Weart, 2012-03-19 After the Fukushima Nuclear Power Plant had a meltdown protesters around the world challenged nuclear power Climate change has never aroused this visceral dread Weart dissects this paradox showing that powerful images surrounding nuclear energy hold us captive allowing fear rather than facts to drive our thinking and public policy *AEC Licensing Procedure and Related Legislation* United States. Seaborg, B. Loeb, 2016-04-30 In this revealing book Nobel Laureate Glenn T Seaborg tells what it was like to be chairman of the Atomic Energy Commission during the Nixon presidency He draws extensively from his meticulously kept diary enabling the reader to be a fly on the wall during meetings with Nixon Henry Kissinger and other key policy makers During the Nixon period the debate over how to deal with the Soviets on nuclear issues and arms control remained central On the domestic scene efforts to promote and regulate the growth of a nuclear power industry were complicated by a rising tide of environmental protest Dr Seaborg describes how the Atomic Energy Commission shorn of much of the political immunity of its early years sought to maintain its programmes and ultimately its very existence while besieged by competing pressures from the White House other government agencies anti nuclear activists industry state governments and Congress

**Assuring Radiation Protection**, 1976 **Killing John Wayne** Ryan Uytendewilligen, 2021-10-01 Behold the history of a film so scandalous so outrageous so explosive it disappeared from print for over a quarter century A film so dangerous half its cast and crew met their demise bringing eccentric billionaire Howard Hughes final cinematic vision to life Starring All American legend John Wayne in full Fu Manchu make up as Mongol madman Genghis Khan Featuring sultry seductress Susan Hayward as his lover This is the true story of *The Conqueror* 1956 the worst movie ever made Filmed during the dark underbelly of the 1950s the Cold War when nuclear testing in desolate southwestern landscapes was a must for survival the very same landscapes were where exotic stories set in faraway lands could be made Just 153 miles from the St George Utah set nuclear bombs were detonated regularly at Yucca Flat and Frenchman Flat in Nevada providing a bizarre and possibly deadly background to an already surreal moment in cinema history This book tells the full story of the making of *The Conqueror* its ignominious aftermath and the radiation induced cancer that may have killed John Wayne and many others

**The Age of Ecology** Joachim Radkau,2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time
