Population and Demography Stephen Shennan, 2017-06-28 First published in 1998 Routledge is an imprint of Taylor and Francis an informa company The Boundless Sea Peregrine Horden, Nicholas Purcell, 2019-09-30 This volume brings together for the first time a collection of twelve articles written both jointly and individually by Peregrine Horden and Nicholas Purcell as they have participated in the debates generated by their major work *The Corrupting Sea A Study of Mediterranean History* 2000 One theme in those debates has been how a comprehensive Mediterranean history can be written how an approach to Mediterranean history by way of its ecologies and the communications between them can be joined up with more mainstream forms of enquiry cultural social economic and political with their specific chronologies and turning points The second theme raises the question of how Mediterranean history can be fitted into a larger indeed global history It concerns the definition of the Mediterranean in space the way to characterise its frontiers and the relations between the region so defined and the other large spaces many of them oceans to which historians have increasingly turned for novel disciplinary cum geographical units of study A volume collecting the two authors studies on both these themes as well as their reply to critics of *The Corrupting Sea* should prove invaluable to students and scholars from a number of disciplines ancient medieval and early modern history archaeology and social anthropology CS1083 Demography and Migration Population trajectories from the Neolithic to the Iron Age Thibault Lachenal, Réjane Roure, Olivier Lemerrier, 2020-07-30 This volume presents combined proceedings of two complementary sessions of the XVIII UISPP World Congress Paris 2018 These sessions aimed to identify demographic variations during the Neolithic and Bronze Age and to question their causes while avoiding the potential taphonomic and chronological biases affecting the documentation

Companion Encyclopedia of Archaeology Graeme Barker, 2002-08-13 This comprehensive fully illustrated Companion answers the need for an in depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes In twenty six authoritative and clearly written essays this Companion explores the origins aims methods and problems of archaeology Each essay is written by a scholar of international standing and illustrations complement the text Paleodemography Robert D. Hoppa, James W. Vaupel, 2008-10-30 Paleodemography is the field of enquiry that attempts to identify demographic parameters from past populations usually skeletal samples derived from archaeological contexts and then to make interpretations regarding the health and well being of those populations However paleodemographic theory relies on several assumptions that cannot easily be validated by the researcher and if incorrect can lead to large errors or biases In this book physical anthropologists mathematical demographers and statisticians tackle these methodological issues for reconstructing demographic structure for skeletal samples Topics discussed include how skeletal morphology is linked to chronological age assessment of age from the skeleton demographic

models of mortality and their interpretation and biostatistical approaches to age structure estimation from archaeological samples This work will be of immense importance to anyone interested in paleodemography including biological and physical anthropologists demographers geographers evolutionary biologists and statisticians

Handbook of Archaeological Sciences A. Mark Pollard, Ruth Ann Armitage, Cheryl A. Makarewicz, 2023-02-09 HANDBOOK OF ARCHAEOLOGICAL SCIENCES A modern and comprehensive introduction to methods and techniques in archaeology In the newly revised Second Edition of the Handbook of Archaeological Sciences a team of more than 100 researchers delivers a comprehensive and accessible overview of modern methods used in the archaeological sciences The book covers all relevant approaches to obtaining and analyzing archaeological data including dating methods quaternary paleoenvironments human bioarchaeology biomolecular archaeology and archaeogenetics resource exploitation archaeological prospection and assessing the decay and conservation of specimens Overview chapters introduce readers to the relevance of each area followed by contributions from leading experts that provide detailed technical knowledge and application examples Readers will also find A thorough introduction to human bioarchaeology including hominin evolution and paleopathology The use of biomolecular analysis to characterize past environments Novel approaches to the analysis of archaeological materials that shed new light on early human lifestyles and societies In depth explorations of the statistical and computational methods relevant to archaeology Perfect for graduate and advanced undergraduate students of archaeology the Handbook of Archaeological Sciences will also earn a prominent place in the libraries of researchers and professionals with an interest in the geological biological and genetic basis of archaeological studies

Human Evolutionary Demography Oskar Burger, Ronald Lee, Rebecca Sear, 2024-06-14 Human evolutionary demography is an emerging field blending natural science with social science This edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography the evolutionary behavioural sciences biology and related disciplines By bridging the boundaries between social and biological sciences the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns Demographic traits and traits related to demographic outcomes including fertility and mortality rates marriage parental care menopause and cooperative behavior are subject to evolutionary processes Bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes By asking questions about old patterns from a new perspective the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic understandings and approaches that benefit both fields Human Evolutionary Demography introduces an emerging field in an accessible style It is suitable for graduate courses in demography as well as upper level undergraduates Its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working

on evolutionary processes and disciplines which cross cut natural and social science such as evolutionary psychology human behavioral ecology cultural evolution and evolutionary medicine As an accessible introduction it should interest readers whether or not they are currently familiar with human evolutionary demography

