Population Resources And Development Vol 1 Riding The Age Waves:

Population, Resources and Development Shripad Tuljapurkar, Ian Pool, Vipan Prachuabmoh, 2005-07-22 In the 21st century the populations of the world's nations will display large and long lived changes in age structure Many of these began with fertility change and are amplified by declining mortality and by migration within and between nations Demography will matter in this century not by force of numbers but by the pressures of waves of age structural change Many developing countries are in relatively early stages of fertility decline and will experience age waves for two or more generations These waves create shifting flows of people into the key age groups greatly complicating the task of managing development from building human capabilities and creating jobs to growing industry infrastructure and institutions In this book distinguished scientists examine key demographic social economic and policy aspects of age structural change in developing economies This book provides a joint examination of dimensions of age structural change that have often been considered in isolation from each other for example education job creation land use health it uses case studies to examine policy consequences and options and develops qualitative and formal methods to analyze the dynamics and consequences of age structural change

Population, Resources and Development Shripad Tuljapurkar, David Ian Pool, 2005 In the 21st century the populations of the world's nations will display large and long lived changes in age structure Many of these began with fertility change and are amplified by declining mortality and by migration within and between nations Demography will matter in this century not by force of numbers but by the pressures of waves of age structural change Many developing countries are in relatively early stages of fertility decline and will experience age waves for two or more generations These waves create shifting flows of people into

Allocating Public and Private Resources across Generations Anne H. Gauthier, C.Y. Cyrus Chu, Shripad Tuljapurkar, 2007-08-24 This book explores how demographic changes affect inter generational transfers of time

money goods and services all things that play a role in the well being of individuals and families It details the nature and measurement of transfers their motives and mechanisms and their macro level dimensions especially in the context of demographic transitions Coverage includes original empirical analyses of datasets from some twenty countries and extends the traditional analysis of inter generational transfers by examining different types of transfers

Ageing in Advanced Industrial States Shripad Tuljapurkar,Naohiro Ogawa,Anne H. Gauthier,2010-08-02 Population growth slowed across the world in the last decades of the 20th century changing substantially our view of the future The 21st century is likely to see the end to world population growth and become the century of population aging marked by low fertility and ever increasing life expectancy These trends have prompted many to predict a gloomy future caused by an unprecedented economic burden of population aging In response industrialized nations will need to implement effective social and economic policies and programs This is the final volume in a series of three The papers included explore many examples and strengthen the basis for effective economic and social policies by investigating the economic social and demographic consequences of the transformations in the structures of population and family These consequences include changes in economic behavior both in labor and financial markets and with regard to saving and consumption and intergenerational transfers of money and care

Economics and Ageing José Luis Iparraguirre,2018-12-11 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing Placing economic considerations into a wider social sciences context this is ideal reading not only for advanced undergraduate and masters students in economics health economics and the economics of ageing but also policy makers students professionals and practitioners in gerontology sociology health related sciences and social care This volume introduces the different conceptualisations of age and definitions of old age as well as the main theories of individual ageing as developed in the disciplines of biology psychology and sociology It covers the economic theories of fertility mortality and migration and describes the four main frameworks that can be used to study economics and ageing namely the life cycle the overlapping generations the perpetual youth and the dynastic models

Development and the Next Generation Gudrun Kochendörfer-Lucius,Boris Pleskovic,2007 The Berlin Workshop Series is a forum for the discussion of issues in development that are likely to have enduring relevance for research and policymaking These discussions are the building blocks to develop the framework which shapes the World Development Report It brings together key decision makers and researchers from the United States Europe and developing countries to discuss and brainstorm on development challenges

International Handbook of Population Aging Peter Uhlenberg,2009-04-29 The International Handbook of Population Aging examines research on a wide array of the profound implications of population aging It demonstrates how the world is changing through population aging and how demography is changing in response to it

The Children of Eve Louis P. Cain,Donald G. Paterson,2012-04-03 The Children of Eve is the first book to bring together general material about population and well being in a single volume It presents a world history of demographic and

