divergent conceptions of sound domestic and foreign policy The SSSM views human behavior as essentially plastic and thus readily changed by governmental action Disagreeing the Evolutionary Model sees that malleability as seriously limited by our species evolved propensity for aggression status seeking xenophobia ethnocentrism and hierarchical social structures

The Psychology of Overeating Kima Cargill, 2015-10-22 Drawing on empirical research clinical case material and vivid examples from modern culture The Psychology of Overeating demonstrates that overeating must be understood as part of the wider cultural problem of consumption and materialism Highlighting modern society's pathological need to consume Kima Cargill explores how our limitless consumer culture offers an endless array of delicious food as well as easy money whilst obscuring the long term effects of overconsumption The book investigates how developments in food science branding and marketing have transformed Western diets and how the food industry employs psychology to trick us into eating more and more and why we let them Drawing striking parallels between Big Food and Big Pharma Cargill shows how both industries use similar tactics to manufacture desire resist regulation and convince us that the solution to overconsumption is further consumption Real life examples illustrate how loneliness depression and lack of purpose help to drive consumption and how this is attributed to individual failure rather than wider culture The first book to introduce a clinical and existential psychology perspective into the field of food studies Cargill's interdisciplinary approach bridges the gulf between theory and practice Key reading for students and researchers in food studies psychology health and nutrition and anyone wishing to learn more about the relationship between food and consumption