Sources and Methods of Historical Demography J. Dennis Willigan, Katherine A. Lynch, 2013-10-22 Sources and Methods of Historical Demography covers the fundamental sources methods and approaches to explanatory modeling for describing analyzing and understanding demographic features of past societies The book discusses the intellectual ancestry of historical demographic research beginning in the 17th century as well as the logic of basic techniques for reconstructing and analyzing information from fundamental source materials The text also describes the full range of disciplines that have made major contributions to historical demography and examples of empirical research The book concludes by arguing the case for conducting historical demographic research with a broad interdisciplinary ideal in mind Historians and sociologists will find the book invaluable

The Neolithic Demographic Transition and its Consequences Jean-Pierre Bocquet-Appel, Ofer Bar-Yosef, 2008-09-30 The transition from hunting and gathering to farming the Neolithic Revolution was one of the most significant cultural processes in human history that forever changed the face of humanity Natu an communities 15 100 12 000 Cal BP all dates in this chapter are calibrated before present planted the seeds of change and the Pre Pottery Neolithic PPN ca 12 000 ca 8 350 Cal BP people were the first to establish farming communities The revolution was not fully realized until quite late in the PPN and later in the Pottery Neolithic PN period We would like to ask some questions and comment on a few aspects emphasizing the linkage between biological and cultural developments during the Neolithic Revolution The biological issues addressed in this chapter are as follows Is there a demographic change from the Natu an to the Neolithic Is there a change in the overall health of the Neolithic populations compared to the Natu an Is there a change in the diet and how is it expressed Is there a change in the physical burden stress people had to bear with Is there a change in intra and inter community rates of violent encounters From the cultural perspective the leading questions will be What was the change in the economy and when was it fully realized Is there a change in settlement patterns and site nature and organization from Natu an to Neolithic Is there a change in human activities and division of labor

The Growth and Collapse of Pacific Island Societies Patrick Vinton Kirch, Jean-Louis Rallu, 2007-04-30 Were there major population collapses on Pacific Islands following first contact with the West If so what were the actual population numbers for islands such as Hawai i Tahiti or New Caledonia Is it possible to develop new methods for tracking the long term histories of island populations These and related questions are at the heart of this new book which draws together cutting edge research by archaeologists ethnographers and demographers In their accounts of exploration early European voyagers in the Pacific frequently described the teeming populations they encountered on island after island Yet missionary censuses and later nineteenth century records often indicate much smaller populations on Pacific Islands leading many scholars to debunk the explorers figures as romantic exaggerations Recently the

debate over the indigenous populations of the Pacific has intensified and this book addresses the problem from new perspectives Rather than rehash old data and arguments about the validity of explorers or missionaries accounts the contributors to this volume offer a series of case studies grounded in new empirical data derived from original archaeological fieldwork and from archival historical research Case studies are presented for the Hawaiian Islands Moorea the Marquesas Tonga Samoa the Tokelau Islands New Caledonia Aneityum Vanuatu and Kosrae

The Oxford Companion to Archaeology Neil Asher Silberman, Alexander A. Bauer, 2012-11 The second edition of The Oxford Companion to Archaeology is a thoroughly up to date resource with new entries exploring the many advances in the field since the first edition published in 1996 In 700 entries the second edition provides thorough coverage to historical archaeology the development of archaeology as a field of study and the way the discipline works to explain the past In addition to these theoretical entries other entries describe the major excavations discoveries and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered as well as new areas within archaeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time In addition to significant expansion first edition entries have been thoroughly revised and updated to reflect the progress that has been made in the last decade and a half

First Peoples in a New World David J. Meltzer, 2021-10-07 Over 15 000 years ago a band of hunter gatherers became the first people to set foot in the Americas They soon found themselves in a world rich in plants and animals but also a world still shivering itself out of the coldest depths of the Ice Age The movement of those first Americans was one of the greatest journeys undertaken by ancient peoples In this book David Meltzer explores the world of Ice Age Americans highlighting genetic archaeological and geological evidence that has revolutionized our understanding of their origins antiquity and adaptation to climate and environmental change This fully updated edition integrates the most recent scientific discoveries including the ancient genome revolution and human evolutionary and population history Written for a broad audience the book can serve as the primary text in courses on North American Archaeology Ice Age Environments and Human evolution and prehistory

The Bioarchaeology of Urbanization Tracy K. Betsinger, Sharon N. DeWitte, 2020-11-05 Urbanization has long been a focus of bioarchaeological research but what is missing from the literature is an exploration of the geographic and temporal range of human biological demographic and sociocultural responses to this major shift in settlement pattern Urbanization is characterized by increased population size and density and is frequently assumed to produce negative biological effects However the relationship between urbanization and human health requires careful examination given the heterogeneity that exists within and between urban contexts Studies of contemporary urbanization have found both positive and negative outcomes which likely have parallels in past human societies This volume is unique as there is no current bioarchaeological

book addressing urbanization despite various studies of urbanization having been conducted Collectively this volume provides a more holistic understanding of the relationships between urbanization and various aspects of human population health The insight gained from this volume will provide not only a better understanding of urbanization in our past but it will also have potential implications for those studying urbanization in contemporary communities