economic change that ranges broadly over time and space and which emphasizes the commonality of human experience The first book to put together material about population and well being in a single volume Emphasizes the formative population history of Europe and North America over the years since the Middle Ages and includes discussions of Asia and the southern hemisphere The authors successfully maintain the difficult balance of addressing complex issues in a style that doesn't oversimplify the subject whilst upholding an approach that is accessible to general readers and students Designed to work as both a stand alone text or a supplement to textbooks in any number of courses Routledge Handbook of Asian Demography Zhongwei Zhao, Adrian C. Hayes, 2017-12-14 Home to close to 60 per cent of the world's population Asia is the largest and by far the most populous continent It is also extremely diverse physically and culturally Asian countries and regions have their own distinctive histories cultural traditions religious beliefs and political systems and they have often pursued different routes to development Asian populations also present a striking array of demographic characteristics and stages of demographic transition This handbook is the first to provide a comprehensive study of population change across the whole of Asia Comprising 28 chapters by more than 40 international experts this handbook examines demographic transitions on the continent their considerable variations their causes and consequences and their relationships with a wide range of social economic political and cultural processes Major topics covered include population studies and sources of demographic data historical demography family planning and fertility decline sex preferences mortality changes causes of death HIV AIDS population distribution and migration urbanization marriage and family human capital and labour force population ageing demographic dividends political demography population and environment and Asia's demographic future This handbook provides an authoritative and comprehensive reference for researchers policymakers academics students and anyone who is interested in population change in Asia and the world Functional Urban Areas in Poland Sławomir Kurek, Mirosław Wójtowicz, Jadwiga Gałka, 2019-09-20 This book explores demographic changes in Functional Urban Areas FUAs in Poland since 1990 Functional Urban Areas introduced by ESPON refer to functional territorial units that can be defined as travel to work area representing strong integration between urban cores and their immediate hinterland The functional urban area consists of a city plus its commuting zone It fills a significant gap in the academic literature by providing a deep and thorough analysis of the process of population change in Polish FUAs over the past 30 years In particular this empirical research work addresses population growth and decline the main components of population growth including fertility mortality and migration age composition and the pace of population ageing The book argues that the transformations of urban structures are triggered by second demographic transition SDT and suburbanization processes Based on data from the Central Statistical Office this comparative study on FUAs in Poland which employs a division into core and commuting zones reveals essential similarities and differences in population development making it possible to construct a demographic typology of FUAs and investigate their spatial arrangements A unique and innovative book it will

appeal to geographers demographers urbanists city planners and policymakers as well as students academic researchers and others involved in urban studies *Demographic Research Volume 19 Book 5* Joshua R. Goldstein, 2010-03 This fifth book of Volume 19 contains only a portion of publications which appeared between July 1 and December 31 2008 The first three books of Volume 19 contain Special Collection 7 Childbearing Trends and Policies in Europe The fourth and fifth books of Volume 19 contain the subsequent articles Book IV contains articles 30 through 45 and book V contains articles 46 through 62 All material published in volume 19 as well as full journal content is available as open access material at <http://www.demographic-research.org> Contemporary Demographic Transformations in China, India and Indonesia Christophe Z. Guilmoto, Gavin W. Jones, 2015-12-12 This book examines the profound demographic transformation affecting China India and Indonesia where 40% of the world's people live It offers a systematic comparative approach that will help readers to better understand the changing social and regional recomposition of the population in these regions The chapters present a detailed investigation and mapping of regional trends in mortality fertility migration and urbanization education and aging Throughout the analysis carefully considers how these trends affect economic and social development Coverage also raises global theoretical questions about the singular ways in which each of these three countries have achieved their demographic transition As the authors reveal demographic trends seem to be somewhat linear and anticipatable providing Asia's three demographic giants and their governments a formidable advantage in planning for the future But the evolution of human mobility in China India and Indonesia closely intertwined as it is with changing economic conditions appears less predictable and ranks high among the major challenges to demographic knowledge in the coming decades Offering an insightful look into the components implications and regional variations of a changing population this book will appeal to social scientists demographers anthropologists sociologists epidemiologists and specialists in Asian studies **Transitioning to Adulthood in Asia: School, Work, and Family Life** Wei-Jun Jean Yeung, Cheryll Alipio, Frank F. Furstenberg, Jr., 2013-03-07 In the past decade or so scholars in the United States have identified the emergence of a new distinct stage of life as adolescence has become protracted and most young people of recent generations take longer to achieve economic and psychological autonomy than they did a half century ago This new life stage in between adolescence and adulthood when young people are in a semiautonomous state has come to be known as early adulthood Main characteristics of this new life stage include a later entry into the work force a longer period of time living in the natal home and a delayed age at marriage and childbearing These trends not only have profound implications for young adults well being and intergenerational relationships but also challenge social institutions such as family schools labor markets and many youth serving institutions World Population Policies John F. May, 2012-03-28 This book examines the history behind the formulation implementation and evaluation of population policies in the more developed the less developed and the least developed countries from 1950 until today as well as their future prospects It links population policies with the theories of the demographic epidemiological

