Porphyry Introduction:

Porphyry Introduction Porphyry, 2003 Written by Porphyry at the end of the second century AD the Introduction to philosophy is the most successful work of its kind ever to have been published translated into most respectable languages and used by students for a millennium and a half *Introduction Porfyrios*, 2006 *Introduction Porfyrios*, 2006

Porphyry's Introduction Jonathan Barnes, 2003-05-08 The Introduction to philosophy written by Porphyry at the end of the second century AD is the most successful work of its kind ever to have been published It was translated into most respectable languages and for a millennium and a half every student of philosophy read it as his first text in the subject Porphyry's aim was modest he intended to explain the meaning of five terms genus species difference property and accident terms which he took to be important to Aristotelian logic and metaphysics and hence to philosophy in general Thus in principle the Introduction is simple and elementary In fact there are sometimes difficulties and doubts on the surface of the text and beneath the surface there are frequent depths or profundities The work raises directly or indirectly a number of perennial philosophical questions In addition the Introduction became in Boethius's Latin translation the point of reference for one of the longest lasting of philosophical disputes the dispute over the status of universals This book contains a new English translation of the Introduction preceded by a study of the life and works of Porphyry the purpose and nature of the Introduction and the history of the text It is accompanied by a discursive commentary the primary aim of which is to analyse and assess the philosophical theses and arguments which the Introduction puts forward But there are also numerous notes of a more philological or historical turn The twentieth century turned away from Aristotelian logic and the Introduction lost its position on the syllabus Barnes does not argue that it should be put back in its old place but his commentary the first to be published in English and the fullest to be published for a century suggests that there is blood in the old man yet

Ammonius: Interpretation of Porphyry's Introduction to Aristotle's Five Terms Michael Chase, 2019-09-05 One of

his six introductions to philosophy widely used by students in Alexandria Ammonius lecture on Porphyry was recorded in writing by his students in the commentary translated here Along with five other types of introductions three of which are translated in the Ancient Commentators on Aristotle volume Elias and David Introductions to Philosophy with Olympiodorus Introduction to Logic it made Greek philosophy more accessible to other cultures These introductions became standard in Ammonius school and included a popular set of five or more definitions of philosophy some of them drawn from commentaries on quite different works Ammonius lecture expounded the most celebrated and discussed previous introduction written by Porphyry 200 years earlier which was devoted to five main technical terms of Aristotle's logic Ammonius was sympathetic to Porphyry because they both sought to harmonise the views of Plato and Aristotle with each other arguing in different ways that the two philosophers did not disagree about the nature of universals Porphyry's introduction was a hugely influential work for centuries after its composition and this commentary by Ammonius served to maintain its position at the centre of later schools of philosophy This English translation of Ammonius work is the latest volume in the Ancient Commentators on Aristotle series and makes this philosophical work accessible to a modern readership The translation is accompanied by an introduction comprehensive commentary notes bibliography glossary of translated terms and a subject index

Methexiology Nicolas Laos, 2016-05-19 Methexiology is not a particular theory but rather a general philosophical orientation Therefore in Methexiology Philosophical Theology and Theological Philosophy for the Deification of Humanity Nicolas Laos elucidates the significance of methexiology for the study of ontology epistemology ethics philosophical psychology theory of justice philosophy of history and philosophy of religion Laos argues that faced with the modern and the postmodern crises of meaning we need a new myth a new spiritual formula for the resacralization of humanity and the cosmos without restoring defunct totems without using tales as cheap substitutes for the lack of a life giving myth and without negating history In his Methexiology Laos studies the genealogy of the modern and the postmodern crises of meaning and based on his new interpretation of classical Greek philosophy and Hesychasm proposes methexiology as a way of overcoming the crises of meaning and as a way of resacralizing humanity and the cosmos through a new metaphysically grounded humanism

Hellenistic Astrology Chris Brennan, 2017-02-10 Hellenistic astrology is a tradition of

horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE. It is the source of many of the modern traditions of astrology that still flourish around the world today although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study. *Hellenistic Astrology: The Study of Fate and Fortune* is one of the first comprehensive surveys of this tradition in modern times. The book covers the history, philosophy and techniques of ancient astrology with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period.

Christianity, Empire, and the Making of Religion in Late Antiquity Jeremy M. Schott, 2013-04-23 In *Christianity, Empire, and the Making of Religion in Late Antiquity* Jeremy M. Schott examines the ways in which conflicts between Christian and pagan intellectuals over religious, ethnic and cultural identity contributed to the transformation of Roman imperial rhetoric and ideology in the early fourth century CE. During this turbulent period which began with Diocletian's persecution of the Christians and ended with Constantine's assumption of sole rule and the consolidation of a new Christian empire, Christian apologists and anti-Christian polemicists launched a number of literary salvos in a battle for the minds and souls of the empire. Schott focuses on the works of the Platonist philosopher and anti-Christian polemicist Porphyry of Tyre and his Christian respondents, the Latin rhetorician Lactantius, Eusebius, bishop of Caesarea and the emperor Constantine. Previous scholarship has tended to narrate the Christianization of the empire in terms of a new religion's penetration and conquest of classical culture and society. The present work, in contrast, seeks to suspend the static, essentializing conceptualizations of religious identity that lie behind many studies of social and political change in late antiquity in order to investigate the processes through which Christian and pagan identities were constructed. Drawing on the insights of postcolonial discourse analysis, Schott argues that the production of Christian identity and in turn the construction of a Christian imperial discourse were intimately and inseparably linked to the broader politics of Roman imperialism.

Reconsidering Eusebius Sabrina Inowlocki, Claudio Zamagni, 2011-06-22

Over the last decades Eusebius has been the focus of a great deal of attention. New light has been shed both on his writings and on his personality, which has led to a welcome reassessment of his significance. As a result, he is no longer perceived as a mere compiler but as a powerful author who largely contributed to the construction of the orthodox Church's triumphalism. This volume seeks to contribute to the ongoing re-evaluation of Eusebius as an active participant to the construction of late antique history, theology, and literature. The result is an interdisciplinary collection of articles by an international team of scholars who offer innovative papers on one of the most important late antique authors.

This collection of essays is devoted to the rhetoric, Neoplatonic philosophy, and Christian theology of Marius Victorinus, a mid-fourth-century professor of rhetoric and philosopher who converted to Christianity late in life. Contributors include Jan Dominik Bogataj, Michael Chase, Nello Cipriani, Stephen A. Cooper, Volker Henning Drecoll, Lenka Karfíková, Josef Lissl-Václav Němec, Thomas Riesenweber, Guadalupe Lopetegui Semperena, Miran Peli, Chiara O'Tommasi, John D. Turner, and Florian Zacher. The chapters in this volume are of great interest to students of late antique philosophy, Christian theology, and Latin rhetoric.

Basil of Caesarea, Gregory of Nyssa, and the Transformation of Divine Simplicity Andrew Radde-Gallwitz, 2009-10

Divine simplicity is the idea that as the ultimate principle of the universe, God must be a non-composite unity, not made up of parts or diverse attributes. Radde-Gallwitz explores how this idea was appropriated by early Christian theologians from non-Christian philosophy, with particular reference to Basil of Caesarea and Gregory of Nyssa.
