Alexander, Jack Clark Francis, 1986 Portfolios of Real Options Rainer Brosch, 2008-03-29 Valuing portfolios of options embedded in investment decisions is arguably one of the most important and challenging problems in real options and corporate nance in general Although the problem is common and vitally important in the value creation process of almost any corporation it has not yet been satisfactorily addressed It is key for any corporation facing strategic resource allocation decisions be it a pharmaceutical rm valuing and managing its pipeline of drugs a telecom company having to select a set of technological alternatives a venture capital or private equity rm investing in a portfolio of ventures or any company allocating resources Portfolios of real options typically interact such that the value of the whole differs from the sum of the separate parts Thus one must address and value the particular con guration of options embedded in a speci c situation taking into account the con guration of other options already present in the portfolio which in turn depends on the correlation struc ture among the various underlying assets and the strategic dependencies among the options themselves e g mutual exclusivity strategic additiv ity compoundness complementarity etc In that sense optimal decisions also depend on past option exercise decisions by management and organi zational capabilities put in place in the past *Capital Budgeting Techniques* F. recent developments surrounding it Modern portfolio theory MPT which originated with Harry Markowitz's seminal paper Portfolio Selection in 1952 has stood the test of time and continues to be the intellectual foundation for real world portfolio management This book presents a comprehensive picture of MPT in a manner that can be effectively used by financial practitioners and understood by students Modern Portfolio Theory provides a summary of the important findings from all of the financial research done since MPT was created and presents all the MPT formulas and models using one consistent set of mathematical symbols Opening with an informative introduction to the concepts of probability and utility theory it quickly moves on to discuss Markowitz's seminal work on the topic with a thorough explanation of the underlying mathematics Analyzes portfolios of all sizes and types shows how the advanced findings and formulas are derived and offers a concise and comprehensive review of MPT literature Addresses logical extensions to Markowitz's work including the Capital Asset Pricing Model Arbitrage Pricing Theory portfolio ranking models and performance attribution Considers stock market developments like decimalization high frequency trading and algorithmic trading and reveals how they align with MPT Companion Website contains Excel spreadsheets that allow you to compute and graph Markowitz efficient frontiers with riskless and risky assets If you want to gain a complete understanding of modern portfolio theory this is the book you need to read Modern Portfolio Theory and Investment Analysis Edwin J. Elton, Martin J. Gruber, Stephen J. Brown, William N. Goetzmann, 2009-11-16

An update of a classic book in the field Modern Portfolio Theory examines the characteristics and analysis of individual securities as well as the theory and practice of optimally combining securities into portfolios It stresses the economic intuition behind the subject matter while presenting advanced concepts of investment analysis and portfolio management Readers will also discover the strengths and weaknesses of modern portfolio theory as well as the latest breakthroughs **Elliptically Contoured Models in Statistics and Portfolio Theory** Arjun K. Gupta, Tamas Varga, Taras Bodnar, 2013-09-07 Elliptically Contoured Models in Statistics and Portfolio Theory fully revises the first detailed introduction to the theory of matrix variate elliptically contoured distributions There are two additional chapters and all the original chapters of this classic text have been updated Resources in this book will be valuable for researchers practitioners and graduate students in statistics and related fields of finance and engineering Those interested in multivariate statistical analysis and its application to portfolio theory will find this text immediately useful In multivariate statistical analysis elliptical distributions have recently provided an alternative to the normal model Elliptical distributions have also increased their popularity in finance because of the ability to model heavy tails usually observed in real data Most of the work however is spread out in journals throughout the world and is not easily accessible to the investigators A noteworthy function of this book is the collection of the most important results on the theory of matrix variate elliptically contoured distributions that were previously only available in the journal based literature The content is organized in a unified manner that can serve as a valuable introduction to the subject Harvard Business School Core Collection Baker Library, 1993 *Dynamic Hedging*

Nassim Nicholas Taleb,1997-01-14 Destined to become a market classic *Dynamic Hedging* is the only practical reference in exotic options hedging and arbitrage for professional traders and money managers Watch the professionals From central banks to brokerages to multinationals institutional investors are flocking to a new generation of exotic and complex options contracts and derivatives But the promise of ever larger profits also creates the potential for catastrophic trading losses Now more than ever the key to trading derivatives lies in implementing preventive risk management techniques that plan for and avoid these appalling downturns Unlike other books that offer risk management for corporate treasurers *Dynamic Hedging* targets the real world needs of professional traders and money managers Written by a leading options trader and derivatives risk advisor to global banks and exchanges this book provides a practical real world methodology for monitoring and managing all the risks associated with portfolio management Nassim Nicholas Taleb is the founder of Empirica Capital LLC a hedge fund operator and a fellow at the Courant Institute of Mathematical Sciences of New York University He has held a variety of senior derivative trading positions in New York and London and worked as an independent floor trader in Chicago Dr Taleb was inducted in February 2001 in the Derivatives Strategy Hall of Fame He received an MBA from the Wharton School and a Ph D from University Paris Dauphine *Mathematical Economics and Operations Research* Joseph