and migratory transitions It begins by summarizing the demographic situation around the world with an emphasis on population policies and their underlying theories Then it reviews the early efforts to reduce mortality and fertility in the developing countries This is followed by a description of the internationalization of the debate on population issues and the transformation of these programs into more formal population policies particularly in the developing countries The book reviews also the situation of the developed countries and their specific challenges sub replacement fertility population aging and immigration and examines the effectiveness of population policies It also explores the way forward and future prospects for population policies over the next decades The book provides numerous concrete examples from all over the world and show how population policies are actually implemented and what have been their successes as well as their constraints Above all the book highlights the importance of understanding underlying demographic trends when assessing the development prospects of any country The book is recommended for not only demographers social scientists and policymakers but also economists and political scientists who are interested in social and demographic change around the world Demography students and researchers who are interested in applying knowledge on population trends and prospects in designing and evaluating public policies will find this an invaluable reference work

[Transnational Labour Migration, Remittances and the Changing Family in Asia](#) L. Hoang,B. Yeoh,2015-05-13 The contributors investigate the inter relationships between migrant remittances and the family in Asia They argue that in the context of Asian transnational labour migration where remittances tend to become a primary currency of care the making or breaking of the family unit is mainly contingent on how individuals handle remittance processes

The New Zealand Family from 1840 D. Ian Pool,Arunachalam Dharmalingam,Janet Sceats,2013-11-01 An authoritative demographic history of the New Zealand family from 1840 2005 this reference is a collection of statistics that interprets the changing role of the family and its members Using detailed research spanning 165 years the authors chart the move from the large family of the 19th century to the baby boom the increase in family diversity and the modern trend towards unsustainably small families This analysis of society helps trace changing attitudes and the structure of society by noting the reasons for and consequences of the demographic changes

Aging, Economic Growth, and Old-age Security in Asia Donghyun Park,Sang-Hyop Lee,Andrew Mason,2012-01-01 Population aging is perhaps the single biggest economic and social obstacle confronting Asia s future The region wide demographic transition towards an older population is fundamentally reshaping the demographic landscape and is giving rise to two key socio economic challenges This timely book provides an in depth analysis of these challenges and presents concrete policy options for tackling them First the expert contributors argue Asia must find ways to sustain rapid economic growth in the face of less favorable demographics which implies slower growth of the workforce Second they contend Asia must find ways to deliver affordable adequate and sustainable old age economic security for its growing elderly population Underpinned by rigorous analysis a wide range of concrete policy options for sustaining economic growth while delivering economic security for the

elderly are then presented These include Asia wide policy options relevant to the entire region such as building up strong national pension systems whilst other policy options are more relevant to sub groups of countries This stimulating and informative book will be of great interest to academics students and researchers with an interest in Asian studies economics generally and more specifically public sector economics

CEMAF as a Census Method David A. Swanson, Paula J. Walashek, 2011-03-28 In provocative terms that push the envelope of technical administrative and legal capabilities Swanson and Walashek propose a re vamped US census based neither on the current system self enumeration nor its predecessor door to door canvassing Instead they propose that it be built on a combination of four elements 1 administrative records 2 the continuously updated Master Address File 3 survey data and 4 modeling and imputation techniques They use Census Enhanced Master Address File CEMAF as a descriptive term for their proposal which is based on four principles and includes a proposal for an independent Census Bureau They argue that evidence suggests that the methods used to conduct traditional census counts may be at the end of their useful working lives as evidenced by increasing costs and declining response rates Some of their ideas will seem farfetched However Swanson and Walashek believe this is the time to discuss radical proposals as governments re examine the utility of traditional census counts and consider reductions as is the case in Canada and England This SpringerBriefs should be on the reading list of staff in statistical agencies grappling with rising costs and declining response rates as well as census stakeholders concerned about costs accuracy and census utility

Fertility and Public Policy Noriyuki Takayama, Martin Werding, 2010-12-17 Experts discuss the appropriateness and effectiveness using public policy to influence fertility decisions In 2050 world population growth is predicted to come almost to a halt Shortly thereafter it may well start to shrink A major reason behind this shift is the fertility decline that has taken place in many developed countries In this book experts discuss the appropriateness and effectiveness of using public policy to influence fertility decisions Contributors discuss the general feasibility of public interventions in the area of fertility analyze fertility patterns and policy design in such countries as Japan South Korea China Sweden and France and offer theoretical analyses of parental fertility choices that provide an overview of a broad array of child related policy instruments in a number of OECD and EU countries The chapters show that it is difficult to gauge the effectiveness of such policy interventions as child care subsidies support for women s labor force participation and tax incentives Data are often incomplete causal relations unproved and the role of social norms and culture difficult to account for Investigating reasons for the decline in fertility more closely will require further study This volume offers the latest work on this increasingly important subject
