**Fathers, Families, and the State in France, 1914-1945** Kristen Stromberg Childers,2018-07-05 The state's policy with regard to fathers and fatherhood had a great impact on concepts of citizenship and gender in France in the era of the two World Wars Drawing on new material that has only recently become available from the archives of the Vichy regime Kristen Stromberg Childers analyzes the ways fathers were promoted as saviors of the nation after France's humiliating defeat by the Germans in June 1940 Childers argues that concern for the family and for the status of fathers in modern France was not merely a response to falling birthrates and German aggression but was fundamental to the very notion of citizenship and political participation The debate on men as gendered beings Childers demonstrates is central to the political social and cultural history of France in the modern age The father figure became a focus as participants from all classes and across the political spectrum debated what was wrong with the French family and what policies were needed to remedy the problem Childers examines how these policies were implemented what they reveal about the development of the welfare state in France and how they help explain the importance of Vichy in twentieth century French history Twenty eight illustrations including fifteen photographs many never previously published complement her argument Historical Dictionary of France Gino Raymond,2008-10-23 From the construction of Notre Dame and the Eiffel Tower to the Fall of the Bastille and the Declaration of the Rights of Man and the Citizen to Napoleon Bonaparte's defeat at Waterloo to Albert Camus L Etranger and the existentialism of Jean Paul Sartre France has been a part of some of the greatest and most memorable events in human history Author Gino Raymond relates the history of these events in the second edition of the Historical Dictionary of France Through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on kings politicians authors architects composers artists and philosophers a thorough history of France is presented

**Social Inequality and Class Radicalism in France and Britain** Duncan Gallie,1984-01-26 This book first published in 1983 examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action Drawing on data both from detailed case studies and from wider national surveys it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality It argues that the explanation of such differences cannot be found in some general law of the evolution of social conflict in capitalist society It must be sought in the profound institutional differences that exist between the two societies In particular the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war in accounting for the long term structural divergence of capitalist societies **The Statesman's Year-Book 1984-85** J. Paxton,2016-12-15 The classic reference
