so is increasingly being copied and implemented in other urban areas of India This volume makes the first independent evaluation of New Bombay and sets it in a wider Third World urban development context As well as analysing the processes of physical and economic growth the volume also examines the process of social development and in particular the consequences of this planning concept for the urban poor