Caribbean Paleodemography L. Antonio Curet, 2005-06-05 A high significant discussion of Caribbean archaeology and a fascinating introduction to paleodemography According to the European chronicles at the time of contact the Greater Antilles were inhabited by the Taino or Arawak Indians who were organized in hierarchical societies Since its inception Caribbean archaeology has used population as an important variable in explaining many social political and economic processes such as migration changes in subsistence systems and the development of institutionalized social stratification In Caribbean Paleodemography L Antonio Curet argues that population has been used casually by Caribbean archaeologists and proposes more rigorous and promising ways in which demographic factors can be incorporated in our modeling of past human behavior He analyzes a number of demographic issues in island archaeology at various levels of analysis including inter and intra island migration carrying capacity population structures variables in prehistory cultural changes and the relationship with material culture and social development With this work Curet brings together the diverse theories on Greater Antilles island populations and the social and political forces governing their growth and migration

Global Social Archaeologies Koji Mizoguchi, Claire E Smith, 2019-06-27 Global Social Archaeologies contributes to the active engagement of contemporary social archaeology through addressing issues such as postcolonialism community heritage and Indigenous rights It addresses the major challenge of breaking down global divides especially in relation to fundamental human rights inequality and inequities of wealth power and access to knowledge This authoritative volume authored by the current and past presidents of the World Archaeological Congress introduces readers to the various theoretical and methodological tools available for the investigation of the past Taking into account the implications for contemporary societies it offers a new framework for social archaeologies in a globalised world By combining new data from their research with an innovative synthesis and analysis of leading research by others the authors have developed fresh conceptualisations and understandings of archaeology as a social practice and of the ways in which it simultaneously straddles the past present and future Exploring a range of case studies and enhanced by a wealth of illustrations Global Social Archaeologies highlights a new approach to archaeology one that places human rights at the core of archaeological theory and practice

Advances in Archaeological Method and Theory Michael B Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 1 presents the progressive explorations in methods and theory in archeology This book discusses the strategy for appraising significance which is needed to maximize the preservation and wise use of cultural resources Organized into 10 chapters this volume begins with an overview of planning for the best long term use of cultural resources which is the

essence of conservation archeology This text then examines importance of the concept in cultural ecological studies Other chapters consider the methods used in determining the density size and growth rate of human populations This book discusses as well the use of demographic variables in archeological explanation The final chapter deals with the decisions that must be made in designing a survey and to identify the alternative consequences for data recovery of various strategies This book is a valuable resource for archeologists and planners

In the Footsteps of the Etruscans Graeme Barker, Tom Rasmussen, 2023-10-12 Explores the 7500 year history of the area around Tuscania near Rome using the results of an extended archaeological investigation

New Forms of Urbanization Graeme Hugo, 2017-07-28 There is increasing appreciation in the social sciences that context is an important element in understanding social economic cultural political and demographic processes An important element in context is the type of settlement in which people live and work and so it is vital to be able to categorise people into particular settlements types This book brings together a leading team of social scientists to present the latest information on urbanization around the world highlighting examples of development patterns that are not adequately captured by the UN s type of reporting systems and drawing attention to other ways of representing current trends

Companion Encyclopedia of Anthropology Tim Ingold, 2002-09-11 Provides a comprehensive survey of contemporary thinking in biological social and cultural anthropology and establishes the interconnections between these three fields Useful cross references within the text with full biographical references and suggestions for further reading Carefully illustrated with line drawings and photographs The Companion Encyclopedia of Anthropology is a welcome addition to the reference literature Bringing together authoritative incisive and scrupulously edited contributions from some three dozen authors The book achieves an impressive breadth of coverage of specialist areas Times Higher Educational Supplement Recommended for all anthropology collections especially those in academic libraries Library Journal This is a marvellous book and I am very happy to recommend it Reference Reviews

Comp Ency Anthropology Tim Ingold, 2021-12-24 This comprehensive survey of contemporary thought in biological social and cultural anthropology sets the foundation for their future development and integration The principal rationale behind the Encyclopedia is to overcome the division and fragmentation within the approaches of the humanities and natural sciences to anthropology It emphasizes interconnections between perspectives and sub disciplines producing a complete perspective on what it means to be human The work consists of three parts Humanity Culture and Social Life and 40 major contributions Part One emphasizes human beings as members of a species how that species differs from others how it has evolved and how human populations have adapted to and in turn transformed their environments Part Two deals with the origin and structure of human culture and on the role of culture in action perception and cognition Part Three examines the various aspects of the relationships and processes that are carried on by persons and groups in the course of social life Useful features such as cross references within the text full biographical references suggestions for further reading and carefully illustrated line drawings make this

an indispensable resource for all students of anthropology or sociology
