Contemporary Sociological Theory Jonathan H. Turner, 2012-09-20 Written by award winning scholar Jonathan Turner *Contemporary Sociological Theory* covers the range of diversity of theory in nine theoretical traditions and variants of theoretical approaches in these traditions The result is a comprehensive review of present day theorizing in sociology covering functional evolutionary ecological conflict interactionist exchange structuralist cultural and critical theories and the major proponents of these theories Moreover for each theoretical tradition its origins are examined in a separate chapter with an eye to how classical theorists influenced the work of key contemporary scholars This book will serve as a valuable resource for those readers seeking in depth and comprehensive coverage of contemporary traditions in their historical contexts Unlike many texts coverage is comprehensive

and deep The theories and their origins are examined in detail so that readers can fully understand the origins and present profile of theories in present day sociology Unlike many texts that skim over theories on the surface this book seeks to unlock for the reader their underlying structure of each theory The book is written in a modular format so that theories and traditions can be examined in any order and in many diverse combinations If desired only the contemporary theories can be read without attention to their historical contexts or the reverse is true if readers want to understand the historical origins of a particular theoretical tradition Since Jonathan Turner is an active theorist in his own right he brings to the book an appreciation of how theories are created as an insider rather than as only a commentator on theory As such he is able to bring out the underlying assumptions structure and form of a theory in new and interesting ways for casual readers and scholars alike

Careers of Couples in Contemporary Society : From Male Breadwinner to Dual-Earner Families

Hans-Peter Blossfeld, Sonja Drobnic, 2001-10-04 This is the first systematic international comparative study of the transformation of couples careers in modern societies The countries included are Germany the Netherlands the Flemish part of Belgium Italy Spain Great Britain the United States Sweden Denmark Poland Hungary and China Using longitudinal data this book explores what has and what has not changed for couples in various countries due to women s greater involvement in paid employment It provides evidence that despite substantial improvement in women s educational attainment and career opportunities in all the countries studied dimensions of role specialization in dual earner couples have not undergone transformation to the same extent Gender role change within the family has generally been asymmetric so that housework and childcare primarily remain women s work There are however also significant institutional differences among modern societies which determine a country s timing speed and pattern of change from the traditional male breadwinner to the dual earner family model In particular the impact of males resources on their female partners employment careers is dependent on the welfare state regime In conservative and Mediterranean welfare state regimes women s paid employment is negatively correlated with the occupational position of their husbands In liberal welfare state regimes no impact of husbands resources on their wives labour force participation could be detected In the social democratic welfare state regime and generally in former socialist countries husbands resources have a positive effect on their wives employment so that occupational resources cumulate in dual earner families
