Committee on Government Operations. Subcommittee on Foreign Aid Expenditure, 1970 Monograph of statements made at congressional hearings in the USA concerning present and future social problems of unprecedented population growth shows limited progress on an international scale towards establishing social policies with regard to birth control and family planning but questions whether the world has adequate time in which to avert disaster Graphs and references      **Population Crisis** United States. Subcommittee on Foreign Aid Expenditures, 1966      The Population Crisis and the Use of World Resources Stuart Mudd, 2013-12-11      The Demographic Crisis in Europe Richard R. Verdugo, 2021-05-01 By most accounts Europe has been mired in a demographic crisis since about 1970 By a demographic crisis is meant that Europe's dependency ratio is increasing and the net result has been declining populations and fewer workers to sustain society However there are certain issues that need attention Two topics seem to capture some of these issues The implications of the possible crisis and the crisis assessment The present volume is organized around both topics implications and assessment There are at least three contributions being made by the proposed volume To begin with while there are other issues related to the demographic crisis in Europe the present volume should motivate additional research Secondly the research in the proposed volume does not necessarily assume that there is a demographic crisis in Europe nor that it is consistent across national lines Thus each chapter in essence examines a different issue associated with the proposal that there is a crisis Finally the present volume makes several methodological contributions For example the chapter by David Swanson uses non Bayesian modeling in studying infant mortality Richard Verdugo examines the dependency ratio and selected factors on economic growth in selected European nations Kposowa and Ezzat conduct an assessment Martins examines variation in the path toward a crisis Johnson examines humanitarian migration and the crisis Edmonston examines the association between geopolitics and the crisis      **The Population Crisis** Larry K. how blame has been apportioned and why policies designed to tackle it have yielded few results Drawing on an array of primary and secondary sources as well as examples from scholarly and popular literature *The Population Problem in Pacific Asia* takes a comparative approach to fertility in the region and locates mainland China in its regional context It serves as a useful resource for government workers stakeholders and students and scholars in sociology demography geography economics and area studies      **Population Crisis in India** Vasant P.
