Population And History The Demographic Origins Of The Modern Philippines:

Population and History Daniel F. Doeppers, Peter Xenos, 1998 *Routledge Handbook of Asian Demography* Zhongwei Zhao, Adrian C. Hayes, 2017-12-14 Home to close to 60 per cent of the world's population Asia is the largest and by far the most populous continent. It is also extremely diverse physically and culturally. Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs, and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political, and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility, decline in sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students, and anyone who is interested in population change in Asia and the world.

State and Society in the Philippines Patricio N. Abinales, Donna J. Amoroso, 2017-07-06 This clear and nuanced introduction explores the Philippines' ongoing and deeply charged dilemma of state-society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces. Patricio N. Abinales and Donna J. Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society. The authors argue that this process reflects the country's recurring dilemma: on the one hand, is the state's persistent inability to provide essential services, guarantee peace and order, and foster economic development; on the other, is the Filipinos' equally enduring suspicions of a strong state. To many citizens, this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance, and billions of dollars in corruption, setting the nation back years in economic development and profoundly undermining trust in government. The book's historical sweep starts with the politics of the pre-colonial era and continues through the first year of Rodrigo Duterte's controversial presidency.

The Green Tiger Barbara Goldoftas, 2006 The Philippines was once famous for the beauty of its reef ringed islands white beaches and lush forests In less than a half century its forests were felled its oceans over fished and its coral reefs destroyed The rapid harvest of once abundant resources has brought droughts deadly flash floods and the collapse of vital fisheries As the rural economy weakened and

millions migrated to cities they overwhelmed the urban infrastructure Today the Philippines stands as an example of the profound and sweeping consequences of ecological decline In *The Green Tiger* Barbara Goldoftas documents this tragic trajectory But hers is not a story of hopelessness and inevitable defeat In lyrical unflinching prose she traces the struggle for conservation in the Philippines from isolated villages to large cities and in the process illustrates the surprising ways in which conservation and economic growth can effectively co exist *Freedom Incorporated* Colleen Woods,2020-05-15

Freedom Incorporated demonstrates how anticommunist political projects were critical to the United States expanding imperial power in the age of decolonization and how anticommunism was essential to the growing global economy of imperial violence in the Cold War era In this broad historical account Colleen Woods demonstrates how in the mid twentieth century Philippines US policymakers and Filipino elites promoted the islands as a model colony In the wake of World War II as the decolonization movement strengthened those same political actors pivoted and after Philippine independence in 1946 lauded the archipelago as a successful postcolonial democracy Officials at Malaca ang Palace and the White House touted the 1946 signing of the liberating Treaty of Manila as a testament to the US commitment to the liberation of colonized people and celebrated it under the moniker of Philippine American Friendship Day Despite elite propaganda from the early 1930s to late 1950s radical movements in the Philippines highlighted US hegemony over the new Republic of the Philippines and in so doing threatened American efforts to separate the US from sordid histories of empire imperialism and the colonial racial order Woods finds that in order to justify US intervention in an ostensibly independent Philippine nation anticommunist Filipinos and their American allies transformed local political struggles in the Philippines into sites of resistance against global communist revolution By linking political struggles over local resources like the Hukbalahap Rebellion in central Luzon to a war against communism American and Filipino anticommunists legitimized the use of violence as a means to capture and contain alternative forms of political economic and social organization Placing the post World War II history of anticommunism in the Philippines within a larger imperial framework in *Freedom Incorporated* Woods illustrates how American and Filipino intelligence agents military officials paramilitaries state bureaucrats academics and entrepreneurs mobilized anticommunist politics to contain challenges to elite rule in the Philippines *Secret Judgments of God* Noble David Cook,William George Lovell,2001

In the wake of European expansion disease outbreaks in the New World caused the greatest loss of life known to history Post contact Native American inhabitants succumbed in staggering numbers to maladies such as smallpox measles influenza and typhus against which they had no immunity A collection of case studies by historians geographers and anthropologists *Secret Judgments of God* discusses how diseases with Old World origins devastated vulnerable native populations throughout Spanish America In their preface to the paperback edition the editors discuss the ongoing often heated debate about contact population history *The Routledge Hispanic Studies Companion to Nineteenth-Century Spain* Elisa Martí-López,2020-09-24 *The Routledge Hispanic Studies Companion to Nineteenth Century*
